Why and how Boston was transformed by landmaking. Fully one-sixth of Boston is built on made land. Although other waterfront cities also have substantial areas that are built on fill, Boston probably has more than any city in North America. In *Gaining Ground* historian Nancy Seasholes has given us the first complete account of when, why, and how this land was created. The story of landmaking in Boston is presented geographically; each chapter traces landmaking in a different part of the city from its first permanent settlement to the present. Seasholes introduces findings from recent archaeological investigations in Boston, and relates landmaking to the major historical developments that shaped it. At the beginning of the nineteenth century, landmaking in Boston was spurred by the rapid growth that resulted from the burgeoning China trade. The influx of Irish immigrants in the mid-nineteenth century prompted several large projects to create residential land—not for the Irish, but to keep the taxpaying Yankees from fleeing to the suburbs. Many landmaking projects were undertaken to cover tidal flats that had been polluted by raw sewage discharged directly onto them, removing the "pestilential exhalations" thought to cause illness. Land was also added for port developments, public parks, and transportation facilities, including the largest landmaking project of all, the airport. A separate chapter discusses the technology of landmaking in Boston, explaining the basic method used to make land and the changes in its various components over time. The book is copiously illustrated with maps that show the original shoreline in relation to today's streets, details from historical maps that trace the progress of landmaking, and historical drawings and photographs. Despite popular belief, Native peoples did not simply disappear from colonial New England as the English extended their domination in the seventeenth and eighteenth centuries. Rather, the Native peoples in such places as Natick, Massachusetts, creatively resisted colonialism, defended their lands, and rebuilt kin networks and community through the strategic use of English cultural practices and institutions. So why did New England

settlers believe that the Native peoples had vanished? In this thoroughly researched and astutely argued study, historian Jean M. O'Brien reveals that, in the late eighteenth century, the Natick tribe experienced a process of "dispossession by degrees," which rendered them invisible within the larger context of the colonial social order, thus enabling the construction of the myth of Indian extinction. *Occupying Massachusetts: Layers of History on Indigenous Land* is an art book that engages with history. Featuring photographs of dwellings and vernacular structures found in rural Massachusetts, the book is a meditation on the human occupation of land, with an emphasis on the long presence of Indigenous people and the waves of settlement by people from other countries that began during the early 1600s and continues today. Utilizing a muted color palette, Matthews's photographs of both structures and historical markers are subtle and haunting. They suggest the presence of histories, embedded in the landscape but often invisible. Although the book is focused on Massachusetts, it implicitly raises larger issues of settlement and nationhood. How did the United States of America come to occupy its land? How is this story told? As a longtime occupant/occupier of Massachusetts herself, Matthews aims to understand more deeply the land on which she lives. The main text of the book comes from photographs of historic markers, which were installed around the state at different times by different interest groups. The words on these markers describe early relations between Indigenous people and largely English settlers, from diverse points of view. In this way, the book explores how difficult histories are written and how they change over time. Concluding essays by Indigenous activist David Brule and poet Suzanne Gardinier provide important perspectives as well, connecting the past and future. *Occupying Massachusetts* is a moving story whose message will be appreciated for years to come. "... this text will serve as both a foundation for preparation for the salesperson and broker licensing exams and a reliable reference for all practitioners involved in real estate practice in Massachusetts."--P. [4] of cover. A groundbreaking study in colonial history, this book gives a remarkably detailed picture of life in an early American community. It focuses on three basic and interrelated subjects largely neglected by historians—population, land, and the family—as they affected the lives of four successive generations. Applying demographic methods to historical research, Professor Greven presents new and unexpected evidence about the most basic aspects of family life in colonial America, and shows how these characteristics changed in the seventeenth and eighteenth centuries. "General observations on the nature of laws in general & those of the United States in particular," & a "dissertation on the principles of the common law."

Excerpt from The Land Registration Act of Massachusetts-Its Practical Working, Operation and Effect: Remarks Made at the Thirty-First Annual Meeting of the New York State Bar Association Held at the City of New York on the 24th and 25th of January, 1908 For ten years the subject Of land transfer reform was a subject of agitation at our bar, among real estate owners and dealers and in the Legislature. \ve had a land transfer reform association. It had learned gen tlemen who went into all the details Of the different systems existing in different parts of the world, and who proceeded to make a very elaborate investigation of the whole matter. We had three different legislative commissions appointed to draft some sort of act, and some of the measures suggested by them were very radical. When the last commission finally reported an act, however, it proved to be one that did not effect an immediate and sweeping change in our general and customary methods of holding and dealing with land.
