How Do I Tax Thee? Kristin Tate,2018-03-20 We all know the government taxes our income Federal state and local taxes are withheld by employers as are Social Security payments But what about the many other ways the government covertly drains money from our wallets Have you studied your cell phone bill Customers in New York State pay an average of 24 36% in combined taxes on their wireless bills They re also charged for obscure services they didn t ask for and don t understand like a universal service fund fee an FCC compliance fee a line service fee and an emergency services fee These aren t taxes strictly speaking The government imposes these administrative and regulatory costs and your wireless provider passes them along to you What about your cable bill Your power bill Your trash bill The cost of groceries a gallon of gas a cab ride a hotel stay and a movie ticket are all inflated by hidden fees How much of what you pay at the grocery store pump airport or the box office is really an indirect tax In a series of short pointed fact laden humorous chapters Kristin Tate exposes how up to half of your income is siphoned straight into federal state and city government coffers and also where these hidden taxes and fees come from Dust jacket

Taxi! Graham Russell Gao Hodges, 2020-03-17 Why the cabdriver is the real victim of the false promises of Uber and the gig economy
2007 Noteworthy Book in Industrial Relations and Labor Economics Princeton University Industrial Relations Section Hailed in its first edition as a classic study of New York City's history and people Graham Russell Gao Hodges's *Taxi* is a remarkable evocation of the forgotten history of the taxi driver This deftly woven narrative captures the spirit of New York City cabdrivers and their hardscrabble struggle to capture a piece of the American dream From labor unrest and racial strife to ruthless competition and political machinations Hodges recounts this history through contemporary news accounts Hollywood films and the words of the cabbies themselves A new preface recalls the author's five years of hacking in New York City in the early 1970s and a new concluding chapter explores the rise of app based ridesharing services with the arrival of companies like Uber and Lyft Sharply criticizing the use of the independent contractor model that is the cornerstone of Uber and the gig economy Hodges argues that the explosion of for hire vehicles in Manhattan reversed decades of environmental anti congestion efforts He calls for a return to the careful regulations that governed taxicabs for decades and provided a modest yet secure living for cabbies Whether or not you've ever hailed a cab on Broadway *Taxi* provides a fascinating perspective on New York's most colorful emissaries

The Road to Freedom Arthur C. Brooks, 2012-05-08 Argues that the Obama administration has used the economic crises to move away from free enterprise and offers a way back via sound public policy

Transportation Analytics in the Era of Big Data Satish V. Ukkusuri, Chao Yang, 2018-07-28 This book presents papers based on the presentations and discussions at the international workshop on Big Data Smart Transportation Analytics held July 16 and 17 2016 at Tongji University in Shanghai and chaired by Professors Ukkusuri and Yang The book is intended to explore a multidisciplinary perspective to big data science in urban transportation motivated by three critical observations The rapid advances in the observability of assets platforms for matching supply and demand thereby allowing sharing networks previously unimaginable The nearly universal agreement that data from multiple sources such as cell phones social media taxis and transit systems can allow an understanding of infrastructure systems that is critically important to both quality of life and successful economic competition at the global national regional and local levels There is presently a lack of unifying principles and methodologies that approach big data urban systems The workshop brought together varied perspectives from engineering computational scientists state and central government social scientists physicists and network science experts to develop a unifying set of research challenges and methodologies that are likely to impact infrastructure systems with a particular focus on transportation issues The book deals with the emerging topic of data science for cities a central topic in the last five years that is expected to become critical in academia industry and the government in the future There is currently limited literature for researchers to know the opportunities and state of the art in this emerging area so this book fills a gap by synthesizing the state of the art from various scholars and help identify new research directions for further study

Spent behind the Wheel Julietta Hua, Kasturi Ray, 2021-12-21 Exploring professional passenger driving and the gig economy through feminist theories of labor Are taxi drivers in today's era of the ride hail app performing care work akin to domestic and household labor So argue the authors of *Spent behind the Wheel* Bringing together sociological and legal perspectives with feminist theoretical insights Julietta Hua and Kasturi Ray examine the case study of contemporary professional passenger driving in the United States On the one hand they show the rise of the gig economy has brought new attention to the industry of professional passenger driving On the other hand the vulnerabilities that professional drivers experience remain hidden Drawing on interviews with drivers labor organizers and members of licensing commissions as well as case law and other published resources Hua and Ray argue that working for ride hail companies like Uber and Lyft shares similarities with driving for taxi companies in the impact on driver lives Lyft and Uber sell the idea of industry disruption but in fact they entrench long standing modes of extracting the reproductive labor of their drivers for the benefit of consumer lives Reproductive labor conventionally understood as feminized labor is extracted but masked behind the masculinized racialized bodies of drivers Professional driving is thus best understood alongside domestic and other gendered service work as reproductive labors devalued and often demonetized to benefit the national economy *Spent behind the Wheel* is a must for readers interested in critical studies of technological change and the gig economy showing how drivers capacities are drained for the benefit of riders corporations and the maintenance of the racial state

Disruptive Transport William Riggs,2018-12-07 With the rise of shared and networked vehicles autonomous vehicles and other transportation technologies technological change is outpacing urban planning and policy Whether urban planners and policy makers like it or not these transformations will in turn result in profound changes to streets land use and cities But smarter transportation may not necessarily translate into greater sustainability or equity There are clear opportunities to shape advances in transportation and to harness them to reshape cities and improve the socio economic health of cities and residents There are opportunities to reduce collisions and improve access to healthcare for those who need it most particularly high cost high need individuals at the younger and older ends of the age spectrum There is also potential to connect individuals to jobs and change the way cities organize space and optimize trips To date very little discussion has centered around the job and social implications of this technology Further policy dialogue on future transport has lagged particularly in the arenas of sustainability and social justice Little work has been done on decision making in this high uncertainty environment a deficiency that is concerning given that land use and transportation actions have long and lagging timelines This is one of the first books to explore the impact that emerging transport technology is having on cities and their residents and how policy is needed to shape the cities that we want to have in the future The book contains a selection of contributions based on the most advanced empirical research and case studies for how future transport can be harnessed to improve urban sustainability and justice

Beyond the Valley Ramesh Srinivasan, 2019-10-29 How to repair the disconnect between designers and users producers and consumers and tech elites and the rest of us toward a more democratic internet In this provocative book Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics economics and other inefficient inharmonious human activities We may love the immediacy of Google search results the convenience of buying from Amazon and the elegance and power of our Apple devices but it s a one way top down process We re not asked for our input or our opinions only for our data The internet is brought to us by wealthy technologists in Silicon Valley and China It s time Srinivasan argues that we think in terms beyond the Valley Srinivasan focuses on the disconnection he sees between designers and users producers and consumers and tech elites and the rest of us The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy In search of a more democratic internet Srinivasan takes us to the mountains of Oaxaca East and West Africa China Scandinavia North America and elsewhere visiting the design labs of rural low income and indigenous people around the world He talks to a range of high profile public figures including Elizabeth Warren David Axelrod Eric Holder Noam Chomsky Lawrence Lessig and the founders of Reddit as well as community organizers labor leaders and human rights activists To make a better internet Srinivasan says we need a new ethic of diversity openness and inclusivity empowering those now excluded from decisions about how technologies are designed who profits from them and who are surveilled and exploited by them

PV Charging and Storage for Electric Vehicles Pavol Bauer, Gautham Ram Chandra Mouli, 2021-09-02 Electric vehicles are only green as long as the source of electricity is green as well. At the same time, renewable power production suffers from diurnal and seasonal variations, creating the need for energy storage technology. Moreover, overloading and voltage problems are expected in the distributed network due to the high penetration of distributed generation and increased power demand from the charging of electric vehicles. The energy and mobility transition hence calls for novel technological innovations in the field of sustainable electric mobility powered from renewable energy. This Special Issue focuses on recent advances in technology for PV charging and storage for electric vehicles.

Driverless Hod Lipson, Melba Kurman, 2016-09-30 When human drivers let intelligent software take the wheel, the beginning of a new era in personal mobility. Smart, wide-ranging, and nontechnical. Los Angeles Times. Anyone who wants to understand what's coming must read this fascinating book. Martin Ford, New York Times bestselling author of *Rise of the Robots*. In the year 2014, Google fired a shot heard all the way to Detroit: Google's newest driverless car had no steering wheel and no brakes. The message was clear: cars of the future will be born fully autonomous, with no human driver needed. In the coming decade, self-driving cars will hit the streets, rearranging established industries and reshaping cities, giving us new choices in where we live and how we work and play. In this book, Hod Lipson and Melba Kurman offer readers insight into the risks and benefits of driverless cars and a lucid and engaging explanation of the enabling technology. Recent advances in software and robotics are toppling long-standing technological barriers that for decades have confined self-driving cars to the realm of fantasy. A new kind of artificial intelligence software called deep learning gives cars rapid and accurate visual perception. Human drivers can relax and take their eyes off the road. When human drivers let intelligent software take the wheel, driverless cars will offer billions of people all over the world a safer, cleaner, and more convenient mode of transportation. Although the technology is nearly ready, car companies and policy makers may not be. The authors make a compelling case for why government, industry, and consumers need to work together to make the development of driverless cars our society's next Apollo moment.
