

SCHOOL UNIFORM

The topic of school uniforms has been highly debated for many years. Many would think it would be the teachers versus the pupils in this debate but they would be wrong, this argument has members from both sides fighting for and against it. In this essay I will look at the topic from both sides and be un-objective in my writing.

Many of the arguments made in favour of school uniforms have something to do with the safety of the school community as a whole. For example some may say that with school uniforms children do not get bullied for what clothes they wear as everyone is the same or theft is reduced as there is less temptation to steal from others. With uniforms in theory everyone is the same as opposed to a school without uniforms where everyone dresses how they like, making it possible for other people to pick on them for a choice they have made. Uniforms, essentially, eliminate this method of bullying, even though it still exists to some extent. Another advantage of uniforms is the fact pupils do not need to waste time in the morning thinking of what to wear to school, the uniform is already there.

Some see uniform as a sign of pride and unity within the pupil community, this can be seen at competitions when schools compete against each other and the uniforms can be recognised. This is also good advertising for the school as people may recognise the uniform, which is why pupils are expected to look presentable and tidy, if not a lot of schools have some sort of punishment for untidy pupils. Many people believe all pupils hate uniforms,

School Uniforms David L. Brunnsma,2002 The debate surrounding the effectiveness of school uniform policies as well as discussions concerning when and how to implement them is rooted in anecdote This review summarizes anecdotal literature on which the current debate is based and critically reviews the empirical literature including theoretical underpinnings findings and suggestions The anecdote based literature relies on attitudes personal experience and hearsay ignoring available research Empirical literature includes small scale studies of effects such as case studies of schools that implemented mandatory school uniform policies and large scale studies that compare nationally representative samples of students enrolled in schools implementing uniform policies with students enrolled in schools not implementing such policies on a variety of outcomes Many methods used are flawed because different factors are not accounted for such as design of uniform policies in different schools studies and racial and socioeconomic status Still results of qualitative studies lay the groundwork for creating theories on uniform policy effectiveness and defining related issues requiring further research These results will direct policymakers away from conjecture emotion anecdotes and assumptions One suggestion is that a uniform policy be part of a larger comprehensive plan that focuses on students academic success Contains 31 endnotes 14 references and 18 resource Web sites RT
