30 Mathematics Lessons Using the TI-15 Pamela Dase, 2009-11-21 This book is designed for grades 3-5 instruction and provides step by step mathematics lessons that incorporate the use of the TI-15 calculator throughout the learning process. The 30 lessons included present mathematics in a real world context and cover each of the five strands: number and operations, geometry, algebra, measurement and data analysis, and probability. *30 Mathematics Lessons Using the TI-15* is correlated to the Common Core State Standards and supports core concepts of STEM instruction. 256pp plus Teacher Resource CD.

Improving Instruction in Geometry and Measurement Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers. In this book, one of a three volume set, well known mathematics educators Margaret Smith, Edward A. Silver, and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction. They focus on ways to engage upper elementary, middle school, and high school students in thinking, reasoning, and problem solving to build their mathematics understanding and proficiency. The content focus of Volume One is rational numbers and proportionality. Using materials that were developed under the NSF funded COMET Cases of Mathematics to Enhance Teaching program, each volume in the set features cases from urban middle school classrooms with ethnically, racially, and linguistically diverse student populations. Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards based instruction, the teacher's perspective including their thoughts and actions as they interact with students, and with key aspects of mathematical content. Cognitively challenging mathematics activities that are built around samples of authentic classroom practice and facilitation chapters to help professional developers teach the cases, including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice. As a complete set, this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning.

Sizing Up Measurement Ann Lawrence, Charlie Hennessy, 2007 The lessons in *Sizing Up Measurement Activities for Grades 6-8 Classrooms* focus on concepts important to the middle school math curriculum including length, area, volume, ratios, and rates, similarity, and angles, and often make connections among various measurement topics. Each lesson is organized in an accessible, easy to use format that includes an overview, a list of materials, a vocabulary list, and step by step teaching directions. Students come away from these lessons with a deeper understanding of why and how to measure, and they develop the confidence required to make sense of any situation and the measurement tools involved.
