

RESEARCH AIM AND OBJECTIVES

RESEARCH AIM

The research aim refers to the overarching goal or purpose of a research study, stating what the researcher intends to achieve or investigate. It provides direction and focus to the research, guiding the selection of research questions, methods, and data analysis to address specific objectives and contribute to existing knowledge in the field.

RESEARCH OBJECTIVES

Research objectives are specific and measurable goals that outline what the researcher will accomplish within a study. They are derived from the research aim and serve as the building blocks for the research design, helping to define the scope, identify the variables to be studied, and guide data collection and analysis to ultimately fulfill the research aim.

Andrew J. Oswald, 2015 How should the productivity of research universities be measured This task is difficult but important The recent Research Excellence Framework in the UK which was based on peer review suggests that there has been a marked improvement in UK academic research in economics and in many other subjects But is it possible to design an objective check on and measure of a nation's world leading research Following a variant of a method developed in Oswald 2010 I examine citations data on 450 genuinely world leading journal articles over the Research Excellence Framework period 2008 2014 The UK produced 54 of these articles namely 12% This compares to 45 articles namely 10% using the same methodology over the Research Assessment Exercise period 2001 2008 I conclude that it is possible to produce an objective measure of world leading research and that UK economics did show a small improvement **Introduction to Social Research**
