Digital Learning and Teaching in Chemistry Yehudit Dori, Courtney Ngai, Gabriela Szeinberg, 2023-07-12 Education is always evolving and most recently has shifted to increased online or remote learning *Digital Learning and Teaching in Chemistry* compiles the established and emerging trends in this field specifically within the context of learning and teaching in chemistry This book shares insights about five major themes best practices for teaching

and learning digitally digital learning platforms virtual visualisation and laboratory to promote learning in science digital assessment and building communities of learners and educators The authors are chemistry instructors and researchers from nine countries contributing an international perspective on digital learning and teaching in chemistry While the chapters in this book span a wide variety of topics as a whole they focus on using technology and digital platforms as a method for supporting inclusive and meaningful learning The best practices and recommendations shared by the authors are highly relevant for modern chemistry education as teaching and learning through digital methods is likely to persist Furthermore teaching chemistry digitally has the potential to bring greater equity to the field of chemistry education in terms of who has access to quality learning and this book will contribute to that goal This book will be essential reading for those working in chemical education and teaching Yehudit Judy Dori is internationally recognised formerly Dean of the Faculty of Education of Science and Technology at the Technion Israel Institute of Technology and won the 2020 NARST Distinguished Contributions to Science Education through Research Award DCRA for her exceptional research contributions Courtney Ngai and Gabriela Szteinberg are passionate researchers and practitioners in the education field Courtney Ngai is the Associate Director of the Office of Undergraduate Research and Artistry at Colorado State University Gabriela Szteinberg serves as Assistant Dean and Academic Coordinator for the College of Arts and Sciences at Washington University in St Louis

General Chemistry
Donald Allan McQuarrie, Peter A. Rock, Ethan B. Gallogly, 2011 Atoms First seems to be the flavor of the year in chemistry textbooks but many of them seem to be little more than rearrangement of the chapters It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students Hal Harris University of Missouri St Louis McQuarrie s book is extremely well written the order of topics is logical and it does a great job with both introductory material and more advanced concepts Students of all skill levels will be able to learn from this book Mark Kearley Florida State University This new fourth edition of General Chemistry takes an atoms first approach from beginning to end In the tradition of McQuarrie s many previous works it promises to be another ground breaking text This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide Presented in an elegant design with all new illustrations it is available in a soft cover edition to offer professors a fresh choice at an outstanding value Student supplements include an online series of descriptive chemistry Interchapters a Student Solutions Manual and an optional state of the art Online Homework program For adopting professors an Instructor s Manual and a CD of the art are also available

The Most Dangerous Game Richard Connell, 2023-02-23 Sanger Rainsford is a big game hunter who finds himself washed up on an island owned by the eccentric General Zaroff Zaroff a big game hunter himself has heard of Rainsford s abilities with a gun and organises a hunt However they re not after animals they re after people When he

protests Rainsford the hunter becomes Rainsford the hunted Sharing similarities with The Hunger Games starring Jennifer Lawrence this is the story that created the template for pitting man against man Born in New York Richard Connell 1893 1949 went on to become an acclaimed author screenwriter and journalist He is best remembered for the gripping novel The Most Dangerous Game and for receiving an Oscar nomination for the screenplay Meet John Doe STEM Student Research Handbook Darci J. Harland,2011 A comprehensive resource for high school teachers and students STEM Student Research Handbook outlines the various stages of large scale research projects enabling teachers to coach their students through the research process *Modelling Learners and Learning in Science Education* Keith S. Taber,2013-12-11 This book sets out the necessary processes and challenges involved in modeling student thinking understanding and learning The chapters look at the centrality of models for knowledge claims in science education and explore the modeling of mental processes knowledge cognitive development and conceptual learning The conclusion outlines significant implications for science teachers and those researching in this field This highly useful work provides models of scientific thinking from different field and analyses the processes by which we can arrive at claims about the minds of others The author highlights the logical impossibility of ever knowing for sure what someone else knows understands or thinks and makes the case that researchers in science education need to be much more explicit about the extent to which research onto learners ideas in science is necessarily a process of developing models Through this book we learn that research reports should acknowledge the role of modeling and avoid making claims that are much less tentative than is justified as this can lead to misleading and sometimes contrary findings in the literature In everyday life we commonly take it for granted that finding out what another knows or thinks is a relatively trivial or straightforward process We come to take the mental register the way we talk about the contents of minds for granted and so teachers and researchers may readily underestimate the challenges involved in their work **Calculus for the AP® Course** Michael P. Sullivan,Kathleen Miranda,2017-01-15 From one of today s most accomplished and trusted mathematics authors comes a new textbook that offers unmatched support for students facing the AP calculus exam and the teachers helping them prepare for it Sullivan and Miranda s Calculus for the AP Course covers every Big Idea Essential Knowledge statement Learning Objective and Math Practice described in the 2016 2017 redesigned College Board™ Curriculum Framework Its concise focused narrative and integrated conceptual and problem solving tools give students just the help they need as they learn calculus and prepare for the redesigned AP Exam And its accompanying Teacher s Edition provides an in depth correlation and abundant tips examples projects and resources to ensure close adherence the new Curriculum Framework Organic Chemistry Thomas N. Sorrell,1999-01 This brilliantly innovative textbook constructs organic chemistry from the ground up By focusing on the points of reactivities in organic molecules showing why they are reactive what kinds of moieties react at these points and how surroundings may alter the reactivity this text allows students to approach more and more complex molecules with enhanced understanding **The Analysis of**

Biological Data Michael C. Whitlock, Dolph Schluter, 2019-11-22 The Analysis of Biological Data provides students with a practical foundation of statistics for biology students Every chapter has several biological or medical examples of key concepts and each example is prefaced by a substantial description of the biological setting The emphasis on real and interesting examples carries into the problem sets where students have dozens of practice problems based on real data The third edition features over 200 new examples and problems These include new calculation practice problems which guide the student step by step through the methods and a greater number of examples and topics come from medical and human health research Every chapter has been carefully edited for even greater clarity and ease of use All the data sets R scripts for all worked examples in the book as well as many other teaching resources are available to qualified instructors see below
