Covers theory and operation of all domestic and import automotive heating and air conditioning systems in use today. Step-by-step procedures are provided for diagnosis, maintenance and repair. Includes a basic theory of air conditioning and heating system operation, heating and air conditioning system components, types of automotive air conditioning systems, service and diagnostic tools, air conditioning system service and repair, glossary of terms, and trouble

shooting. Most everything you need to know about how air conditioning systems work, how to maintain, service, troubleshoot and repair them. Including expanded coverage of R-12 and R-134a air conditioning systems. All the basics technicians need to know Great at a job site! The Air Conditioning Manual assists entry-level engineers in the design of air-conditioning systems. It is also usable - in conjunction with fundamental HVAC&R resource material - as a senior- or graduate-level text for a university course in HVAC system

design. The manual was written to fill the void between theory and practice - to bridge the gap between real-world design practices and the theoretical calculations and analytical procedures or on the design of components. This second edition represents an update and revision of the manual. It now features the use of SI units throughout, updated references and the editing of many illustrations. \* Helps engineers quickly come up with a design solution to a required air conditioning system. \* Includes issues from comfort to cooling load calculations. \* New sections on "Green

HVAC" systems deal with hot topic of sustainable buildings. "In the middle of a repair, water starts to gush unexpectedly. What's one to do? ARCO puts a wealth of job related information in a pocket sized guide. From terms of the trade to troubleshooting advice, it's the perfect companion for anyone in the field." -- B&N from the publisher (July 2007). The author has had wide experience in cost and labour estimating, having worked for some of the largest construction firms in the world. He has made and assembled numerous types of estimates including lump-sum, hard-

priced, and scope, and has conducted many time and method studies in the field and in fabricating shops. John S. Page has received the Award of Merit from the American Association of Cost Engineers in recognition of outstanding service and cost engineering The ASHRAE 581-RP Project Team
