A novel that is not like a novel. It's about one old and one novice fishermen and a young woman. They are talking about the details of surf fishing for striped bass, a striped bass tagging program, government data on the "catch" and the recent story of a world record striper. The woman goes and comes back to unite her striped bass story with the two fishermen. While the two fishermen slouch in the surf, she is trying to save the species in California. Who gets the water is critical. Hard bound with jacket A book that reveals the untold story of one of Long Island's most controversial and eccentric striped bass fishermen. "Night Tides" is as much a tale of nature's gifts too often taken-for-granted, as it is one of blinding individual obsession. This is an eye-opening account of the black market striped bass industry, and a vivid portrayal of one man's fishing addiction that contributed to it. With chapters like "The Full Moon Beckons Like a Crack Pipe", the reader is drawn into the world of obsessive striped bass fishing and this angler's eventual descent into the underground market to support the ever-growing expenses of his fishing habit. But it's the striped bass as a species that suffers the most as stocks are once again pushed into decline. -John Skinner, Noreast.com, author of _A Season on the Edge_ Caught is a nervy, quotable, important expose, full of lively anecdotes, marginal colorful characters... -Joan Baum, NPR The latest book from the author of Black Spruce Stream, an Amazon Bestseller Maine to Montauk chronicles the author's life and pursuit of Striped Bass along the Atlantic coast over six decades, complete with all the entertaining stories, adventures, and characters he's met and befriended along the way. The definitive book for those who love to pursue this magnificent gamefish, told as only a legendary fisherman such as Burns can tell. As David DiBenedetto, author of On the Run: An Angler's Journey Down the Striper Coast notes, Brad is "equal parts diehard angler and devoted conservationist, with a passion for the fish that unites us all." Burns is known for his detailed and meticulous fishing logs, which imbues the book with the substance to talk authoritatively about the species decline and the hope for the future. How many striped bass of 60 pounds or more have you heard about? How about 70 pounds? Read the passion, dedication and plain luck to be at the right place and time. You can't plan on catching one of these giants but you can read why planning was important. Fishermen wrote these stories, about their feelings, the problems, the what if, the biggest one lost, 200 pounds of bass and.. You will wish you were there! These are precious stories because you can't find many of these fishermen and women. Some have passed on, many have moved, others are just lost in the big cities or elsewhere. With so few big bass anglers found and so few big bass caught, it is truly a rare event to have the true stories from the fishermen who caught these giants. These are the best striper anglers from boat, surf or jetty; it was their livelihood. All of them and all others in 60+ pound class are listed in the book. Some of them have disclosed the secrets they used to catch their record striped bass. It took decades of experience to find these gems. Use them yourself. T.C. Associates, Box 351, West Point, PA. 19486 email: tchecko@msn.com Each autumn, one of nature's most magnificent dramas plays out when striped bass undertake a journey, from the northeastern United States to the Outer Banks of North Carolina, in search of food and warmer seas. Writer and angler David DiBenedetto followed this great migration -- the fall run -- for three months in the autumn of 2001. On the Run offers vivid portrayals of the zany and obsessive characters DiBenedetto met on his travels -- including the country's most daring fisherman, an underwater videographer who chucked his corporate job in favor of filming striped bass, and the reclusive angler who claims that catching the world-record striper in 1982 sent his life into a tailspin. Along his route, DiBenedetto also delves into the natural history and biology of this great game fish, and depicts the colorful cultures of the seaside communities where the striped bass reigns supreme. In the long and rich history of saltwater fishing, few species are as close to the hearts of anglers as the mighty striped bass. More than two dozen of the best striper anglers and writers from On The Water magazine tell you how, where and when to catch this storied gamefish. Also included are insights into the culture and personalities that make striper fishing a lifelong pursuit for many along the beaches and rocky ledges, and in the rips off coastal New England. Lifelong fisherman and author Bill Sisson takes us on a journey to fish the finest striped bass waters along the Atlantic coast. This is the story of America's beloved saltwater sport fish and the millions of anglers who pursue them. Drawing on three decades of notebooks full of observations and interviews, as well as hundreds of hours spent pursuing the "striper," "linesider," or "rockfish"—as they are known regionally—through each season, from spring through late fall. The essays and photographs illuminate the fish through these seasons and highlight their pursuit from the surf and boats, day and night. Accompanying essays, or fish tales, are told in Sisson's unmistakably authentic voice and share stories of history, the seasons, and friendships. These tales transport us from the Gulf of Maine to Albemarle Sound in North Carolina, and from the Chesapeake Bay to Montauk, the Jersey Shore, Martha's Vineyard, and Cape Cod. A moving tribute to the striped bass and the hardy men who fish for them. "The Big One is to competitive fishing what Friday Night Lights was to high school football." —News & Record (Greensboro) A Forbes Best Sports Book of the Year Published to rave reviews in hardcover and purchased by DreamWorks in a major film deal, The Big One is a spellbinding and richly atmospheric work by a Pulitzer Prize-winning journalist. Here is the story of a community—Martha's Vineyard, Massachusetts—and a sporting event—the island's legendary Striped Bass and Bluefish Derby—that is rendered with the same depth, color, and emotional power of the best fiction. Among the characters, we meet: Dick Hathaway, a crotchety legend who once caught a bluefish from a helicopter and was ultimately banned for cheating; Janet Messineo, a recovering alcoholic who says that striped bass saved her life; Buddy Vanderhoop, a boastful Native American charter captain who guides celebrity anglers like Keith Richards and Spike Lee; and Wyatt Jenkinson, a nine-year-old fishing fanatic whose mother is battling brain cancer. At the center of it all is five-time winner Lev Wlodyka, a cagey local whose next fish will spark a storm of controversy and throw the tournament into turmoil. "The Big One is a rollicking true story of a grand American obsession. You don't have to be a fisherman to relish David Kinney's marvelous account of the annual striper madness on Martha's Vineyard, or his unforgettable portraits of the possessed. It's a fine piece of journalism, rich with color and suspense." —Carl Hiaasen, New York Times—bestselling author NEW YORK TIMES BESTSELLER • In the eighth book in The Iron Druid Chronicles, two-thousand-year-old Druid Atticus O'Sullivan faces the clan of vampires who have been bent on destroying him—including Leif, his former best friend turned enemy. When a Druid lives as long as Atticus does, he's bound to run afoul of a few vampires—make that legions of them. Even his former friend and legal counsel turned out to be a bloodsucking backstabber. Now the toothy troublemakers—led by power-mad pain-in-the-neck Theophilus—are no longer content to live undead and let live. Atticus needs to make a point—and drive it into a vampire's heart. As always, Atticus wouldn't mind a little backup. But his allies have problems of their own. Ornerly archdruid Owen Kennedy is having a wee bit of troll trouble: Turns out when you stiff a troll, it's not water under the bridge. Meanwhile, Granuaile is desperate to free herself of the Norse god Loki's mark and elude his powers of divination—a quest that will bring her face-to-face with several Slavic nightmares. As Atticus globe-trots to stop his vampire nemesis, the journey leads to Rome. What better place to end an immortal than the Eternal City? But poetic justice won't come without a price: In order to defeat Theophilus, Atticus may have to lose an old friend. Don't miss any of The Iron Druid Chronicles: HOUNDED | HEXED | HAMMERED | TRICKED | TRAPPED | HUNTED | SHATTERED | STAKED | SCOURGED | BESIEGED It's the first day of school, and Camilla discovers that she is covered from head to toe in stripes, then polka-dots, and any other pattern spoken aloud! With a little help, she learns the secret of accepting her true self, in spite of her peculiar ailment. This is the fishing book every game fisher should have! ISLAND STRIPERS is a result of the author's 45 years of fishing Block Island's waters and his offered contentions supported by science. This effort is filled with insights into its history and unique geology, its tides and currents, early native fishing, updates in striper biology and evolution, detailed day and night, surf and boat angling, striper diseases, major action spots and techniques, popular baits, recent record-breaking fish, fly and surf fishing interviews, forage species, various tagging agencies, results of his striper tagging, vessels used, and much, much more.... Early in 2012 he was selected for induction into the IGFA's World Fishing Hall of Fame, a result of his career tagging nearly 60,000 documented game fish for science, thanks to help from clients and friends. Of these 43,000 were striped bass for the American Littoral Society (ALS), the remainder for the National Marine Fisheries Service (NMFS), which included bluefin tuna, various billfish and shark species. Back in 2011 SPORTFISHING magazine commenced their annual Making A Difference

(MAD) Campaign, to identify fifty individuals nationwide who made significant contributions to sport fishing. Capt. Al Anderson was announced as one of their five winners. He is a well-known New England charter skipper, author, lecturer and conservationist, long recognized for his ethic of marking game fish for science. "This is an eye-opening account of the black market striped bass industry, and a vivid portrayal of one man's fishing addiction that contributed to it. With chapters like "The Full Moon Beckons Like a Crack Pipe", the reader is drawn into the world of obsessive striped bass fishing and this angler's eventual descent into the underground market to support the ever-growing expenses of his fishing habit. But it's the Striped Bass as a species that suffers the most as stocks are once again pushed into decline."-John Skinner, Noreast.com, author of *A Season on the Edge* A personal and wide-ranging history of America's unofficial national gamefish. When populations of striped bass began plummeting in the early 1980s, author and fisherman Dick Russell was there to lead an Atlantic coast conservation campaign that resulted in one of the most remarkable wildlife comebacks in the history of fisheries. As any avid fisherman will tell you, the striped bass has long been a favorite at the American dinner table; in fact, we've been feasting on the fish from the time of the Pilgrims. By 1980 that feasting had turned to overfishing by commercial fishing interests. *Striper Wars* is Dick Russell's inspiring account of the people and events responsible for the successful preservation of one of America's favorite fish and of what has happened since. *Striper Wars* is a tale replete with heroes--and some villains--as the struggle to save the striper migrated down the coast from Massachusetts to Maryland. Russell introduces us to a postman at arms against a burly trap-net fisherman, a renowned state governor caving to special interests, and a fishing-tackle maker fighting alongside marine biologists. And he describes how champions of this singular fish blocked power plants and New York's Westway Project that would otherwise compromise its habitat. Unfortunately, those who cheered the triumphant ending to the campaign, as the coastal states enacted measures that enabled the striped bass to make its comeback, have found the peace transitory--there is now a new enemy emerging on the front. In recent years a chronic bacterial disease has struck more than seventy percent of the striped bass population in the primary spawning waters of the Chesapeake Bay. Malnutrition seems to be a significant factor, brought on by the same overfishing that plagued the bass in the first battle--only this time, the overfishing is devastating menhaden, the silvery little fish upon which the bass feed. Lessons learned during the first conservation battle are being applied here, highlighting a need for a whole new ecosystem-based approach to conserving species. Only with constant vigilance by concerned citizens, Dick Russell reminds us, can environmental victories be sustained. This particular fish story is a personal one for him, and he follows the striper's saga today all the way to California, where the fish was introduced in 1879 and where agribusiness now threatens its future. For his conservation work during the 1980s Russell received a citizen's Chevron Conservation Award. From the quiet back bays to the pounding surf, fishing writer and videographer, John Skinner, takes the reader along on a relentless pursuit of striped bass from the shore. With his trademark writing style that makes readers feel as though they're standing at the water's edge, Skinner cuts through the complexity of choosing and presenting the various lure styles while processing the interaction of weather and water conditions that impact baitfish movements and game fish behavior. In portions of the book focused on hunting the largest stripers, Skinner goes beyond the artificials arsenal to take an in-depth look at fishing with live and rigged eels. Chapters are dedicated to fluke and false albacore fishing as well. The book is enhanced by videos organized by chapter on the book's companion website, StriperPursuit.com. Experiments were conducted to determine the effect of abrupt temperature and salinity changes on adult and juvenile striped bass (*Morone saxatilis*) and American shad (*Alosa sapidissima*). Transfers were made at specific temperature and salinity differences over the range 45° to 80° F. and 0 to 35‰. Adult and juvenile striped bass were tolerant to transfers between salt and fresh water at most temperature differences. Adult shad were tolerant to transfers from fresh to salt water and displayed some tolerance to transfers from salt to fresh water at limited temperature differences. Juvenile shad survived salinity and temperature differences from salt to fresh water, but did not survive these differences from fresh to salt water. This lively narrative describes the author's dedication to the preservation of the striped bass as well as his effort to expose the chicanery of politicians who fought to defeat management bills designs to save the fish.
