## **Disaster Recovery and Backup Solutions for IBM FileNet P8 Version 4.5.1 Systems** Jan 28 2024

Many organizations require continuous operation of their mission-critical, IBM® FileNet P8® systems after a failure has occurred. Loss of system resources and services as a result of any failure can translate directly into lost customers and lost revenue. The goal, therefore, is to design and implement a FileNet P8 system that ensures continuous operation even after a failure happens. This IBM Redbooks® publication focuses on FileNet P8 Version 4.5.1 systems disaster recovery. The book covers strategies, preparation levels, site sizing, data replication, testing, and what to do during a disaster. Backup and restore planning is a critical aspect of a disaster recovery strategy. We discuss backup types and strategies. We also discuss alternative strategies such as rolling storage policies and IBM FlashCopy® capability. With the help of use cases and our lab testing environment, the book provides guidelines for setting up a FileNet P8 production environment and a standby FileNet P8 disaster recovery system. This book is intended for IT architects, IT specialists, project managers, and decision makers, who must identify the best disaster recovery strategies and integrate them into the FileNet P8 system design process.

**Web Services Business Strategies and Architectures** Jul 30 2021 Adopting Web Services will affect many processes within any organization. To throw light on the most important issues, we have commissioned Experts in the Industry to share their insights. The resultant papers cover a broad spectrum from architecture to business strategies without diverting into deep technological fashions. Each study in the collection will answer specific business challenges thrown up by Web Service architectures. Before changing, commissioning, or evaluating a Web Service initiative, all IT Managers, System Architects, Lead Developers, and Business Visionaries should study and reference this book.

**IBM System Blue Gene Solution: Blue Gene/Q Service Node Failover using Linux High Availability** Oct 13 2022 This IBM® Redpaper™ publication explains how to configure failover for an IBM Blue Gene/Q® service node. This process includes downloading and installing software from the Linux-HA project, configuring clustering and storage, and setting up the Hardware Management Console (HMC) as a Shoot the Other Node in the Head (STONITH) device.

**SAP Hardware Solutions** Nov 13 2022 The goal of this text is to describe the technical design aspects of the IT infrastructure; it does not give the details of installing and customizing SAP software, nor business process reengineering. Using primarily HP products for the solution examples, the chapters guide the reader through the foundation of the systems from an IT perspective, reviews its business application and architecture and introduces the server systems, then describes data storage, high availability and recovery solutions, client PCs with front-end user interfaces, output management and printing solutions, network infrastructure and requirements, cabling designs, LANs and WANs, and connecting mySAP.com to the Internet. Both authors are members of the HP-SAP International Competence Center. Annotation copyrighted by Book News, Inc., Portland, OR

**Cybercrime and Society** Aug 30 2021 Extensively updated and expanded to reflect the evolving landscape of online crime, this fourth edition of Cybercrime and Society is a comprehensive and accessible introduction to this complex and fascinating topic. But just what are cybercrimes? And who are the

cybercriminals? You will learn how the internet and communication technologies present new challenges to individual and collective safety, social order and stability, economic prosperity and political liberty. From hacktivism and digital disobedience to online harassment and sexual exploitation, Cybercrime and Society is the definitive book for undergraduate and postgraduate students studying modules in cybercrime and cybersecurity. The fourth edition covers new and contemporary issues such as AI and preventative approaches to counter cybercrimes and also includes two new chapters: • Online Falsehoods provides coverage of fake news, disinformation, and conspiracies, each of which have rapidly become a major online problem with significant consequences • Illegal Goods and Illicit Markets combines discussion of issues such as the trade in prohibited goods online and via crypto-markets with discussion of piracy and copyright crime In addition to the extensive updating and expansion of the topics covered in the 2019 edition, all kinds of new developments are introduced and assessed. New case studies and examples are presented, and the international scope and coverage of the book has been further expanded, with treatment of the Canadian and Australian contexts being given greater consideration. Majid Yar is Professor Emeritus of Criminology at Lancaster University. Kevin F. Steinmetz is a Professor of Criminology at Kansas State University.

EBOOK: Services Marketing: Integrating Customer Focus Across the Firm May 20 2023 The Second European Edition of Services Marketing: Integrating Customer Focus Across the Firm by Wilson, Zeithaml, Bitner and Gremler uniquely focuses on the development of customer relationships through quality service. Reflecting the increasing importance of the service economy, Services Marketing is the only text that put the customer's experience of services at the centre of its approach. The core theories, concepts and frameworks are retained, and specifically the gaps model, a popular feature of the book. The text moves from the foundations of services marketing before introducing the gaps model and demonstrating its application to services marketing. In the second edition, the book takes on more European and International contexts to reflect the needs of courses, lecturers and students. The second edition builds on the wealth of European and International examples, cases, and research in the first edition, offering more integration of European content. It has also be fully updated with the latest research to ensure that it continues to be seen as the text covering the very latest services marketing thinking. In addition, the cases section has been thoroughly examined and revised to offer a range of new case studies with a European and global focus. The online resources have also been fully revised and updated providing an excellent package of support for lecturers and students.

**Pro Silverlight 4 in VB** May 08 2022 Silverlight is Microsoft's cross-browser technology for creating rich user experiences on the Web. Like its predecessor, Silverlight 4 rides atop the .NET framework for maximum ease of use and coding efficiency. The technology carries forward much of the work that has been done before and augments it in many important respects, including support for H.264 video, major improvements to the graphics engine (including true 3D rendering), and much richer data-binding options for interfacing with other applications. Pro Silverlight 4 in VB is an invaluable reference for professional developers who want to discover the features of Silverlight. Author Matthew MacDonald's expert advice guides you through creating rich media applications using Silverlight in the environment you're most productive in—no matter what the target platform. As you learn about the features that put Silverlight in direct competition with Adobe Flash, such as rich support for 2D and 3D drawing, animations, and media playback, you'll experience the plumbing of .NET and the design model of WPF through Silverlight—all of the same .NET technology that developers use to design next-generation Windows applications. In this book, MacDonald provides a comprehensive tutorial written from professional developer to professional developer.

**Drawdown** Apr 30 2024 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Introduction to Information Systems Nov 25 2023 The goal of Introduction to Information Systems, 3rd Canadian Edition remains the same: to teach all business majors, especially undergraduate ones, how to use information technology to master their current or future jobs and to help ensure the success of their

organization. To accomplish this goal, this text helps students to become informed users; that is, persons knowledgeable about information systems and information technology. The focus is not on merely learning the concepts of IT but rather on applying those concepts to facilitate business processes. The authors concentrate on placing information systems in the context of business, so that students will more readily grasp the concepts presented in the text. The theme of this book is What's In IT for Me? This question is asked by all students who take this course. The book will show you that IT is the backbone of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production/Operations Management. Information for the Management Information Systems (MIS) major is also included.

**Web Fetcher: A SMS Marketing Solution** Feb 14 2023 Bachelor Thesis from the year 2013 in the subject Computer Science - Software, grade: A, , language: English, abstract: Users rely on the Websites to complete many tasks online, e.g., business travel, product research and even planning an entertainment activity. Usually users need to interact with various services and software, such as browsing, search, and social networks, to access different kinds of information, to make comparisons and to have conversations with friends. The most difficult task while visiting a particular website is "to find the data or information of the interest or relevance". For example; if a website visitor wants to search phone numbers from the whole website then it need all the website pages to be well visited and well read. This requires a lot of time, effort and energy and even then there will be 70-80% chances of mistake in writing down a number correctly. Now-a-days in the era of SMS-Advertising and Marketing, all the marketing and advertising companies require a complete and cheap solution to improve their businesses. This project will provide a complete solution for their domain in searching numbers from the whole website and saving them in a text file. The system is developed in .Net Framework and is successfully tested for the test cases generated to check the effectiveness of the system. Testing is done by using the test cases designed for checking the modules of the application for unit testing.
