Beyond Free College Oct 06 2021 Beyond Free College outlines an audacious national agenda—consistent with, but far more comprehensive than, the current “free college” movement—that builds on the best of US higher education’s populist history such as the G.I. Bill and the community college transfer function. The authors align a wide constellation of higher education trends—online learning, prior learning assessment, competency-based learning, high school college-credit— with a rapidly shifting student transfer environment that privileges college credit as the pivotal educational catalyst to boost access and completion. The book’s agenda seeks greater productive investment in postsecondary education by privileging a single metric—lower-cost-per-degree-granted—as the animating driver of a transfer pathway that will fulfill the potential of its historical, progressive innovators. Beyond Free College’s goal is as simple as it is urgent: To galvanize higher education advocates in an effort to reorganize, reorient, and reignite the transfer function to serve the needs of a neotraditional student population that now constitutes the majority of college-goers in America; and in ways that advance completion, not just access to higher education.

Written by a college admissions insider turned consultant, Soundbite guides parents and students through the admissions process from start to finish. Armed with her knowledge of how the system works, Sara Harberson shares tried-and-tested exercises that have helped thousands of students gain admission to their school of choice. In! College Admissions and Beyond: The Experts' Proven Strategy for Success Nov 18 2022 An award-winning, step-by-step guide to college admissions that helps students through every aspect of the application process and gives them a proven approach to make their application stand out from the rest. Two expert college admissions consultants—a mother-daughter team—share their step-by-step, proven strategy for creating an application that stands out and gets you IN! College admissions has never been more stressful. Not only is admission ruthlessly competitive, with more and more qualified students applying each year, but the application process has become more confusing than ever before. Most parents and students feel anxious, overwhelmed, and confused by the choices and trade-offs. In! is based on the authors’ 20+ years of experience working privately on boarding, college, and graduate school admissions with students from all over the world. While there is no shortage of college admissions guidebooks on the market, In! offers students and their parents a crucial element that none of the others do: a clear, step-by-step strategy that helps students not only compete academically with other qualified applicants but also develop a defining interest—in incremental, attainable steps—that distinguishes them from their peers and gives them an edge with college admissions officers. This strategy is summed up in a four-word phrase: “be alike but spike.” This means that the applicant must perform on par with other students applying to similar colleges, while also working to stand out from the pack—like a spike on a graph—in one area. (Ironically, it’s often the “well-rounded student,” an ideal many applicants strive for, who gets rejected.) In! shows students how to create that distinction by identifying and "layering" their passion, showcasing their interest in many different ways and circumstances. Enlivened with instructive case studies as well as entertaining New Yorker cartoons, this book carefully guides students through the application process, showing them how to rise to the top of an applicant pool of thousands. And unlike most books about “getting in,” In!’s lessons do not end at college acceptance. Rather than viewing college admissions as a hurdle to be quickly and painlessly cleared, mother-daughter team Luterman and Bloom present it as an opportunity for students to mature, expand their horizons, and discover what makes them tick. Not only does this book get you in, it gives teenagers the tools and confidence they’ll need for future success. “Be Alike”—How to optimize your GPA, standardized tests, extracurricular activities, and more. “Spike”—How to develop a unique area of distinction that makes you stand out from your peers. How to create a winning college application—including personal essays, activity chart, letters of recommendation, and more. How to choose the right college for YOU, and how to prepare to attend, and afford, your top-choice school.

Beyond College For All Feb 02 2024 In a society where everyone is supposed to go to college, the problems facing high school graduates who do not continue their education are often forgotten. Many cannot find jobs, and those who do are often stuck in low-wage, dead-end positions. Meanwhile employers complain that high school graduates lack the necessary skills for today's workplace. Beyond College for All focuses on this crisis in the American labor market. Around the world, author James E. Rosenbaum finds, employers view high school graduates as valuable workers. Why not here? Rosenbaum reports on new studies of the interaction between employers and high schools in the United States. He concludes that each fails to communicate its needs to the other, leading to a predictable array of problems for young people in the years after graduation. High schools caught up in the college-for-all myth, provide little job advice or preparation, leading students to make unrealistic plans and hampering both students who do not go to college and those who start college but do not finish. Employers say they care about academic skills, but then do not consider grades when deciding whom to hire. Faced with few incentives to achieve, many students lapse into precisely the kinds of habits employers deplore, doing as little as possible in high school and developing poor attitudes. Rosenbaum contrasts the situation in the United States with that of two other industrialized nations-Japan and Germany-which have formal systems for aiding young people who are looking for employment. Virtually all Japanese high school graduates obtain work, and in Germany, eighteen-year-olds routinely hold responsible jobs. While the American system lacks such formal linkages, Rosenbaum uncovers an encouraging hidden system that helps many high school graduates find work. He shows that some American teachers, particularly vocational teachers, create informal networks with employers to guide students into the labor market. Enterprising employers have figured out how to use these networks to meet their labor needs, while students themselves can take steps to increase their ability to land desirable jobs. Beyond College for All suggests new policies based on such practices. Rosenbaum presents a compelling case that the problems faced by American high school graduates and employers can be solved if young people, employers, and high schools build upon existing informal networks to create formal paths for students to enter the world of work. The Science of College Feb 07 2022 The transition to adulthood is a complex process, and college is pivotal to this experience. The Science of College aids entering college students--and the people who support them--in navigating college successfully, with up-to-date recommendations based upon real student situations, sound social science research, and the collective experiences of faculty, lecturers, advisors, and student support staff. The stories captured in this book highlight how the challenges that college students encounter vary in important ways based on demographics and social backgrounds. Despite these varied backgrounds, all students are more likely to have successful college experiences if they invest in their communities. Universities have many resources available, but as this book will show, students need to learn when to access which resources and how best to engage with people serving students. This includes having a better awareness of the different roles held by university faculty and staff, and navigating who to go to for what, based upon understanding their distinct sets of expertise and approaches to support. There is no single template for student success. Yet, this book highlights common issues that many students face and provides science-based advice for how to navigate college. Each topic covered is geared towards the life stage that most college students are in: emerging adulthood. In addition to the student-focused chapters, the book includes appendixes with activities for students, tips for parents, and methods information for faculty. Supplemental website materials suggest classroom activities for instructors who adopt this book within first-year seminars and general education courses. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations.

Beyond Equity at Community Colleges Sep 04 2021 This volume proposes that the work of community colleges has expanded beyond equity into providing a true barrier-free learning environment for students, one that is attuned to justice. The essays included here serve as evidence and examples of the productive ways in which educators may bring theory and practice to bear on each other, which in turn may allow community college faculty, staff, and administrators to reexamine the role of a community college as a space for justice. Topics explored with this volume include liberatory educational practices in and out of the classroom, transforming classrooms into the site of collaboration and contestation, and unique visions of how to promote opportunity for marginalized students. Ultimately, the goal of this edited volume is to explore and encourage community college educators to understand the integral role they play in bringing transformative justice to their students and their communities.

Beyond College Access Dec 08 2021 This novel resource was written for educators and educational leaders, empowering them to meet the needs of traditionally underserved students, from acceptance to commencement and beyond. If you are committed to helping all students succeed in college, this book is for you. Using a three-pillar system informed by insights and research, Dr. Sherell Wilson's high-quality, solutions-focused, professional learning guide and workbook for schools, colleges, universities, and education nonprofits provides a research-informed model to improve outcomes and success for underserved college students. Only about 60 percent of students who enroll in college earn a degree within eight years, and that rate is significantly lower for racial and ethnic minority students and low-income students. Without the same equitable resources as their academic peers, these students often find it easier to simply transfer or drop out. The solution is not more outreach or support programs. Instead, the college experience itself must be fundamentally reevaluated for an increasingly diverse student population, and reshaped to address the deeper roots of the continuing lack of success. Understanding a student's motivation to continue college enrollment requires learning the key influences on their educational decision-making. Educational leaders need a reliable method that better identifies, measures, and structures student achievement for diverse learner populations in a practical way. Dr. Wilson addresses the many challenges by using a multifaceted and comprehensive approach. As part of a solid strategy to inspire, inform, and empower educational leaders, the book addresses three main concepts called pillars: enabling successful student transitions, promoting student growth and development, and enhancing student motivation to persist. Each pillar is divided into two parts: to examine and understand (guide) and to explore and develop (workbook). It is an eminently practical and engaging book that includes a wealth of resources and activities, enhanced by students telling of their own experiences. Online bonus resources include a members-only community and more.
