Taking English Planning Law Scholarship Seriously Maria Lee, Carolyn Abbot, 2022-10-24 Planning is at the heart of the response to many of the significant challenges of our time from the climate and environmental crises to social and economic inequalities. It is embedded in, as well as partially constituting, our democratic systems so that the challenges of democratic decision making in a complex society cannot be avoided when thinking about planning. Planning law raises some of the most fundamental questions faced by legal scholars from the legitimacy of authority to the relationship between public and private rights and interests. And yet planning law has been relatively neglected by legal scholars. The objective of *Taking English Planning Law Scholarship Seriously* is to create space for planning law scholarship in all of its variety and for curiosity about law in all its complexity. The chapters reflect this diversity and complexity covering a range of the objects of planning from housing to energy to highways and a multiplicity of planning tasks and tools from compulsory purchase to contracting to planning inquiries.

Practice Notes on Planning Law Clive Brand, 2001-03-30 This book provides valuable guidance and insight into the key features of the town and country planning system and the process of obtaining planning permission for development of land. The text is essentially procedural in nature since it focuses on the making of planning applications and the use of appeal procedures. It also explains how to deal with enforcement problems where a breach of planning control takes place. In this fourth edition the opportunity has been taken to provide more information on the key topics. In addition to updating and expanding the legal materials and official publications it also includes useful practical tips on how to operate the planning system successfully. Much has changed to the content of the subject since the last edition. New materials focus on the revised planning appeal procedures implemented by the Town and Country Planning Appeals Written Representations Procedure England Regulations 2000, the Town and Country Hearings Procedure England Rules 2000, the Town and Country Planning Inquiries Procedure England Rules 2000 and the Town and Country Planning Appeals Determination by Inspectors Inquiries Procedure England Rules 2000. Appropriate references are made to DETR Circular 05 2000 Planning Appeals Procedures.

Law in Environmental Decision-making Tim Jewell, Jenny Steele, 1998 This collection of essays adopts a distinctive approach to environmental legal issues. The contributors represent a variety of specialisations ranging from public law to international law and international relations. Some essays are written from within a UK domestic law perspective but others adopt a broadly comparative supra national or international approach. The contributors do not assume that problems and solutions in environmental law should be perceived as wholly distinct from the preoccupations of existing legal specialisms. New and proposed legal responses inevitably build on or employ established legal techniques rather than starting completely afresh. The contributors do however regard environmental problems as posing or at least illuminating significant challenges to received patterns of legal thought. In the light of this the contributors therefore investigate aspects of law's influence in environmental decision making and consider whether legal institutions and forms of thought can respond adequately to the challenge of environmental change.

Legal Responses to Religious Differences Peter William Edge,2021-10-25 Until recently English law has lacked any specific generally applicable guarantees of religious rights Thus bodies of law have developed in particular areas where religious interests arise but without a common legal frame The Human Rights Act 1998 however has brought the guarantees of the European Convention on Human Rights most specifically the guarantees of religious rights non discrimination and education rights more fully into English law As well as showing how one legal system has engaged with international obligations in respect of religious rights this text provides a valuable source for comparative study of religious interests in national jurisdictions It explores the particular response of the English legal system when faced with religious difference and considers the extent to which the Human Rights Act may produce significant legal change The text is aimed specifically at both the legal and non legal reader and concludes with a discussion of how to use English legal sources and an extensive bibliography

Zoned in the USA Sonia A. Hirt,2015-02-24 Why are American cities suburbs and towns so distinct Compared to European cities those in the United States are characterized by lower densities and greater distances neat geometric layouts an abundance of green space a greater level of social segregation reflected in space and perhaps most noticeably a greater share of individual single family detached housing In *Zoned in the USA* Sonia A Hirt argues that zoning laws are among the important but understudied reasons for the cross continental differences Hirt shows that rather than being imported from Europe U S municipal zoning law was in fact an institution that quickly developed its own distinctly American profile A distinct spatial culture of individualism founded on an ideal of separate single family residences apart from the dirt and turmoil of industrial and agricultural production has driven much of municipal regulation defined land use and ultimately shaped American life Hirt explores municipal zoning from a comparative and international perspective drawing on archival resources and contemporary land use laws from England Germany France Australia Russia Canada and Japan to challenge assumptions about American cities and the laws that guide them
