**Repair** Feb 27 2024 A compelling case for reparations based on powerful, first-person accounts detailing both the horrors of slavery and past promises made to its survivors. Katherine Franke makes a powerful case for reparations for Black Americans by amplifying the stories of formerly enslaved people and calling for repair of the damage caused by the legacy of American slavery. Repair invites readers to explore the historical context for reparations, offering a detailed account of the circumstances that surrounded the emancipation of enslaved Black people in two unique contexts, the Sea Islands of South Carolina and Davis Bend, Mississippi, Jefferson Davis's former plantation. Through these two critical historical examples, Franke unpacks intergenerational, systemic racism and white privilege at the heart of American society and argues that reparations for slavery are necessary, overdue and possible. Praise for Repair "Essential . . . Franke engages the original debates concerning the conditions upon which newly freed Black people would rebuild their lives after slavery. Franke powerfully illustrates the repercussions of the unfilled promise of land redistribution and other broken promises that consigned African Americans to another one hundred years of

second-class citizenship. Franke passionately argues that the continuation of those vast disparities between Black and white people in U.S. society—a product of slavery itself—means that the struggle for reparations remains a relevant demand in the current movements for racial justice." —Keeanga-Yamahtta Taylor, author of *From #BlackLivesMatter to Black Liberation* "Repair revisits the revolutionary era of Reconstruction . . . when the redistribution of land and wealth as recompense for unrequited toil could have secured genuine freedom for Black people rather than a future of racial inequality, exploitation, marginalization, and precarity . . . Franke makes a persuasive case for reparations as at least a first step toward creating the conditions for genuine freedom and justice, not only for African Americans but for all of us." —Robin D. G. Kelley, author of *Freedom Dreams: The Black Radical Imagination* "Katherine Franke argues for a type of Black freedom that is material and felt—freedom that is more than a poetic nod to claims of American moral comeuppance. Repair . . . is a critical text for our times that demands an honest reckoning with the consequences, and afterlife, of the sin that was chattel enslavement. It is bold call for reparations and

costly atonement." —Darnell L. Moore, author of *No Ashes in the Fire: Coming of Age Black & Free in America* "Katherine Franke is consistently one of the sharpest, most conscientious thinkers in progressive politics. In a time defined by crisis and conflict, Katherine is among that small number of thinkers whom I find indispensable." —Jelani Cobb, *New Yorker* columnist and author of *The Substance of Hope*

Fixer-Upper May 20 2023 Practical ideas to provide affordable housing to more Americans Much ink has been spilled in recent years talking about political divides and inequality in the United States. But these discussions too often miss one of the most important factors in

the divisions among Americans: the fundamentally unequal nature of the nation's housing systems. Financially well-off Americans can afford comfortable, stable homes in desirable communities. Millions of other Americans cannot. And this divide deepens other inequalities. Increasingly, important life outcomes—performance in school, employment, even life expectancy—are determined by where people live and the quality of homes they live in. Unequal housing systems didn't just emerge from natural economic and social forces. Public policies enacted by federal, state, and local governments helped create and reinforce the bad housing outcomes endured by too many people. Taxes, zoning, institutional discrimination, and the location and quality of schools, roads, public transit, and other public services are among the policies that created inequalities in the nation's housing patterns. *Fixer-Upper* is the first book assessing how the broad set of local, state, and national housing policies affect people and communities. It does more than describe how yesterday's policies led to today's problems. It proposes practical policy changes than can make stable, decent-quality housing more available and affordable for all Americans in all communities. Fixing systemic problems that arose over decades won't be easy, in large part because millions of middle-class Americans benefit from the current system and feel threatened by potential changes. But *Fixer-Upper* suggests ideas for building political coalitions among diverse

groups that share common interests in putting better housing within reach for more Americans, building a more equitable and healthy country.

*On Repentance And Repair* Nov 13 2022  
Winner NATIONAL JEWISH BOOK AWARDS in Contemporary Jewish Life & Practice Myra H. Kraft Memorial Award A crucial new lens on repentance, atonement, forgiveness, and repair from harm—from personal transgressions to our culture's most painful and unresolved issues American culture focuses on letting go of grudges and redemption narratives instead of the perpetrator's obligations or recompense for harmed parties. As survivor communities have pointed out, these emphases have too often only caused more harm. But Danya Ruttenberg knew there was a better model, rooted in the work of the medieval philosopher Maimonides. For Maimonides, upon whose work Ruttenberg elaborates, forgiveness is much less important than the repair work to which the person who caused harm is obligated. The word traditionally translated as repentance really means something more like return, and in this book, returning is a restoration, as much as is possible, to the victim, and, for the perpetrator of harm, a coming back, in humility and intentionality, to behaving as the person we might like to believe we are. Maimonides laid out 5 steps: naming and owning harm; starting to change/transformation; restitution and accepting consequences; apology; and making different choices. Applying this lens to both our personal relationships and some of the most significant and painful issues of our day,

including systemic racism and the legacy of enslavement, sexual violence and harassment in the wake of #MeToo, and Native American land rights, *On Repentance and Repair* helps us envision a way forward. Rooted in traditional Jewish concepts while doggedly accessible and available to people from any, or no, religious background, *On Repentance and Repair* is a book for anyone who cares about creating a country and culture that is more whole than the one in which we live, and for anyone who has been hurt or who is struggling to take responsibility for their mistakes.

*Repair, Brokenness, Breakthrough* Jul 22 2023 Exploring some of the ways in which repair practices and perceptions of brokenness vary culturally, *Repair, Brokenness, Breakthrough* argues that repair is both a process and also a consequence which is sought out—an attempt to extend the life of things as well as an answer to failures, gaps, wrongdoings, and leftovers. This volume develops an open-ended combination of empirical and theoretical questions including: What does it mean to claim that something is broken? At what point is something broken repairable? What are the social relationships that take place around repair? And how much tolerance for failure do our societies have?

### *Laparoscopic Ventral Hernia Repair* Jan 04

2022 Primary and incisional ventral hernias are common conditions often encountered in surgical practice. Because of the frequency of this problem it has come to be managed by surgeons in general, regardless of the type of hospital or the conditions dealt with in their daily practice. Laparoscopic surgery has demonstrated to have an important role among the different technique described to repair

ventral hernia with less recurrent rate, less morbidity and less overall cost than open conventional repair, with all the advantage of the laparoscopic approach. As a result the indications for this surgical technique are currently being debated since the advantages are evident and progressive implementation is ensured. Now is the time to analyze the usefulness, results, technical variants, anatomic, physiologic and scientific basis and implications involved in implementation of laparoscopy as the technique of choice.

### **Between Remembrance and Repair** Oct 13

2022 Few places are more notorious for civil rights-era violence than Philadelphia, Mississippi, the site of the 1964 "Mississippi Burning" murders. Yet in a striking turn of events, Philadelphia has become a beacon in Mississippi's racial reckoning in the decades since. Claire Whitlinger investigates how this community came to acknowledge its past, offering significant insight into the social impacts of commemoration. Examining two commemorations around key anniversaries of the murders held in 1989 and 2004, Whitlinger shows the differences in how those events unfolded. She also charts how the 2004 commemoration offered a springboard for the trial of former Klan leader Edgar Ray Killen for his role in the 1964 murders, the 2006 passage of Mississippi's Civil Rights/Human Rights education bill, and the initiation of the Mississippi Truth Project. In doing so, Whitlinger provides the first comprehensive

account of these high profile events and expands our understanding of how commemorations both emerge out of and catalyze associated memory movements. Threading a compelling story with theoretical insights, Whitlinger delivers a study that will help scholars, students, and activists alike better understand the dynamics of commemorating difficult pasts, commemorative practices in general, and the links between memory, race, and social change.

Concrete Repair, Rehabilitation and Retrofitting IV Jul 30 2021 The Fourth International Conference on Concrete Repair, Rehabilitation and Retrofitting (ICCRRR 2015) was held 5-7 October 2015 in Leipzig, Germany. This conference is a collaborative venture by researchers from the South African Research Programme in Concrete Materials (based at the Universities of Cape Town and The Witwatersrand) and the Material Science Group at Leipzig University and The Leipzig Institute for Materials Research and Testing (MFPA) in Germany. ICCRRR 2015 continues to seek and to extend a sound base of theory and practice in repair and rehabilitation, through both theoretical and experimental studies, and through good case study literature. Two key aspects need to be addressed: that of developing sound and easily applied standard practices for repair, possibly codified, and the need to study seriously the service performance of repaired structures and repair systems. In

fact, without making substantial efforts to implement the latter goal, much of the effort in repair and rehabilitation may prove to be less than economical or satisfactory. The conference proceedings contain papers presented at the conference which can be grouped under the six main themes of (i) Concrete durability aspects, (ii) Condition assessment of concrete structures, (iii) Modern materials technology, (iv) Concrete repair, rehabilitation and retrofitting, (v) Performance and health monitoring and (vi) Education, research and specifications. The large number of high quality papers presented and the wide range of relevant topics covered confirm that these proceedings will be a valued reference for many working in this important field and that they will form a suitable base for discussion and provide suggestions for future development and research.
