**The Art of Perfumery** G. W. Septimus Piesse, 2018-06-26 The Art of Perfumery And Methods of Obtaining the Odors of Plants by G W Septimus Piesse s Among the nations of antiquity an offering of perfumes was regarded as a token of the most profound respect and homage Incense or Frankincense which exudes by incision and dries as a gum from *\_Arbor thurifera\_* was formerly burnt in the temples of all religions in honor of the divinities that were there adored Many of the primitive Christians were put to death because they would not offer incense to idols Of the use of these luxuries by the Greeks and afterwards by the Romans Pliny and Seneca gives much information respecting perfume drugs the method of collecting them and the prices at which they sold Oils and powder perfumery were most lavishly used for even three times a day did some of the luxurious people anoint and scent themselves carrying their precious perfumes with them to the baths in costly and elegant boxes called NARTHECIA In the Romish Church incense is used in many ceremonies and particularly at the solemn funerals of the hierarchy and o We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

*Poucher's Perfumes, Cosmetics and Soaps* H. Butler, 2013-06-29 Poucher's *Perfumes Cosmetics and Soaps* has been in print since 1923 and is the classic reference work in the field of cosmetics. Now in a fully updated 10th edition, this new volume provides a firm basic knowledge in the science of cosmetics including toiletries as well as incorporating the latest trends in scientific applications and legislation which have occurred since the 9th edition. This edition will not only be an excellent reference book for students entering the industry but also for those in specialized research companies, universities, and other associated institutions who will be able to gain an overall picture of the modern cosmetic science and industry. The book has been logically ordered into four distinct parts. The historical overview of Part 1 contains an essay demonstrating William Arthur Poucher's influence on the 20th Century cosmetics industry as well as a chapter detailing the long history of cosmetics. Part 2 is a comprehensive listing of the properties and uses of common cosmetic types ranging from Antiperspirants through to Sunscreen preparations. There are an increased number of raw materials in use today and their chemical, physical, and safety benefits are carefully discussed along with formulation examples. The many additions since the last edition demonstrate the dramatic recent expansion in the industry and how changes in legal regulations affecting the development, production, and marketing of old established and new products are operative almost worldwide. Information on specialist products for babies and others is included within individual chapters. The chapters in Part 3 support and outline the current guidelines regarding the assessment and control of safety and stability. This information is presented chemically, physically, and microbiologically. Part 3 chapters also detail requirements for the consumer acceptability of both existing and new products. Those legal regulations now in force in the EU, the USA, and Japan are carefully described in a separate chapter, and the remaining chapters have been extensively updated to explain the technical and practical operations needed to comply with regulations when marketing. This information will be invaluable to European Union and North American companies when preparing legally required product information dossiers. The final chapters in Part 4 contain useful information on the psychology of perfumery as well as detailing methods for the conduct of assessment trials of new products. As ingredient labelling is now an almost universal legal requirement, the International Nomenclature of Cosmetics Ingredients (INCI) for raw materials has been used wherever practicable. The advertised volume is the 10th edition of what was previously known as volume 3 of Poucher's *Cosmetics and Soaps*. Due to changes in the industry, there are no plans to bring out new editions of volume 1 and 2.

Leung's Encyclopedia of Common Natural Ingredients Ikhlas A. Khan, Ehab A. Abourashed, 2011-09-21 The third edition of the unparalleled reference on natural ingredients and their commercial use This new Third Edition of Leung's Encyclopedia of Common Natural Ingredients Used in Food, Drugs and Cosmetics arrives in the wake of the huge wave of interest in dietary supplements and herbal medicine resulting from both trends in health and the Dietary Supplement and Health Education Act of 1994 (DSHEA). This fully updated and revised text includes the most recent research findings on a wide variety of ingredients, giving readers a single source for understanding and working with natural ingredients. The Encyclopedia continues the successful format for entries listed in earlier editions, consisting of source, description, chemical composition, pharmacology, uses, commercial preparations, regulatory status, and references. The text also features an easily accessible alphabetical presentation of the entries according to common names, with the index cross-referencing entries according to scientific names. This Third Edition also features more than 50 percent more information than the Second Edition, reflecting the greatly increased research activity in recent years. A new section on traditional Indian medicine with information on nine commonly used herbs. More than 6,500 references. Two new appendices explaining and illustrating the botanical terminology frequently encountered in the text. A revised and expanded index. Leung's Encyclopedia of Common Natural Ingredients Used in Food, Drugs and Cosmetics, Third Edition will continue to provide a comprehensive compilation of the existing literature and prominent findings on natural ingredients to readers with an interest in medicine, nutrition, and cosmetics.
