Discover a masterpiece that gives new life to found objects in *The Art of Forgotten Things*. Imagine necklaces and bracelets using one-of-a-kind components that hint at fragments of stories that exist only in the mind, evoking a mysterious past. Author Melanie Doerman will teach you how to take exquisite mementoes from history and make them into meaningful works of wearable art. *The Art of Forgotten Things* offers a brilliant new take on expressing your story within a jewelry design. Melanie shows how to create delicate beaded frames, clasps, nets, and components with seed beads and combine them with mixed-media elements for jewelry with an evocative look and feel. You'll also find an extensive techniques section that includes instructions for flat and tubular peyote, right-angle weave, bead netting, bead embroidery, and picot edges and fringes; basic jewelry techniques such as wire wrapping; mixed-media techniques such as foiling; and additional embellishment. Detailed step-by-step instructions are provided for each project. You'll learn about various types of beads used in the book's projects, from tiny seed beads to crystals, pressed glass, pearls, and more, as well as other materials, tools, and "treasures" that make each creation unique. In addition, Melanie explores using readily available materials and items that you might already have in your collection, along with directions for locating more unusual or vintage items. *The Art of Forgotten Things* is truly a one-of-a-kind masterpiece for all imaginative jewelry artists. Excerpt from *The Creative Art of Fiction* Not all fiction is artistically great, or even correct, nor is immediate success a fair test of quality. The relation of a piece of literature to the reading public is determined by many and complex elements. In the beginning, the artistic quality of the novel may weigh least in its popularity. Maximum sales are often due to special interest in the subject at the time of publication, as in the case of Robert Elsntere, *le Heavenly Twins*, *T rilo*y, and a score of other novels that have shot, like meteors, across the literary firmament, and disappeared. Or, the story may contain a picture, photographically real, of life and human interest in one generation, or in a definite locality, and, without art in the presentation, maintain a firm hold upon the hearts of readers who have experienced, even remotely, the life depicted. Such are stories of colonial adventure under conditions that have passed, traditionally, to the descendants of the first settlers; such is *David Harnt*, and, possibly, *The Bonnie Brzer Bus/z*. Not until stories of this kind have outlived the generation and the conditions of life that gave them birth, can it be seen whether art in the presentation mingles with human interest in the subject in such a manner as to secure permanence. In "*Americana* *Forgotten*," we are brought back in time through images of a forgotten past. The first known use of the term "*Americana*" is found to be dated back as far as the year 1841, but today the word seems to broadly apply to much of our culture's artifacts into the 1970s. The term could refer to anything from paintings, drawings and license plates, to entire vehicles, household objects like lamps, televisions or kitchen appliances, to public venues such as ice cream shops, diners, drive-in movies and so on. In today's society, it's easy to see that this nostalgia and wistfulness for these past time periods has led to a revitalization of many unique designs America once loved. While parts of the older generation have been collectors for many years, the younger generation has now joined in romanticizing and sometimes glamorizing these past eras, most notably "the fifties." Through the abandoned pieces, we can piece together this quietly forgotten history. I always find it so incredible when I see what can be so easily left behind by us. Excerpt from *Originality: A Popular Study of the Creative Mind* The object of the pages that follow is, first, to show the importance of a study of creative thought and to develop an interest in it; next, to offer some suggestions as to the natural history of mind in its most inspired moments; finally, to institute a regime for the individual whereby he may secure the highest mental efficiency. That the programme is ambitious I know only too well, but I desire to draw attention to the limits imposed upon my treatment of the subject. I have addressed myself to general readers of the more thoughtful type, not to psychological students, except in so far as all intelligent people are nowadays included in that category. This, whilst compelling an observance of the scientific method, has naturally demanded a practical study of the mind at work - i.e. psychology caught in the very act, not the formal science of the text-book. Such a method, however, cannot be safely pursued without the assistance of experts, and my pages bear ample witness to the fact that I have consulted their views. But it is a method that selects practical values as the criterion of worth in preference to systematic treatment on theoretical lines. Fix the Pumps is a historical account of the golden era of soda fountains including over 450 recipes that made soda America's most popular drink. Attempting to retrieve a target from memory via a retrieval cue can cause competition from the cue's associates, which might block the target. A 1994 study by Anderson, Bjork, and Bjork demonstrated retrieval-induced forgetting for competing associates and suggested that inhibitory control resolving competition causes the forgetting. A 2011 study by Storm, Angello, and Bjork found forgetting for incorrect associates following creative problem solving. This thesis investigated whether such forgetting is also the result of inhibitory control. Competition was manipulated by instructing participants to remember or forget incorrect associates before working on a Remote Associates Test problem. If problem-solving-induced forgetting is caused by inhibition, then to-be-remembered associates should suffer more forgetting than to-be-forgotten associates. Overall, forgetting occurred for incorrect associates participants were instructed to remember and forget. However, the first quartile of trials showed forgetting only for to-be-remembered associates following longer problem solving durations, suggesting a possible role of inhibitory control as an active means to overcome fixation in creative problem solving. Excerpt from Originality: A Popular Study of the Creative Mind TO know, to feel, to resolve - these are the functions of mind which appear to occupy the attention of those men and women who act as leaders of the community. Rightly construed, such functions embrace the whole of our possible existence, but, unfortunately, they are seldom construed in the right way. Invention or creation is the highest mental activity of which we are capable, and yet in education, in religion, in science, in everything, it is an activity which does not receive its due. This is owing, in part, to the immense growth of knowledge, and to the intense interest in acquiring it; a tendency is set up to live mentally by amassing information; and the more individual tendencies of the mind are gradually eclipsed. It is a 'noteworthy achievement to master the literature of education; but it is more masterly to know less about it and to be a Montessori. It is indicative of great memory power to be able to recite the poems Of John Milton but it is better to be able to indite a new poem that shall equal one of his. It is distinctive to be an oracle of reference on all matters financial or economic; but it is a finer thing to Offer an original contribution to the solution of the problems of currency. The feeling of superiority that is associated with the creative mind is not difficult to understand, and it is appreciated to the full by most people; nevertheless there appears to be no attempt worthy of the name to discover and develop the mental processes leading to originality, presumably because genius has always been regarded as a gift, needing neither training nor experience. Not long ago, Sarah Rich and Wendy MacNaughton discovered a painted manuscript at an antiquarian book fair that drew them in like magnets: it displayed a vibrant painting of hot pink beets and a hand-lettered recipe for borscht written in script so full of life, it was hard to believe it was more than sixty-five years old. It was the work of one of the most influential graphic designers of the twentieth century--Cipe (pronounced “C. P.”) Pineles, the first female art director at Condé Nast, whose impact lives on in the work of Maira Kalman, Julia Rothman, and many others. Completed in 1945, it was a keepsake of her connection to her childhood's Eastern European food--she called it Leave Me Alone with the Recipes. For Wendy and Sarah, it was a talisman of a woman they had not known was their idol: a strong, independent spirit whose rich archive--of drawings, recipes, diaries, and letters to family and friends--led them into a dazzling history of mid-century design, art, food, New York City society, and culture. They teamed up with Maria Popova of Brain Pickings and Debbie Millman of Design Matters, along with contributors Mimi Sheraton, Steven Heller, Paula Scher, and Maira Kalman, to present Cipe Pineles's life and work as it should be presented--in glorious color. With Pineles's illustrated cookbook and a section of updated recipes as its centerpiece, this gorgeous volume will delight foodies and design devotees alike. Excerpt from The Creative Christ: A Study of the Incarnation in Terms of Modern Thought John Bohlen, who died in Philadelphia on the twenty-sixth day of April, 1874, bequeathed to trustees a fund of one hundred thousand dollars, to be distributed to religious and charitable objects in accordance with the well-known wishes of the testator. By a deed of trust, executed June 2, 1875, the trustees under the will of Mr. Bohlen transferred and paid over to "The Rector, Church Wardens, and Vestrymen of the Church of Holy Trinity, Philadelphia," in trust, a sum of money for certain designated purposes, out of which fund the sum of ten thousand dollars was set apart for the endowment of The John Bohlen Lectureship, upon the following terms and conditions: - "The money shall be invested in good, substantial, and safe securities, and held in trust for a fund to be called The John Bohlen Lectureship; and the income shall be applied annually to the payment of a qualified person, whether clergyman or layman, for the delivery and publication of at least one hundred copies of two or more lecture sermons. In *The Prairie Winterscape: Creative Gardening for the Forgotten Season* experienced gardeners Barbara Kam and Nora Bryan show how to claim winter as a gardening season by exploring the different and surprising ways to create natural beauty during the "no-grow" time of year. Many prairie gardeners are unaware that their gardens can be winter wonderlands with as much visual appeal as the glorious summer landscapes they are accustomed to. For most, the first hard frosts are a sign to put the garden to bed until spring, which in some places and some years can be as many as 260 days away. That's a long time for an avid gardener to be "on hold," yearning to work the soil and smell the roses. But it needn't be so. By selecting trees and shrubs with dramatic silhouettes and colorful berries and bark, creating ornamental focal points that are enhanced by delicate rims of frost or a light blanket of snow, and leaving flower borders filled during the winter months with a collection of sturdy plants and grasses boasting interesting seed heads, prairie gardeners can redefine their favorite pastime to include the "forgotten season." It's an idea whose time has come. Why we must forget photography and reject the frame of reality it prescribes and delineates. The central paradox this book explores is that at the moment of photography's replacement by the algorithm and data flow, photographic cultures proliferate as never before. The afterlife of photography, residual as it may technically be, maintains a powerful cultural and representational hold on reality, which is important to understand in relationship to the new conditions. Forgetting photography is a strategy to reveal the redundant historicity of the photographic constellation and the cultural immobility of its epicenter. It attempts to liberate the image from these historic shackles, forged by art history and photographic theory. More important, perhaps, forgetting photography also entails rejecting the frame of reality it prescribes and delineates, and in doing so opens up other relationships between bodies, times, events, materials, memory, representation and the image. Forgetting photography attempts to develop a systematic method for revealing the limits and prescriptions of thinking with photography, which no amount of revisionism of post-photographic theory can get beyond. The world urgently needs to unthink photography and go beyond it in order to understand the present constitution of the image as well as the reality or world it shows. Forgetting photography will require a different way of organizing knowledge about the visual in culture that involves crossing different knowledges of visual culture, technologies, and mediums. It will also involve thinking differently about routine and creative labor and its knowledge practices within the institutions and organization of visual reproduction. Transformational wisdom designed for both women and men to access and enhance the inner power of the Divine • Reveals how to activate your sacred sexual self and find your soul mission • Shows how to access the wisdom of the Galactic Center • Explains why men need the Shakti Circuit to connect with the Divine Masculine Shakti is the Divine life force that ceaselessly manifests, creates, and activates. Igniting this living power within is the key for both men and women to transform themselves and attain union, harmony, and peace. The fluid intelligence of Shakti enflames, empowers, and awakens, igniting life force, joy, and organic wisdom within. Uniting the forms of Tantra Yoga found in Indian, Tibetan, and Aramaic sacred traditions, Padma Aon Prakasha reveals how to activate the power of Shakti by opening the 18 energetic pathways of the Shakti Circuit. The Circuit begins with galactic energy entering the body at the Alta Major chakra, located at the back of the head. Traveling down the pillar of the spine through the root chakra, the Circuit passes through the Seven Gates of the Womb-Grail to link the sacred sexual center and the heart center. From the heart, the energy completes the Circuit by traveling to the third eye and back to the Alta Major starting point to reveal the All-seeing eye. Centered on the womb in women and the hara in men, the Shakti Circuit links the soul, body-mind, emotions, and chakras to the power and loving wisdom of the Galactic Center. The Power of Shakti includes the insights and experiences of both men and women as they activate the power of Shakti and shows that clearing all 18 pathways of the Shakti Circuit enables us to activate our sacred sexual self and find our soul mission. Excerpt from *The Creative Experience: An Intimation of Immortality*, the Drew Lecture for 1922 Eight years ago it was my privilege to stand in this place and deliver the Drew Lecture. How much has happened since that time. We were in the first months of the Great War, and in the new strange world in which we found ourselves were feeling our way towards some stable moral foundation upon which our faith could rest. At a time so incredibly chaotic the fate of the individual seemed to matter little. Even personal immortality became for the moment a thing of secondary importance. There was a major question which claimed our attention, the question of the existence and of the government of God. Had the world cut loose from its moral moorings, or was it still - in spite of all appearances to the contrary - under divine control? Tools to awaken the creative powers of the womb • Contains exercises to open the womb's energetic pathways, release toxic emotions, and harness creative potential • Reveals how the womb's energies are crucial for the spiritual shift of 2012: birthing a new civilization • Shows how the awakened womb can also bring about male spiritual transformation In the past and in present-day indigenous traditions, women have known that the womb houses the greatest power a woman possesses: the power to create on all levels. Utilized in the process of giving birth, this power of creation can also be tapped in the birth of projects, careers, personal healing, spirituality, and relationships. However, because the womb stores the energetic imprint of every intimate encounter--loving or not--the creative voice of the womb is often muffled or absent altogether, affecting the emotional, mental, and spiritual health of women and their relationships. Drawing on sacred traditions from ancient India, Tibet, Egypt, Gnostic Christianity, and Judaism, the practice of Womb Wisdom empowers women to become aware of the intuitive voice of the womb outside of pregnancy and the moon cycle to unlock this potent inner source for creativity, birthing the new conscious children, spiritual growth, and transformation not only for themselves but also for their male partners. The authors include exercises to clear the past, release toxic emotions, open the womb's energetic pathways, activate the sacred sensual self, bring balance to relationships, and harness creative potential. Including intimate, individual stories of women experiencing the opening of the womb, this book also explores the forgotten sacred sites of the womb around the world as well as how the womb's energies are crucial to birth a new civilization in the spiritual shift of 2012. Excerpt from Creative Life: A Special Letter to Young Girls Koradine was planned with the purpose of disclosing to young girls knowledge that is usually withheld from them. The intention was that Koradine should discover her relations to life, even to the mysteries of Creative Life. As the work progressed, however, she grew into knowledge of spiritual law, which includes all other, and is most important for all to understand. Becoming convinced that this same spiritual law has a practical application to Creative Life, and that the knowledge of it will bring help and hope to many, it was written as a supplement to Koradine. Rediscover the lost ancient mystery teachings of the Cosmic Womb • Explains how each of us has a holographic blueprint of the Womb of Creation, our spiritual Womb • Offers practices to help awaken your spiritual Womb, experience the Womb of God within, and activate the Womb's sacred magic of creation and manifestation • Looks at the power of the moon and its connection to sacred Womb Consciousness • Explores how the lost Womb mystery teachings were encoded in folk and fairy tales, the legends of the Holy Grail, and the traditions of Mary Magdalene and Sophia • Includes access to three guided Womb Awakening audio journeys The Ancients lived by a feminine cosmology of creation, where everything was birthed and dissolved through a sacred universal Womb. Within each of us, whether female or male, lies a holographic blueprint of this Womb of Creation, connecting us to the Web of Life. By awakening your spiritual Womb, the holy of holies within the temple of your body, you can reconnect to the transformative energy of Womb Consciousness and reclaim your sacred powers of creation and love. Drawing on mythical and spiritual traditions from almost every culture, Dr. Azra and Seren Bertrand reconstruct the moon-based feminine mystery teachings of a lost global Womb religion, tracing the tradition all the way back to the Neanderthals and beyond. They explore how these teachings were encoded in the symbolism of folk and fairy tales; the legends of the Holy Grail; the traditions of Mary Magdalene and Sophia; the maiden, queen, and crone archetypes; and the teachings of alchemy and the chakras. They show how sages and shamans across the globe all secretly spoke of the Cosmic Womb and the sacred creative powers of Moon Blood. The authors look at the power of the Moon and its connection to sacred Womb Consciousness, offering meditations and practices to help awaken your spiritual Womb and activate its sacred magic of creation and manifestation. They explain how to activate the energetic gateways of the Womb and merge the heart and Womb to make sexual union the highest sacrament of love. Revealing how we must reconnect with the Divine Feminine to rebirth the Divine Masculine and restore balance to our world, they show how, as we reawaken the powerful ancient path of the Womb Mysteries, we help return our world to harmony with the wild, untamed creative flows and cyclical rhythms of the cosmos. From line managers, corporate CEOs, urban designers, teachers, politicians, mayors, advertisers and even our friends and family, the message is 'be creative'. Creativity is heralded as the driving force of our contemporary society; celebrated as agile, progressive and liberating. It is the spring of the knowledge economy and shapes the cities we inhabit. It even defines our politics. What could possibly be wrong with this? In this brilliant, counter intuitive blast Oli Mould demands that we rethink the story we are being sold. Behind the novelty, he shows that creativity is a barely hidden form of neoliberal appropriation. It is a regime that prioritizes individual success over collective flourishing. It refuses to recognise anything - job, place, person - that is not profitable. And it impacts on everything around us: the places where we work, the way we are managed, how we spend our leisure time. The story behind a little-known episode in the annals of modern architecture and psychology—a 1950s creativity study of the top architects of the day, including Eero Saarinen, I.M. Pei, Philip Johnson, Louis Kahn, Richard Neutra, George Nelson, and dozens more—is now published for the first time. The story of midcentury architecture in America is dominated by outsized figures who were universally acknowledged as creative geniuses. Yet virtually unheard of is this intensive 1958–59 study, conducted at the Institute of Personality Assessment and Research at the University of California, Berkeley, that scrutinized these famous architects in an effort to map their minds. Deploying an array of tests reflecting current psychological theories, the investigation sought to answer questions that still apply to creative practice today: What makes a person creative? What are the biographical conditions and personality traits necessary to actualize that potential? The study's findings have been gathered through numerous original sources, including questionnaires, aptitude tests, and interview transcripts, revealing how these great architects evaluated their own creativity and that of their peers. In *The Creative Architect*, Pierluigi Serraino charts the development, implementation, and findings of this historic study, producing the first look at a fascinating and forgotten moment in architecture, psychology, and American history. Thanks to Facebook and Instagram, our younger selves have been captured and preserved online. But what happens, Kate Eichhorn asks, when we can't leave our most embarrassing moments behind? Rather than a childhood cut short by a loss of innocence, the real crisis of the digital age may be the specter of a childhood that can never be forgotten. Excerpt from *Man a Creative First Cause: Two Discourses, Delivered at Concord, Mass., July, 1882* IN these discourses I have intended briefly to present

the leading results of previous investigations, most of which had already been published; but more especially to vindicate metaphysical science from the charge of being unfruitful, by showing that in its proper application to the subject of its investigation, it is susceptible of the highest practical utility. WILLA Literary Award Winner in Creative Nonfiction 2022 Spur Award Winner 2022 Top Pick in Southwest Books of the Year New Mexico-Arizona Book Awards Finalist in Cover Design Honorable Mention in the At-Large NFPW Communications Contest The Forgotten Botanist is the account of an extraordinary woman who, in 1870, was driven by ill health to leave the East Coast for a new life in the West--alone. At thirty-three, Sara Plummer relocated to Santa Barbara, where she taught herself botany and established the town's first library. Ten years later she married botanist John Gill Lemmon, and together the two discovered hundreds of new plant species, many of them illustrated by Sara, an accomplished artist. Although she became an acknowledged botanical expert and lecturer, Sara's considerable contributions to scientific knowledge were credited merely as "J.G. Lemmon & wife." The Forgotten Botanist chronicles Sara's remarkable life, in which she and JG found new plant species in Arizona, California, Oregon, and Mexico and traveled throughout the Southwest with such friends as John Muir and Clara Barton. Sara also found time to work as a journalist and as an activist in women's suffrage and forest conservation. The Forgotten Botanist is a timeless tale about a woman who discovered who she was by leaving everything behind. Her inspiring story is one of resilience, determination, and courage--and is as relevant to our nation today as it was in her own time.
