

Final Review: 2nd Semester Biology Answer Key

1. DNA is the hereditary material in cells. It is a chain of nucleotides.
2. A gene is a piece of DNA that controls one trait. Or it is a piece of DNA that is the information to construct one protein/polypeptide.
3. A chromosome is a long strand of DNA, composed of many genes. It contains the information for many traits.
4. An allele is a form of the gene. For example, the allele for purple flowers and the allele for white flowers are two different forms of the flower color gene in pea plants.
5. Heterozygous is an organism that has two different alleles for a trait.
Example: Pp- a purple alleles and a white allele
6. Homozygous is an organism that has two of the same alleles for a trait.
Examples: PP- homozygous dominant (2 purple alleles)
pp- homozygous recessive (2 white alleles)
7. Genotype is the two alleles for a gene found in an organism (Example: PP, Pp, or pp)
8. Phenotype is the expression of a gene in an organism- appearance, existence of a genetic disease etc. Examples: Brown eyes, freckles, hemophilia
9. phenotype ... recessive ... genotype dominant homozygousheterozygous
10. A Punnett square is a tool to determine what genotypes/phenotypes are possible offspring of two parents, and what the probabilities of each genotype/phenotype are. Each side represents the possible alleles in each of the gametes (egg/sperm) of parents.

Example: If a mother is heterozygous for free ear lobes (a dominant trait) her eggs can have either a F allele or f allele.
If the father is homozygous recessive for attached ear lobes, his sperm always have the f allele.

		Eggs from mother	
		F	f
Sperm from father	f		
	f

Listening to Our Students and Transcending K-12 to Save Our Nation Alec Ostrom,Brian Hack,Don Prentice,2020-01-06 This journey will engage you in dealing with some hard truths and it will take you down a new pathway and new ways of thinking about K 12 education We now live in a nation that is struggling with deep social economic and political conflicts We are all doing our best to resolve these conflicts and to solve the critical challenges that we all face in the Digital Age but our children and young adults are having a very difficult time in dealing with the realities of their young lives We wrote this book because we want to engage all of our readers in each local community in frank honest down to earth practical conversations about our K 12 schools as the foundation for our constitutional democracy Without well educated citizens our government our economy and our society will not survive And this is true regardless of the political beliefs of our readers across the political spectrum Designing and Teaching the Secondary Science Methods Course Aaron J. Sickel,Stephen B. Witzig,2017-04-13 The improvement of science education is a common goal worldwide Countries not only seek to increase the number of individuals pursuing careers in science but to improve scientific literacy among the general population As the teacher is one of the greatest influences on student learning a focus on the preparation of science teachers is essential in achieving these outcomes A critical component of science teacher education is the methods course where pedagogy and content coalesce It is here that future science teachers begin to focus simultaneously on the knowledge dispositions and skills for teaching secondary science in meaningful and effective ways This book provides a comparison of secondary science methods courses from teacher education programs all over the world Each chapter provides detailed descriptions of the national context course design teaching strategies and assessments used within a particular science methods course and is written by teacher educators who actively research science teacher education The final chapter provides a synthesis of common themes and unique features across contexts and offers directions for future research on science methods courses This book offers a unique combination of behind the scenes thinking for secondary science methods course designs along with practical teaching and assessment strategies and will be a useful resource for teacher educators in a variety of international contexts Teaching English Language Learners in Secondary Subject Matter Classes Yu Ren Dong,2019-08-01 This book is for secondary subject matter teachers and administrators who work with English language learners ELLs in subject matter classes It is also for college professors who prepare pre service teachers to work with those students The book brings together insights from linguistic socio cultural educational cognitive developmental perspectives of

what it means for ELLs to learn both English and subject matter knowledge in English as a second language It delineates unique challenges that ELLs experience offers ELLs learning stories and suggests concrete strategies with classroom teaching examples across academic disciplines The 2nd edition broadens the scope of the 1st edition in several aspects Specifically it includes two chapters about secondary ELLs previous educational experiences in their home countries a chapter on subject matter lesson planning with ELLs in mind with teacher collaborative strategies and more principle based and field tested effective instructional and assessment strategies for working with ELLs
