Description, operating instructions and equipment for the B-29 Superfortress. Contents: Description; Normal Operating Instructions; Flight Operating

Data; Emergency Operating Instructions; Operational Equipment; Extreme Weather Operation; Supplementary Flight Operation. Designed by Lockheed's legendary engineer Clarence "Kelly" Johnson, the F-80 (first designated P-80) "Shooting Star" was one of the world's first operational jet fighter aircraft. After it missed seeing combat in WWII - four prototype aircraft were in Europe at war's end - the plane drew first blood in Korea in 1950. Variants included a photo recon version and the two-seat T-33, both of which saw heavy service in air forces around the world. Originally printed by Lockheed and the United States Air Force in the 1950s, this F-80 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified "Restricted," the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.

An extremely successful design, over 9500 Lightnings were built by V-J Day in 1945. Originally classified "Restricted", this manual was declassified long ago and is here reprinted in book form. This information was modeled using solar radiation and meteorological data gathered from 1961 to 1990 and will permit quick evaluations of passive solar and daylighting features for buildings. Gives clear explanations of the logical design sequence for structural elements. The Structural Engineer says: `The book explains, in simple terms, and with many examples, Code of Practice methods for sizing structural sections in timber, concrete, masonry and steel. It is the combination into one book of section sizing methods in each of these materials that makes this text so useful....Students will find this an essential support text to the Codes of Practice in their study of element sizing'.
