The special interest in electronics all over the world is due to its decisive role in the scientific and technical progress now taking place in all fields of modern technology. Electronics also plays a decisive role in the development of science, providing as it does the technical basis for various scientific experiments. The role of electronics in the development of the world's culture also deserves a special mention. That is why it is hoped that the English-German French-Dutch-Russian Dictionary of Electronics, which contains some 9.000 entries and is jointly published by Kluwer Technische Boeken, B.V. (Deventer, Holland) and Ruski Yazyk Publishers (Moscow, USSR) will be favourably received. In accordance with existing international tradition, the term «electronics» covers several fields known in Soviet classification as electronics proper, radio engineering, and wire communication. The entries included in this dictionary have been selected in accordance with the international understanding of the term «electronics». One of the main difficulties encountered by the compilers was that although according to some calculations the number of terms used in special literature on electronics exceeds 50.000, the vocabulary of the dictionary had to be restricted to only 9.000 entries. Therefore this dictionary cannot claim to be comprehensive. Its purpose is to enable a wide range of specialists in various countries to find the English, German, French, Dutch, or Russian equivalents of the principal and most up-to-date terms in the field of electronics. Most attention has been paid to quantum electronics, fibre optics, optoelectronics, integrated circuit technology, radiolocation and radionavigation, pulse technique, holography, etc. From diving in the Virgin Islands to Trinidad's Carnival celebrations, The Rough Guide to the Caribbean explores all the best to see and do in this exotic region. And yet, when motherhood looms, Knot begins to learn that her freedom has come at a high price. Low on money, ostracized from her parents and cut off from her hometown, Knot turns to her neighbor, Otis Lee Loving, in search of some semblance of family and home. Otis Lee is eager to help. A lifelong fixer, Otis Lee is determined to steer his friends and family away from decisions that will cause them heartache and ridicule. After his failed attempt to help his older sister, who lives a precarious life in the North, Otis Lee discovers a possible path to redemption in the chaos Knot brings to his doorstep. But while he's busy trying to fix Knot's life, Otis Lee finds himself powerless to repair the many troubles within his own family, as the long-buried secrets of his troubled past begin to come to light. Spanning decades in a rural North Carolina town where a canal acts as the color line, In West Mills is a magnificent, big-hearted small-town story about family, friendship, storytelling, and the redemptive power of love. This volume consists of six articles, each treating an important topic in the theory of the Navier-Stokes equations, at the research level. Some of the articles are mainly expository, putting together, in a unified setting, the results of recent research papers and conference lectures. Several other articles are devoted mainly to new results, but present them within a wider context and with a fuller exposition than is usual for journals. The plan to publish these articles as a book began with the lecture notes for the short courses of G.P. Galdi and R. Rannacher, given at the beginning of the International Workshop on Theoretical and Numerical Fluid Dynamics, held in Vancouver, Canada, July 27 to August 2, 1996. A renewed energy for this project came with the founding of the Journal of Mathematical Fluid Mechanics, by G.P. Galdi, J. Heywood, and R. Rannacher, in 1998. At that time it was decided that this volume should be published in association with the journal, and expanded to include articles by J. Heywood and W. Nagata, J. Heywood and M. Padula, and P. Gervasio, A. Quarteroni and F. Saleri. The original lecture notes were also revised and updated. Adopted by Rowan/Salisbury Schools.
