**Gradual failure : the air war over North Vietnam 1965-1966** Jacob Van Staaveren, 2002 Of the many facets of the American war in Southeast Asia debated by U S authorities in Washington by the military services and the public none has proved more controversial than the air war against North Vietnam The air war's inauguration with the nickname Rolling Thunder followed an eleven year American effort to induce communist North Vietnam to sign a peace treaty without openly attacking its territory Thus Rolling Thunder was a new military program in what had been a relatively low key attempt by the United States to win the war within South Vietnam against insurgent communist Viet Cong forces aided and abetted by the north The present volume covers the first phase of the Rolling Thunder campaign from March 1965 to late 1966 It begins with a description of the planning and execution of two initial limited air strikes nicknamed Flaming Dart I and II The Flaming Dart strikes were carried out against North Vietnam in February 1965 as the precursors to a regular albeit limited Rolling Thunder air program launched the following month Before proceeding with an account of Rolling Thunder its roots are traced in the events that compelled the United States to adopt an anti communist containment policy in Southeast Asia after the defeat of French forces by the communist Vietnamese in May 1954

**Making Strategy** Dennis M. Drew,Donald M. Snow,2002-04 National security strategy is a vast subject involving a daunting array of interrelated subelements woven in intricate sometimes vague and ever changing patterns Its processes are often irregular and confusing and are always based on difficult decisions laden with serious risks In short it is a subject understood by few and confusing to most It is at the same time a subject of overwhelming importance to the fate of the United States and civilization itself Col Dennis M Drew and Dr Donald M Snow have done a considerable service by drawing together many of the diverse threads of national security strategy into a coherent whole They consider political and military strategy elements as part of a larger decisionmaking process influenced by economic technological cultural and historical factors I know of no other recent volume that addresses the entire national security milieu in such a logical manner and yet also manages to address current concerns so thoroughly It is equally remarkable that they have addressed so many contentious problems in such an evenhanded manner Although the title suggests that this is an introductory volume and it is I am convinced that experienced

practitioners in the field of national security strategy would benefit greatly from a close examination of this excellent book Sidney J Wise Colonel United States Air Force Commander Center for Aerospace Doctrine Research and Education "My Clan Against the World": U.S. and Coalition Forces in Somalia 1992-1994 ,2004 This study examines the American military's experience with urban operations in Somalia particularly in the capital city of Mogadishu That original focus can be found in the following pages but the authors address other broader issues as well to include planning for a multinational intervention workable and unworkable command and control arrangements the advantages and problems inherent in coalition operations the need for cultural awareness in a clan based society whose status as a nation state is problematic the continuous adjustments required by a dynamic often unpredictable situation the political dimension of military activities at the operational and tactical levels and the ability to match military power and capabilities to the mission at hand Global Trends 2040 National Intelligence Council,2021-03 The ongoing COVID 19 pandemic marks the most significant singular global disruption since World War II with health economic political and security implications that will ripple for years to come Global Trends 2040 2021 Global Trends 2040 A More Contested World 2021 released by the US National Intelligence Council is the latest report in its series of reports starting in 1997 about megatrends and the world's future This report strongly influenced by the COVID 19 pandemic paints a bleak picture of the future and describes a contested fragmented and turbulent world It specifically discusses the four main trends that will shape tomorrow's world Demographics by 2040 1.4 billion people will be added mostly in Africa and South Asia Economics increased government debt and concentrated economic power will escalate problems for the poor and middleclass Climate a hotter world will increase water food and health insecurity Technology the emergence of new technologies could both solve and cause problems for human life Students of trends policymakers entrepreneurs academics journalists and anyone eager for a glimpse into the next decades will find this report with colored graphs essential reading The Joint Chiefs of Staff and the War in Vietnam, 1960-1968: 1960-1968 Graham A. Cosmas,2009 **The Irony of Vietnam** Leslie H. Gelb,Richard K. Betts,2016-05-31 If a historian were allowed but one book on the American involvement in Vietnam this would be it Foreign Affairs When first published in 1979 four years after the end of one of the most divisive conflicts in the United States The Irony of Vietnam raised eyebrows Most students of the war argued that the United States had stumbled into a quagmire in Vietnam through hubris and miscalculation as the New York Times's Fox Butterfield put it But the perspective of time and the opening of documentary sources including the Pentagon Papers had allowed Gelb and Betts to probe deep into the decisionmaking leading to escalation of military action in Vietnam The failure of Vietnam could be laid at the door of American foreign policy they said but the decisions that led to the failure were made by presidents aware of the risks clear about their aims knowledgeable about the weaknesses of their allies and under no illusion about the outcome The book offers a picture of a steely resolve in government circles that while useful in creating consensus did not allow for alternative perspectives In the years since its

publication *The Irony of Vietnam* has come to be considered the seminal work on the Vietnam War. *Air Power and the Ground War in Vietnam* Donald J. Mrozek, 2002 Dr Donald J Mrozek's research sheds considerable light on how the use of air power evolved in the Vietnam War Much more than simply retelling events Mrozek analyzes how history politics technology and the complexity of the war drove the application of air power in a long and divisive struggle Mrozek delves into a wealth of original documentation and his scholarship is impeccable His analysis is thorough and balanced His conclusions are well reasoned but will trouble those who have never seriously considered how the application of air power is influenced by factors far beyond the battlefield Whether or not the reader agrees with Mrozek the quality of his research and analysis makes his conclusions impossible to ignore John C Fryer Jr Brigadier General United States Air Force Commander Center for Aerospace Doctrine Research and Education *The U. S. Army/Marine Corps Counterinsurgency Field Manual* David H. Petraeus, James F. Amos, John C. McClure, 2015-12-31 This field manual establishes doctrine for military operations in a counterinsurgency COIN environment It is based on lessons learned from previous counterinsurgencies and contemporary operations It is also based on existing interim doctrine and doctrine recently developed Counterinsurgency operations generally have been neglected in broader American military doctrine and national security policies since the end of the Vietnam War over 40 years ago This manual is designed to reverse that trend It is also designed to merge traditional approaches to COIN with the realities of a new international arena shaped by technological advances globalization and the spread of extremist ideologies some of them claiming the authority of a religious faith This is a comprehensive manual that details every aspect of a successful COIN operation from intelligence to leadership to diplomacy It also includes several useful appendices that provide important supplementary material **Making Twenty-First-Century Strategy** Dennis M. Drew, Donald M. Snow, 2010-05 This new work defines national security strategy its objectives the problems it confronts and the influences that constrain and facilitate its development and implementation in a post Cold War post 9 11 environment The authors note that making and implementing national strategy centers on risk management and present a model for assessing strategic risks and the process for allocating limited resources to reduce them The major threats facing the United States now come from its unique status as the sole remaining superpower against which no nation state or other entity can hope to compete through conventional means The alternative is what is now called asymmetrical or fourth generation warfare Drew and Snow discuss all these factors in detail and bring them together by examining the continuing problems of making strategy in a changed and changing world Originally published in 2006 [The First Fight: U.S. Marines in Operation Starlite, August 1965](#) Rod Andrew, 2016-10-27 The 2008 National Defense Authorization Act authorized the Secretary of Defense to conduct a program to commemorate the 50th anniversary of the Vietnam War The First Fight is the second title in a series dedicated to the Marine Corps involvement in Southeast Asia from the early 1960s until 1975 This commemorative publication focuses on Operation Starlite the first significant engagement between Marines and the Viet

Cong with regimental sized forces It lasted from 18 to 24 August 1965 and in many ways foreshadowed the experience of American forces in Vietnam
