

XT100LE

XT100LE

2. Disconnect spark plug wire and ground to side of case.
3. Remove the two flange nuts (C) securing the muffer to the cylinder. Where used, remove the top screw (D) securing the muffer to the cylinder.
4. Remove the muffer (E).
5. Pull the muffer gasket (F) off of the cylinder.
6. Remove the spark arrester screen (F) from the muffer body by removing the screws.
7. Inspect the spark screen and replace or clean as needed.
8. Remove any carbon which has accumulated in the muffer case.

9. Inspect the cylinder exhaust port (E), piston (F), and piston ring for carbon buildup. If the port is clogged, it will be necessary to first put the piston at top dead center, and then remove the carbon carefully with a piston scraper (G) NOT across the piston or damage the edges of the port.

**Installation:**

Installation is the reverse of removal.

- Assemble the spark arrester screen, gasket and screws to the muffer. Tighten the screws to 1.8 - 2.8 Nm (17 - 24 In-Lb).
- Slide muffer gasket on the two muffer mounting studs. Place the muffer assembly on the cylinder head.
- Tighten the nuts to specification.
- Connect spark plug wire.
- Replace mufferlip cover.

**Ignition Switch Removal and Installation****Removal:**

**NOTE:** D-handle model shown. Bicycle model handle similar.

1. Disconnect spark plug wire.

2. Remove the four screws (A) securing the control housing halves together and separate halves.

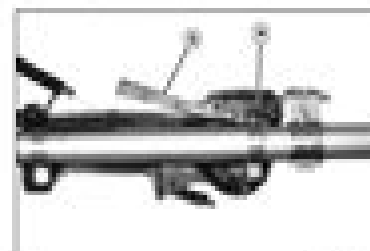

3. Carefully remove throttle trigger and spring (B).
4. Remove throttle safety interlock (C) and spring.
5. Remove ignition switch slider (D).
6. Remove ignition switch contact from control housing post.

7. Ignition switch contacts (E and F) are part of the wiring harness and must be replaced as an assembly.

**Installation:**

1. If removed, install wiring harness.

2. Place throttle interlock (C) and spring (B) into control housing halves.

3. Install throttle trigger and spring into control housing halves.
4. Engage wire and cable routing in correct, place other control housing half over assembly. Confirm free operation of control switch, throttle interlock, and throttle trigger.
5. Secure the two halves together with the four screws.

**Starter Removal, Disassembly, and Assembly**

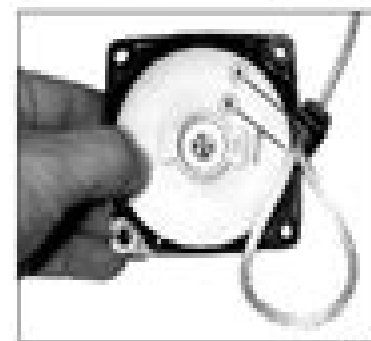

No regular maintenance is required for this assembly. However, it may become necessary to add a turn of starter spring tension if the rope fails to retract all the way into the housing.

1. Disconnect spark plug wire.
2. Remove the screws retaining starter assembly to motorhead.
3. Remove the recoil starter from starter base.

**To Increase Spring Tension:**

**NOTE:** XT100LE, XT100BLE models shown in this procedure. Other models similar.

1. Hold the housing. Pull the grip (not about 20 cm / 8 in) and hold pulley to keep it from rewinding.
2. Pull grip further or let pulley slip until notch in pulley rim is opposite the rope insert in the housing.

3. Pull up a loop of rope between notch (A) and notch (B). Engage rope in notch. Carefully wind both pulley and rope counterclockwise by feeding and pulling the rope counterclockwise around the pulley - one turn only. Hold pulley to keep it from rewinding.

**NOTE:** The rope pulley must be able to be rotated by at least one-half of an extra turn with the rope fully extended or the retracted spring will probably break.
