**The Professions and Civic Life** Mar 08 2022 Professions are institutions which, through their small size, self-governing elements, and sense of social mission, can assist in maintaining a sound civic culture. As mediating institutions in our democratic society that are neither entirely birthed by the state nor are entirely private, the individual professions—such as the legal and education professions, journalism, economics, architecture, or the military—arguably present practical avenues through which to teach civic behavior and to restore Americans’ broken trust. This volume on the professions and civic life undertakes a unique and timely examination of twelve individual professions to see how each affects the character of American citizenship and the civic culture of the nation through their practices and ethos. Among the questions each essay in the volume addresses are: What is distinctive—or not—about the specific profession as it came to be practiced in the United States? Given the specialized knowledge, training, and sometimes licensing of a profession, what do the professions perceive to be their role in promoting the larger common good? How can we bring professionals’ expert knowledge to bear on social problems in an open and deliberative way? Is the ethic of a particular profession as it understands itself today at odds with the American conception of self-government and a healthy civic life? Through analysis of these questions, each chapter presents a rich treatment of how the twelve longstanding professions of political science, teaching, the law, the military, economics, medicine, journalism, literature, science, architecture, music, and history help support and challenge the general public’s civic behavior in general and their attachment to the American regime in particular.

**American Citizenship: Responsible Participation in the Civic Life of the United States of America** Sep 25 2023 Civic

engagement book aimed at increasing citizen participation through greater knowledge of U.S. history, and of how it influences the country's present and future.

*Rhetoric in Civic Life, 3 Ed., Rpts* Feb 04 2022

Living Two Lives : Differentiating Your Private and Civic Life | Political Science for Grade 6 | Children's Reference Books Jul 24 2023 Use this book to understand your duties as a private person and a citizen of your country. What is the difference between your private and civic life? What can you do to help your community and contribute to the development of your town and region? How can you perform your duties as a citizen while keeping your private life? Read this book to come up with a plan soon.

The Good Citizen Apr 01 2024 Today, political participation takes place in schools, at home, at work, and in the courts. We have made "informed citizenship" an overwhelming task. Schudson argues that it is time for a new model, in which we stop expecting everyone to do everything. The new citizenship must rest on citizens who are monitors of political danger rather than walking encyclopedias of governmental news. This tour of the past makes it possible to imagine a very different - and much more satisfying - future.

**Engaging Young People in Civic Life** May 02 2024 The myth of generations of disengaged youth has been shattered by increases in youth turnout in the 2004, 2006, and 2008 primaries. Young Americans are responsive to effective outreach efforts, and this collection addresses how to best provide opportunities for enhancing civic learning and forming lasting civic identities. The thirteen original essays are based on research in schools and in settings beyond the schoolyard where civic life is experienced. One focus is on programs for those schools in poor communities that tend to overlook civic

education. Another chapter reports on how two city governments--Hampton, Virginia, and San Francisco--have invited youth to participate on boards and in agencies. A cluster of chapters focuses on the civic education programs in Canada and Western Europe, where, as in the United States, immigration and income inequality raise challenges to civic life.

**Civic Life in the Information Age** Mar 20 2023 Defying the general belief that American citizenship is in decline, Sanford claims that Generation X is actually taking positions of civic leadership and authority as Baby Boomers retire. By exploring traditional instruments of social capital, civic culture and political science, she attempts to make us understand this maligned generation better.

**Civic Engagement in American Democracy** Nov 15 2022 American democracy is in many ways more vital than ever before. Advocacy groups proliferate and formerly marginalized groups enjoy new opportunities. But worrisome trends exist. Millions of Americans are drawing back from involvements with community affairs and politics. Voters stay home; public officials grapple with distrust or indifference; and people are less likely to cooperate on behalf of shared goals. Observers across the spectrum of opinion agree that it is vital to determine what is happening and why—so that Americans can take well-informed, effective steps to revitalize our national community. The book opens with an eagle-eye look at the roots of America's special patterns of civic engagement, examining the ways social groups and government and electoral politics have influenced each other. Other chapters examine the impact of advocacy groups and socioeconomic inequalities on democratic processes and probe the influence of long-term social and cultural changes on voluntary associations and civic participation. The book concludes by asking why social liberation has been accompanied

by new inequalities and the erosion of many important forms of citizen leverage and participation. Coming together from several disciplines, contributors include Jeffrey M. Berry, Henry E. Brady, John Brehm, Steven Brint, Elisabeth S. Clemens, Peter Dobkin Hall, Wendy M. Rahn, Kay Lehman Schlozman, Sidney Verba, and Robert Wuthnow. Copublished with the Russell Sage Foundation

**Why We Vote** May 22 2023 Why do more people vote--or get involved in other civic and political activities--in some communities than in others? *Why We Vote* demonstrates that our communities shape our civic and political engagement, and that schools are especially significant communities for fostering strong civic norms. Much of the research on political participation has found that levels of participation are higher in diverse communities where issues important to voters are hotly contested. In this well-argued book, David Campbell finds support for this view, but also shows that homogenous communities often have very high levels of civic participation despite a lack of political conflict. Campbell maintains that this sense of civic duty springs not only from one's current social environment, but also from one's early influences. The degree to which people feel a sense of civic obligation stems, in part, from their adolescent experience. Being raised and thus socialized in a community with strong civic norms leads people to be civically engaged in adulthood. Campbell demonstrates how the civic norms within one's high school impact individuals' civic involvement--even a decade and a half after those individuals have graduated. Efforts within America's high schools to enhance young people's sense of civic responsibility could have a participatory payoff in years to come, the book concludes; thus schools would do well to focus more attention on building civic norms among their students.

The Good Citizen May 10 2022 In The Good Citizen, some of the most eminent contemporary thinkers take up the question of the future of American democracy in an age of globalization, growing civic apathy, corporate unaccountability, and purported fragmentation of the American common identity by identity politics.

Palaces for the People Dec 05 2021 “A comprehensive, entertaining, and compelling argument for how rebuilding social infrastructure can help heal divisions in our society and move us forward.”—Jon Stewart NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • “Engaging.”—Mayor Pete Buttigieg, *The New York Times* Book Review (Editors’ Choice) We are living in a time of deep divisions. Americans are sorting themselves along racial, religious, and cultural lines, leading to a level of polarization that the country hasn’t seen since the Civil War. Pundits and politicians are calling for us to come together and find common purpose. But how, exactly, can this be done? In Palaces for the People, Eric Klinenberg suggests a way forward. He believes that the future of democratic societies rests not simply on shared values but on shared spaces: the libraries, childcare centers, churches, and parks where crucial connections are formed. Interweaving his own research with examples from around the globe, Klinenberg shows how “social infrastructure” is helping to solve some of our most pressing societal challenges. Richly reported and ultimately uplifting, Palaces for the People offers a blueprint for bridging our seemingly unbridgeable divides. **LONGLISTED FOR THE ANDREW CARNEGIE MEDAL FOR EXCELLENCE IN NONFICTION** “Just brilliant!”—Roman Mars, *99% Invisible* “The aim of this sweeping work is to popularize the notion of ‘social infrastructure’—the ‘physical places and organizations that shape the way people interact’. . . . Here, drawing on research in

urban planning, behavioral economics, and environmental psychology, as well as on his own fieldwork from around the world, [Eric Klinenberg] posits that a community's resilience correlates strongly with the robustness of its social infrastructure. The numerous case studies add up to a plea for more investment in the spaces and institutions (parks, libraries, childcare centers) that foster mutual support in civic life."—The New Yorker "Palaces for the People—the title is taken from the Scottish-American industrialist and philanthropist Andrew Carnegie's description of the hundreds of libraries he funded—is essentially a calm, lucid exposition of a centuries-old idea, which is really a furious call to action."—New Statesman "Clear-eyed . . . fascinating."—Psychology Today

**Civic Life in America** Dec 29 2023 The health of our republic relies on the opportunities made available for each citizen to contribute to building and maintaining the strength of their communities. This Issue Brief features national statistics, findings and key trends on civic engagement. Key findings include: Americans are coming together to solve challenges; They are tilting towards the issues and not running away from them; People who serve by volunteering are more likely to participate in the other elements of civic life; Volunteering and voting are the most common forms of civic engagement; Use of the Internet is positively related to and can be a real boon to our civic engagement; Vets are generally more involved in their communities than non-vets. Illus. A print on demand report.

**Diminished Democracy** Nov 27 2023 Pundits and social observers have voiced alarm each year as fewer Americans involve themselves in voluntary groups that meet regularly. Thousands of nonprofit groups have been launched in recent times, but most are run by professionals who lobby Congress or deliver social services to clients. What will happen to U.S.

democracy if participatory groups and social movements wither, while civic involvement becomes one more occupation rather than every citizen's right and duty? In *Diminished Democracy*, Theda Skocpol shows that this decline in public involvement has not always been the case in this country and how, by understanding the causes of this change, we might reverse it. *The Civic Life of American Religion* Apr 08 2022 Presents lively, research-based essays by premier social scientists on the positive and negative roles of religious groups in American public life.

*Engaged* Sep 13 2022 Why do so few of us trust our government, take interest in politics, or assume active roles in our communities? *Engaged* provides a unique perspective on the state of our civic life today and why it matters to democracy. It explores key aspects of engagement through personal stories, vignettes from the Shaw neighborhood in Washington, DC, and inspiring examples of those who are trying to bring about change. Our political gridlock and the election of 2016 have revealed growing levels of mistrust and disengagement. Participating in civic life is just not made easy for many of us but has demonstrable impact to the world around us. This book makes the case for investing more of our time and energy into our civic lives, both as a country and individuals. *Engaged* speaks to all Americans -- veterans, entrepreneurs, religious leaders, community organizers, educators, parents, and everyday citizens -- who want to make a difference in the country we all love.

Rhetoric in Civic Life Aug 25 2023

*A New Engagement?* Aug 13 2022 In searching for answers as to why young people differ vastly from their parents and grandparents when it comes to turning out the vote, *A New Engagement* challenges the conventional wisdom that today's

youth is plagued by a severe case of political apathy. In order to understand the current nature of citizen engagement, it is critical to separate political from civic engagement. Using the results from an original set of surveys and the authors' own primary research, they conclude that while older citizens participate by voting, young people engage by volunteering and being active in their communities.

**A Retrospective on Civic Life in Texas** Nov 03 2021 Civic life in its healthiest state is a dynamic, open, and reflective system that serves the needs of the public and improves the quality of life for all its members. A vibrant civic sphere helps citizens become less vulnerable to exploitation, hardship, harm, and allows everyday voices access to the powers that influence their lives. Yet most citizens today feel that the political arena has become too hostile, irrational, and polarized to expend their energy trying to affect it. Texas in particular is experiencing some of the lowest levels of civic engagement in the nation. The framework of this report holds on to both the notion that a healthy civic sphere is vital to the social fabric of our nation and to idea that citizens have legitimate reasons why they do not currently engage more in the process. These new dynamics in the landscape of political life warrant a moment of reflection which this retrospective seeks to offer. This paper uses Current Population Survey data from the U.S. Census Bureau to explore whether we are we asking the right questions, if we have enough information, and outlines what the data we do have is telling us about civic life in Texas.

**The Civic Web** Feb 29 2024

*Composing a Civic Life* Oct 15 2022 Promoting the examined life as an ideal that brings inquiry and action together, this text addresses the critical thinking, reading, and writing skills. It promotes active citizenship by encouraging students to write as a

means of inquiry and civic participation. It shows students how to work toward negotiation and positive social action.

**What Should We Do?** Jun 03 2024 A broad theory of civic life that asks the question "What should we do?" and shows how to ask it well for civic engagement. People who want to improve the world must ask the fundamental civic question: "What should we do?" Although the specific issues and challenges people face are enormously diverse, they often encounter problems of collective action (how to get many individuals to act in concert), of discourse (how to talk and think productively about contentious matters), and of exclusion. To get things done, they must form or join and sustain functional groups, and through them, develop skills and virtues that help them to be effective and responsible civic actors. In *What Should We Do?*, Peter Levine, one of America's leading scholars and practitioners of civic engagement, identifies the general challenges that confront people who ask the citizens' question and explores solutions. Ultimately, his goal is to provide a unified theoretical foundation for effective civic engagement and citizen action. Levine draws from three rich traditions: research on collective action by Elinor Ostrom and her colleagues, work on deliberation and discourse by Jürgen Habermas, and the nonviolent social movements led by Gandhi and Martin Luther King, Jr. Using real-world examples, he develops a theory of citizen action that can effectively wrestle with these problems so that they don't destabilize movements. A broad theory of civic life, *What Should We Do?* turns from the question of what makes a society just to the question of how to relate to our fellow human beings in a context of injustice. And it offers pragmatic guidance for people who seek to improve the world.

**The News and Public Opinion** Jan 06 2022 The daily news plays a major role in the continuously changing mix of thoughts,

feelings and behavior that defines public opinion. *The News & Public Opinion* details these effects of the news media on the sequence of outcomes that collectively shape public opinion, beginning with initial attention to the various news media and their contents and extending to the effects of this exposure on the acquisition of information, formation of attitudes and opinions and to the consequences of all these elements for participation in public life. Sometimes called the hierarchy of media effects, this sequence of outcomes describes the communication process involved in the formation of public opinion. Although the media landscape is undergoing rapid change, key elements remain the same, and *The News & Public Opinion* emphasizes these basic principles of communication established over decades of empirical social science investigations into the impact of mass communication on public opinion. The primary audience for this book is students, both advanced undergraduates and graduate students, as well as members of the general public who want to understand the role of the news media in our civic life.

**Making Volunteers** Dec 17 2022 An inside look at how community service organizations really work Volunteering improves inner character, builds community, cures poverty, and prevents crime. We've all heard this kind of empowerment talk from nonprofit and government-sponsored civic programs. But what do these programs really accomplish? In *Making Volunteers*, Nina Eliasoph offers an in-depth, humorous, wrenching, and at times uplifting look inside youth and adult civic programs. She reveals an urgent need for policy reforms in order to improve these organizations and shows that while volunteers learn important lessons, they are not always the lessons that empowerment programs aim to teach. With short-term funding and a dizzy mix of mandates from multiple

sponsors, community programs develop a complex web of intimacy, governance, and civic life. Eliasoph describes the at-risk youth served by such programs, the college-bound volunteers who hope to feel selfless inspiration and plump up their resumé, and what happens when the two groups are expected to bond instantly through short-term projects. She looks at adult "plug-in" volunteers who, working in after-school programs and limited by time, hope to become like beloved aunts to youth. Eliasoph indicates that adult volunteers can provide grassroots support but they can also undermine the family-like warmth created by paid organizers. Exploring contradictions between the democratic rhetoric of empowerment programs and the bureaucratic hurdles that volunteers learn to navigate, the book demonstrates that empowerment projects work best with less precarious funding, more careful planning, and mandatory training, reflection, and long-term commitments from volunteers. Based on participant research inside civic and community organizations, *Making Volunteers* illustrates what these programs can and cannot achieve, and how to make them more effective.

### **Tapping Civic Life** Jan 18 2023

*Civic Life in America* Jun 30 2021 This report features national statistics, findings and key trends on civic engagement. The Civic Life in America research found that the majority of Americans - nearly 125 million - turned toward problems and helped support their neighbors in times of need. It measures how often Americans engage in a variety of activities including political action, service, social connectedness, belonging to a group, and connection to information and current events. Whether volunteering or helping a neighbor find a job, Americans are engaging in activities that help build stronger and more civically involved communities, according to the

assessment.

Our Civic Life SB3 Citizenship in a Democracy Apr 20 2023

**What Should We Do?** Aug 01 2021 In *What Should We Do?*, Peter Levine explores how to organize individuals to act in concert, how to talk and think well about contentious matters, and how to address exclusion. In the broadest available theory of civic engagement and civic life, he analyzes the work of major thinkers, including Gandhi, Martin Luther King, Jr., Jürgen Habermas, and Elinor Ostrom. He also provides many practical examples of successful civic action and principles that are useful for real-world civic action.

**The Civic Web** Oct 03 2021 An investigation of how governments, organizations, and groups use the Internet to promote civic and political engagement among young people. There has been widespread concern in contemporary Western societies about declining engagement in civic life; people are less inclined to vote, to join political parties, to campaign for social causes, or to trust political processes. Young people in particular are frequently described as alienated or apathetic. Some have looked optimistically to new media—and particularly the Internet—as a means of revitalizing civic life and democracy. Governments, political parties, charities, NGOs, activists, religious and ethnic groups, and grassroots organizations have created a range of youth-oriented websites that encourage widely divergent forms of civic engagement and use varying degrees of interactivity. But are young people really apathetic and lacking in motivation? Does the Internet have the power to re-engage those disenchanted with politics and civic life? Based on a major research project funded by the European Commission, this book attempts to understand the role of the Internet in promoting young people's participation. Examples are drawn from Hungary, the Netherlands, Slovenia, Spain, Sweden,

Turkey, and the United Kingdom—countries offering contrasting political systems and cultural contexts. The book also addresses broader questions about the meaning of civic engagement, the nature of new forms of participation, and their implications for the future of civic life.

**Art Forms and Civic Life in the Late Roman Empire** May 29 2021 In this study, originally published in Norway as *Fra Principat Til Dominat*, Professor L'Orange sets down the essence of his thought on the crucial period of transition from decentralization to standardization in civic and cultural life—a period not unlike our own.

**Composing a Civic Life** Jan 30 2024 A humorous novel about a private eye living an uneventful life in Brighton until normality gives way to a kind of mad logic. Frank, a private eye in Brighton, is the perfect lodger: neat, quiet, and solitary, a decent man leading an uneventful life. Then his neighbour announces she's pregnant, his landlady's budgie is strangled, his boss retires to a sauna, his client's wife is murdered, the client himself drowns, and his client's sister dies in a fall from a high cliff path. As Frank's world tightens into a circle of chaos and death, he seeks escape. But will this be the catalyst he needs, or just another step towards the total collapse of his life?

*The Multifaceted Nature of Civic Participation* Feb 24 2021 Civic participation is an ideal concept in most democratic societies. In this review, Cnaan and Park document how key writings are limited in scope and are either nonprofit, political science or environmental studies oriented. Cnaan and Park conclude with a call for future research of civic participation to be both comprehensive and sensitive.

*Shakespeare, Romeo and Juliet, and Civic Life* Jun 10 2022 This volume introduces 'civic Shakespeare' as a new and complex category entailing the dynamic relation between the individual

and the community on issues of authority, liberty, and cultural production. It investigates civic Shakespeare through *Romeo and Juliet* as a case study for an interrogation of the limits and possibilities of theatre and the idea of the civic. The play's focus on civil strife, political challenge, and the rise of a new conception of the individual within society makes it an ideal site to examine how early modern civic topics were received and reconfigured on stage, and how the play has triggered ever new interpretations and civic performances over time. The essays focus on the way the play reflects civic life through the dramatization of issues of crisis and reconciliation when private and public spaces are brought to conflict, but also concentrate on the way the play has subsequently entered the public space of civic life. Set within the fertile context of performance studies and inspired by philosophical and sociological approaches, this book helps clarify the role of theatre within civic space while questioning the relation between citizens as spectators and the community. The wide-ranging chapters cover problems of civil interaction and their onstage representation, dealing with urban and household spaces; the boundaries of social relations and legal, economic, political, and religious regulation; and the public dimension of memory and celebration. This volume articulates civic *Romeo and Juliet* from the sources of genre to contemporary multicultural performances in political contact-zones and civic 'Shakespaces,' exploring the Bard and this play within the context of communal practices and their relations with institutions and civic interests.

**Jumping Into Civic Life** Mar 27 2021 Through detailed oral histories, this book helps to open our imagination to the possibilities for professionals to make contributions to the task of making democracy work as it should. The firsthand stories of public work in these oral histories are told by professionals from

six different U.S. states who entered civic life as active participants. They help us see what it means and takes to be a "citizen professional" who respects and supports the capacities, intelligence, expertise, and agency of others.

A New Engagement? Oct 27 2023 In searching for answers as to why young people differ vastly from their parents and grandparents when it comes to turning out the vote, A New Engagement challenges the conventional wisdom that today's youth is plagued by a severe case of political apathy. In order to understand the current nature of citizen engagement, it is critical to separate political from civic engagement. Using the results from an original set of surveys and the authors' own primary research, they conclude that while older citizens participate by voting, young people engage by volunteering and being active in their communities.

*Why Place Matters* Feb 16 2023 Contemporary American society, with its emphasis on mobility and economic progress, all too often loses sight of the importance of a sense of "place" and community. Appreciating place is essential for building the strong local communities that cultivate civic engagement, public leadership, and many of the other goods that contribute to a flourishing human life. Do we, in losing our places, lose the crucial basis for healthy and resilient individual identity, and for the cultivation of public virtues? For one can't be a citizen without being a citizen of some place in particular; one isn't a citizen of a motel. And if these dangers are real and present ones, are there ways that intelligent public policy can begin to address them constructively, by means of reasonable and democratic innovations that are likely to attract wide public support? *Why Place Matters* takes these concerns seriously, and its contributors seek to discover how, given the American people as they are, and American economic and social life as it now

exists—and not as those things can be imagined to be in some utopian scheme—we can find means of fostering a richer and more sustaining way of life. The book is an anthology of essays exploring the contemporary problems of place and placelessness in American society. The book includes contributions from distinguished scholars and writers such as poet Dana Gioia (former chairman of the National Endowment for the Arts), geographer Yi-Fu Tuan, urbanist Witold Rybczynski, architect Philip Bess, essayists Christine Rosen and Ari Schulman, philosopher Roger Scruton, transportation planner Gary Toth, and historians Russell Jacoby and Joseph Amato.

*Civic Life Online* Jun 22 2023 The relationship of participation in online communities to civic and political engagement. Young people today have grown up living substantial portions of their lives online, seeking entertainment, social relationships, and a place to express themselves. It is clear that participation in online communities is important for many young people, but less clear how this translates into civic or political engagement. This volume examines the relationship of online action and real-world politics. The contributors discuss not only how online networks might inspire conventional political participation but also how creative uses of digital technologies are expanding the boundaries of politics and public issues. Do protests in gaming communities, music file sharing, or fan petitioning of music companies constitute political behavior? Do the communication skills and patterns of action developed in these online activities transfer to such offline realms as voting and public protests? *Civic Life Online* describes the many forms of civic life online that could predict a generation's political behavior. Contributors Marina Umaschi Bers, Stephen Coleman, Jennifer Earl, Kirsten Foot, Peter Levine, Kathryn C. Montgomery, Kate Raynes-Goldie, Howard Rheingold, Allen Schussman, Luke Walker,

Michael Xenos

*Why Community Matters* Apr 28 2021 Providing a new perspective on the undeniable relationship between education reform and democratic revitalization, Nicholas V. Longo uncovers and examines practical models in which communities play an essential role in teaching the art of democracy.

*Different Paths to a Common Goal* Sep 01 2021 While many Americans might agree on the importance of preparing young people for citizenship in a democracy, civic education has been in decline. Results from the National Assessment of Educational Progress show students across all grade levels have a less-than-adequate grasp of the skills and knowledge necessary to engage as citizens. In response, a number of states have taken a variety of approaches to promote and advance civics education--with and without legislation--by instituting the following: (1) mandated task forces; (2) accountability structures and mandated assessments for civics; (3) statewide initiatives; (4) administrative directives; and (5) initiatives of secretaries of state. In recent months, the National Center for Civic Learning and Engagement, part of the Education Commission of the States, has explored each of these points in short reports. This report, the sixth and final in the series, explores the similarities of these efforts around the country. Some recurring themes became clear. A collaborative approach is crucial and, while not always easy, there are ways to work within financial and political constraints. In general, successful policymaking for civic education requires broad support through a goal-oriented, non-partisan, and collaborative approach. While states' civic education efforts come in a rich variety, the goals of these civic initiatives are the same: to ensure that all students are ready for college, career and civic life. [For the other reports: "Florida and Tennessee: Accountability in Civic Education," see ED561922;

**Ethnic Conflict and Civic Life** Jul 12 2022 What kinds of civic ties between different ethnic communities can contain, or even prevent, ethnic violence? This book draws on new research on Hindu-Muslim conflict in India to address this important question. Ashutosh Varshney examines three pairs of Indian cities—one city in each pair with a history of communal violence, the other with a history of relative communal harmony—to discern why violence between Hindus and Muslims occurs in some situations but not others. His findings will be of strong interest to scholars, politicians, and policymakers of South Asia, but the implications of his study have theoretical and practical relevance for a broad range of multiethnic societies in other areas of the world as well. The book focuses on the networks of civic engagement that bring Hindu and Muslim urban communities together. Strong associational forms of civic engagement, such as integrated business organizations, trade unions, political parties, and professional associations, are able to control outbreaks of ethnic violence, Varshney shows. Vigorous and communally integrated associational life can serve as an agent of peace by restraining those, including powerful politicians, who would polarize Hindus and Muslims along communal lines.

**Engaging Young People in Civic Life** Jul 04 2024 The myth of generations of disengaged youth has been shattered by increases in youth turnout in the 2004, 2006, and 2008 primaries. Young Americans are responsive to effective outreach efforts, and this

collection addresses how to best provide opportunities for enhancing civic learning and forming lasting civic identities. The thirteen original essays are based on research in schools and in settings beyond the schoolyard where civic life is experienced. One focus is on programs for those schools in poor communities that tend to overlook civic education. Another chapter reports on how two city governments--Hampton, Virginia, and San Francisco--have invited youth to participate on boards and in agencies. A cluster of chapters focuses on the civic education programs in Canada and Western Europe, where, as in the United States, immigration and income inequality raise challenges to civic life.
