Environmental Management Systems Standards Association of Australia,1996 **Guidelines for Public Debt Management -- Amended** International Monetary Fund,World Bank,2003-09-12 NULL *Procurement Engineering and Supply Chain Guidelines in Support of Operation and Maintenance of Nuclear Facilities* International Atomic Energy Agency,2016 Procurement must be effectively managed to ensure availability of design functions throughout a nuclear facility s service life Ineffective control of procurement process can jeopardize facility safety reduce reliability or can result in increased costs to operating organizations This publication provides an overview of nuclear procurement processes issues of special concern and provides guidance for good practices to set up and manage a high quality procurement organization Lessons learned for organizations considering new build nuclear projects are also included Guidelines for Human Settlement Planning and Design ,2000 **CIS Abstracts** International Occupational Safety and Health Information Centre,1981 **Management of Nuclear Power Plant Projects** IAEA,2020-11-25 Member States intending to introduce a nuclear power programme will need to pass through several phases during the implementation Experience shows that careful planning of the objectives roles responsibilities interfaces and tasks to be carried out in different phases of a nuclear project is important for success This publication presents a harmonized approach that may be used to structure the owner operator management system and establish and manage nuclear projects and their development activities irrespective of the adopted approach It has been developed from shared management practices and consolidated experiences provided by nuclear project management specialists through a series of workshops and working groups organized by the IAEA The resultant publication presents a useful framework for the management of nuclear projects from initiation to closeout and captures international best practices **Handbook for Evaluating Infrastructure Regulatory Systems** Ashley C. Brown,Jon Stern,Bernard William Tenenbaum,Defne Gencer,2006-01-01 More than 200 new infrastructure regulators have been created around the world in the last 15 years They were established to encourage clear and sustainable long term economic and legal commitments by governments and investors to encourage new investment to benefit existing and new customers There is now considerable evidence that both investors and consumers the two groups that were supposed to have benefited from these new regulatory systems have often been disappointed with their performance The fundamental premise of this book is that regulatory systems can be successfully reformed only if there are independent objective and public evaluations of their performance Just as one goes to a medical doctor for a regular health checkup it is clear that infrastructure regulation would also benefit from periodic checkups This book provides a general framework as well as detailed practical guidance on how to perform such regulatory checkups Insurgencies: Essays in Planning Theory John Friedmann,2011-01-10 This collection of Friedmann s most important and influential essays tells a coherent and compelling

story about how the evolution of thinking about planning over several decades has helped to shape its practice An ideal text for the study of planning theory and history each of the chapters is introduced by a brief essay to establish its context and importance and is followed by a series of study questions to help focus classroom discussions as well as suggested readings

Public Procurement of Energy Efficiency Services Jas Singh, Dilip R. Limaye, Brian Henderson, Xiaoyu Shi, 2009-12-17 The current universal concerns about global energy security competitiveness and environmental protection make energy efficiency more important than ever However realizing large scale savings has proven a significant challenge due to many barriers Public Procurement of Energy Efficiency Services looks at a largely untapped energy efficiency market the public sector While the efficiency potential in this sector is substantial the implementation of energy savings programs has been complicated by a number of factors such as insufficient incentives to lower energy costs rigid budgeting and procurement procedures and limited access to financing The book looks at energy savings performance contracts ESPCs as a means of overcoming some of these barriers Because public facilities can outsource the full project cycle to a commercial service provider ESPCs can enable public agencies to solicit technical solutions mobilize commercial financing and assign performance risk to third parties allowing the agency to pay from a project's actual energy savings The recommendations in this book stem from case studies that identified approaches models and specific solutions to ESPC procurement including budgeting energy audits and bid evaluation Such an approach also offers enormous potential to bundle finance and implement energy efficiency projects on a larger scale in the public sector which can yield further economies of scale ESPCs can also serve as an attractive element for fiscal stimulus packages and efforts by governments to green their infrastructure which can create local jobs reduce future operating costs and mitigate their carbon footprint Lower energy bills in turn help to create fiscal space in future years to meet other critical investment priorities Bundled public sector energy efficiency projects can help stimulate local markets for energy efficiency goods and services and lead by example demonstrating good practices and providing models to the private sector
