Managing Agricultural Greenhouse Gases May 25 2023 Global climate change is a natural process that currently appears to be strongly influenced by human activities, which increase atmospheric concentrations of greenhouse gases (GHG). Agriculture contributes about 20% of the world's global radiation forcing from carbon dioxide, methane and nitrous oxide, and produces 50% of the methane and 70% of the nitrous oxide of the human-induced emission. Managing Agricultural Greenhouse Gases synthesizes the wealth of information generated from the GRACEnet (Greenhouse gas Reduction through Agricultural Carbon Enhancement network) effort with contributors from a variety of backgrounds, and reports findings with important international applications. Frames responses to challenges associated with climate change within the geographical domain of the U.S., while providing a useful model for researchers in the many parts of the world that possess similar ecoregions Covers not only soil C dynamics but also nitrous oxide and methane flux, filling a void in the existing literature Educates scientists and technical service providers conducting greenhouse gas research, industry, and regulators in their agricultural research by addressing the issues of GHG emissions and ways to reduce these emissions Synthesizes the data from top experts in the world into clear recommendations and expectations for improvements in the agricultural management of global warming potential as an aggregate of GHG emissions

Event Management and Sustainability Mar 23 2023 Sustainable management is an important consideration for businesses and organisations, and the enormous number of tourism events taking place requiring facilities, power, transport, people and much more makes sustainable event planning a considerable priority. By looking at mega events, sports events, conferences and festivals, this book uses best practice case studies to illustrate sustainable management issues and practical considerations that managers need to apply, providing an essential reference for researchers and students in leisure and tourism.

Guinea-Bissau: 2006 Article IV Consultation Review of Developments Under the 2005 Staff-Monitored Program and New Staff-Monitored Program for 2006 Staff Report; Public Information Notice on the Executive Board Discussion; and Statement by the Executive Director for Guinea-Bissau Jun 25 2023 Despite abundant natural resources and arable land, Guinea-Bissau is ranked at the lowest end of the UN human development index, mainly because of the civil war of 1998–99 and the ensuing prolonged political instability and serious governance deficiencies thereafter. Since mid-2004, Guinea-Bissau has made a major effort to address the political and economic problems of recent years. The fiscal balance improved, but cash flow problems persisted throughout 2005. Higher imports and strengthened tax and customs administration helped buoy tax revenue.

Anesthesia Outside the Operating Room Oct 30 2023 Anesthesia Outside of the Operating Room is a comprehensive, up-to-date textbook that covers all aspects of anesthesia care in OOR settings, from financial considerations to anesthetic techniques to quality assurance. With increasing numbers of procedures such as cardiac catheterization and imaging taking place outside of the main OR, anesthesia providers as well as non-anesthesia members of the patient care team will find this book critical to their understanding of the principles of anesthesia care in unique settings which may have limited physical resources. The book includes chapters on patient monitoring techniques, pre-procedure evaluation and post-procedure care, and procedural sedation performed by non-anesthesia providers. Its authors address problems of anesthesia that have unique answers in OOR settings, such as patient transport and cardiac arrest, and discuss technological progress and considerations for the future. The text also covers surgical procedures and anesthetic considerations by procedure location, such as radiology, infertility clinics, field and military environments, and pediatric settings, among many others Select guidelines from the American Society of

Anesthesiologists (ASA) are provided as well. Edited by the senior faculty from Harvard Medical School and with contributions from other academic institutions, Anesthesia Outside of the Operating Room provides a unique and convenient compendium of expertise and experience.

Wood preservation with chemicals Sep 04 2021 The Nordic Council of Ministers, the BAT Group under the Working Group for Sustainable Consumption and Production, has requested the consultant to prepare a report on Best Available Techniques (BAT) in wood preservation with chemicals in the Nordic countries. The Nordic wood preserving industry produces around 2.1 million m³ of impregnated wood per year, which is about one third of the total supply of pressure-treated wood in Europe. This report describes the present status of the used technologies, their emissions and impacts on the environment and technologies that can be considered BAT. The report will also be used as an input from the Nordic countries to the EU process under the Industrial Emissions Directive (IED) for preparation of the BAT Reference Document for preservation of wood and wood products with chemicals (WPC BREF) which is foreseen to start in 2014.

Trauma- and Stressor-Related Disorders Jun 01 2021 Both academically rigorous and clinically practical, Trauma- and Stressor-Related Disorders is fully informed by the new DSM-5 category that includes adjustment disorders, acute stress disorder, and posttraumatic stress disorder. Stress and trauma have long been recognized as playing a role in the etiology of certain psychiatric disorders, and this book delineates normal and pathological responses to stress, providing a conceptual framework for understanding trauma- and stressor-related disorders. An individual's response to stress depends on numerous genetic, developmental, cognitive, psychological, and neurobiological risk and protective factors, and these are examined from both a scientific and clinical perspective. Central to the book's utility is its presentation of clinical vignettes that help the reader to contextualize the information presented and model effective clinical skills. Among the volume's critically important topics and features are A robust section on assessing the psychosocial factors associated with resilience (e.g., optimism, cognitive flexibility, a social support network), encouraging and enhancing these factors, and implementing psychosocial interventions to aid patients who have experienced trauma to promote resilience by targeting these factors. A comprehensive chapter on the medical-legal aspects of trauma- and stressor-related disorders because clinicians working with these patients frequently encounter situations that have legal implications (e.g., capacity evaluations, informed consent, confidentiality, serving as a witness in court proceedings). Full coverage of controversies unique to this group of disorders. For example, because no other set of DSM-5 diagnoses require a stressor as an etiological agent, this dimension can add considerable controversy to these diagnoses. Comprehensive overview of the development of the stress and trauma disorders chapter of the upcoming revision of the International Classification of Diseases (ICD-11, expected for 2017), including crosswalk tables to compare ICD-10, DSM-5, and the planned ICD-11 and featuring a summary of the evidence base for specific treatments for ICD-10 or ICD-11 stress and trauma disorder categories. In addition, key points, informative Web sites, and recommended reading at the end of each chapter are designed to consolidate and extend the practitioner's knowledge base. Trauma- and Stressor-Related Disorders provides readers with the latest research and treatment recommendations in an expertly edited, easy-to-use format that will earn its place in the clinician's library.

Handbook of Research on E-Learning Standards and Interoperability: Frameworks and Issues Jan 09 2022 Handbook of Research on E-Learning Standards and Interoperability: Frameworks and Issues promotes the discussion of specific solutions for increasing the interoperability of standalone and Web-based educational tools. This book investigates issues arising from the deployment of learning standards and provides relevant theoretical frameworks and leading empirical research findings. Chapters presented in this work are suitable for practitioners and researchers in the area of educational technology with a focus on content reusability and interoperability.

EU-Russia Energy Relations Feb 07 2022 Public debate about energy relations between the EU and Russia is distorted. These distortions present considerable obstacles to the development of true partnership. At the core of the conflict is a struggle for resource rents between energy producing, energy consuming and transit countries. Supposed secondary aspects, however, are also of great importance. They comprise of

geopolitics, market access, economic development and state sovereignty. The European Union, having engaged in energy market liberalisation, faces a widening gap between declining domestic resources and continuously growing energy demand. Diverse interests inside the EU prevent the definition of a coherent and respected energy policy. Russia, for its part, is no longer willing to subsidise its neighbouring economies by cheap energy exports. The Russian government engages in assertive policies pursuing Russian interests. In so far, it opts for a different globalisation approach, refusing the role of mere energy exporter. In view of the intensifying struggle for global resources, Russia, with its large energy potential, appears to be a very favourable option for European energy supplies, if not the best one. However, several outcomes of the strategic game between the two partners can be imagined. Engaging in non-cooperative strategies will in the end leave all stakeholders worse-off. The European Union should therefore concentrate on securing its partnership with Russia instead of damaging it. Stable cooperation would need the acceptance that the partner may pursue his own goals, which might be different from one's own interests. The question is, how can a sustainable compromise be found? This thesis finds that a mix of continued dialogue, a tit for tat approach bolstered by an international institutional framework and increased integration efforts appears as a preferable solution.

New Financial Strategies for Sustainable Buildings Aug 28 2023 Built environment professionals considering whether to embark on the design and construction or retrofit of a fully 'sustainable' or 'green' build need to know the financial implications of their decisions. What are their financial options? What are the risks? This book offers practical guidance on how sustainable building projects are financed, designed and built. All too often sustainable building is undertaken without proper consideration of the true lifecycle cost, risk and financial impact. This book will take the reader on a journey from initial sustainable design through to final completion highlighting the finance options available to them. *New Financial Strategies for Sustainable Buildings* provides key guidance to a variety of professionals, including architects, designers, contractors, construction managers, investors and other interested parties, whilst providing a useful reference to students on architecture, construction management and real estate/surveying courses who need to know about finance, construction economics, and sustainable development projects.

Coherency Management Apr 11 2022 The book introduces the idea of Coherency Management, and asserts that this is the primary outcome goal of an enterprise's architecture. With submissions from over 30 authors and co-authors, the book reinforces the idea that EA is being practiced in an ever-increasing variety of circumstances - from the tactical to the strategic, from the technical to the political, and with governance that ranges from sell to tell. The characteristics, usages, value statements, frameworks, rules, tools and countless other attributes of EA seem to be anything but orderly, definable, classifiable, and understandable as might be hoped given heritage of EA and the famous framework and seminal article on the subject by John Zachman over two decades ago. Notably, EA is viewed as an Enterprise Design and Management approach, adopted to build better enterprises, rather than a IT Design and Management approach limited to build better systems.

The Financial Crisis of 2008 Aug 16 2022 Supported by ten years of research, Wigmore has gathered extensive data covering the 2008 financial crisis and subsequent recovery to provide the first comprehensive history of the period. Financial crises cannot occur unless institutional investors finance the bubbles that created them. Wigmore follows the trail of data putting pressure on institutional investors to achieve higher levels of returns that led to over-leverage throughout the financial system and placed such a burden on recovery. Here is a 'very good picture - and painful reminder - of the crisis' evolution across multiple asset classes, structures, participants, and geographies.' This work serves as a critical analysis of modern portfolio management and an important reference work for financial professionals, academics, investors, and students.
