Frankenstein's Cat Cuddling Up To Biotechs Brave New Beasts Emily Anthes

Frankenstein's Cat Emily Anthes, 2013-03-12 Winner of 2014 AAAS Subaru SB F Prize for Best Young Adult Science Book Longlisted for the PEN E O Wilson Literary Science Writing Award One of Nature's Summer Book Picks One of Publishers Weekly's Top Ten Spring 2013 Science Books For centuries we've toyed with our creature companions breeding dogs that herd and hunt housecats that look like tigers and teacup pigs that fit snugly in our handbags But what happens when we take animal alteration a step further engineering a cat that glows green under ultraviolet light or cloning the beloved family Labrador Science has given us a whole new toolbox for tinkering with life How are we using it In *Frankenstein's Cat* the journalist Emily Anthes takes us from petri dish to pet store as she explores how biotechnology is shaping the future of our furry and feathered friends As she ventures from bucolic barnyards to a frozen zoo where scientists are storing DNA from the planet's most exotic creatures she discovers how we can use cloning to protect endangered species craft prosthetics to save injured animals and employ genetic engineering to supply farms with disease resistant livestock Along the way we meet some of the animals that are ushering in this astonishing age of enhancement including sensor wearing seals cyborg beetles a bionic bulldog and the world's first cloned cat Through her encounters with scientists conservationists ethicists and entrepreneurs Anthes reveals that while some of our interventions may be trivial behold the GloFish others could improve the lives of many species including our own So what does biotechnology really mean for the world's wild things And what do our brave new beasts tell us about ourselves With keen insight and her trademark spunk Anthes highlights both the peril and the promise of our scientific superpowers taking us on an adventure into a world where our grandest science fiction fantasies are fast becoming reality *Frankenstein's Cat* Emily Anthes, 2013-03-12 A report from the frontiers of the scientific campaign to reengineer animals to fulfill human desires Dust jacket back [The Great Indoors](#) Emily Anthes, 2020-06-23 An Architectural Record Notable Book A fascinating thought provoking journey into our built environment Modern humans are an indoor species We spend 90 percent of our time inside shuttling between homes and offices schools and stores restaurants and gyms And yet in many ways the indoor world remains unexplored territory For all the time we spend inside buildings we rarely stop to consider How do these spaces affect our mental and physical well being Our thoughts feelings and behaviors Our productivity performance and relationships In this wide ranging character driven book science journalist Emily Anthes takes us on an adventure into the buildings in which we spend our days exploring the profound and sometimes unexpected ways that they shape our lives Drawing on cutting edge research she probes the pain killing power of a well placed window and examines how the right office layout can expand our social networks She investigates how room temperature regulates

our cognitive performance how the microbes hiding in our homes influence our immune systems and how cafeteria design affects what and how much we eat Along the way Anthes takes readers into an operating room designed to minimize medical errors a school designed to boost students physical fitness and a prison designed to support inmates psychological needs And she previews the homes of the future from the high tech houses that could monitor our health to the 3D printed structures that might allow us to live on the Moon The Great Indoors provides a fresh perspective on our most familiar surroundings and a new understanding of the power of architecture and design It s an argument for thoughtful interventions into the built environment and a story about how to build a better world one room at a time

Instant Egghead Guide: The Mind Emily Anthes,Scientific American,2008-12-23 Everything from neurons to consciousness in the blink of an eye which takes 300 milliseconds Take a fantastic voyage through the whorls and curves of the human brain no miniaturization required Learn everything from how quickly you can possibly think and that left handed people think faster to why being bad feels so good yes there s a biochemical explanation Whether you re a fan of Scientific American s wildly popular 60 Second Science podcast or just curious about science you re going to love the tingly way your synapses feel after enjoying the same bite sized knowledge in The Instant Egghead Guide to the Mind

Animal Madness Laurel Braitman,2014-06-10 For the first time a historian of science draws evidence from across the world to show how humans and other animals are astonishingly similar when it comes to their feelings and the ways in which they lose their minds

Touch David J. Linden,2016-01-26 The New York Times bestselling author of The Compass of Pleasure examines how our sense of touch is interconnected with our emotions Dual function receptors in our skin make mint feel cool and chili peppers hot

Cat Wars Peter P. Marra,Chris Santella,2016-09-20 Why our cats are a danger to species diversity and human health In 1894 a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles In just over a year the Stephens Island Wren a rare bird endemic to the island was rendered extinct Mounting scientific evidence confirms what many conservationists have suspected for some time that in the United States alone free ranging cats are killing birds and other animals by the billions Equally alarming are the little known but potentially devastating public health consequences of rabies and parasitic Toxoplasma passing from cats to humans at rising rates Cat Wars tells the story of the threats free ranging cats pose to biodiversity and public health throughout the world and sheds new light on the controversies surrounding the management of the explosion of these cat populations This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership along the way accessibly explaining the science of extinction population modeling and feline diseases It charts the developments that have led to our present impasse from Stan Temple s breakthrough studies on cat predation in Wisconsin to cat eradication programs underway in Australia today It describes how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change Cat Wars paints a

revealing picture of a complex global problem and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free ranging cats

The Summer Prince Alaya Dawn Johnson,2013-03-01 A heart stopping story of love death technology and art set amid the tropics of a futuristic Brazil The lush city of Palmares Tres shimmers with tech and tradition with screaming gossip casters and practiced politicians In the midst of this vibrant metropolis June Costa creates art that s sure to make her legendary But her dreams of fame become something more when she meets Enki the bold new Summer King The whole city falls in love with him including June s best friend Gil But June sees more to Enki than amber eyes and a lethal samba She sees a fellow artist

Life at the Speed of Light J. Craig Venter,2014-09-30 Venter instills awe for biology as it is and as it might become in our hands Publishers Weekly On May 20 2010 headlines around the world announced one of the most extraordinary accomplishments in modern science the creation of the world s first synthetic lifeform In Life at the Speed of Light scientist J Craig Venter best known for sequencing the human genome shares the dramatic account of how he led a team of researchers in this pioneering effort in synthetic genomics and how that work will have a profound impact on our existence in the years to come This is a fascinating and authoritative study that provides readers an opportunity to ponder afresh the age old question What is life at the dawn of a new era of biological engineering

Brilliant Blunders Mario Livio,2014-05-27 Drawing on the lives of five great scientists Charles Darwin William Thomson Lord Kelvin Linus Pauling Fred Hoyle and Albert Einstein scientist author Mario Livio shows how even the greatest scientists made major mistakes and how science built on these errors to achieve breakthroughs especially into the evolution of life and the universe

How to Tame a Fox (and Build a Dog) Lee Alan Dugatkin,Lyudmila Trut,2019-04-14 Tucked away in Siberia there are furry four legged creatures with wagging tails and floppy ears that are as docile and friendly as any lapdog But despite appearances these are not dogs they are foxes They are the result of the most astonishing experiment in breeding ever undertaken imagine speeding up thousands of years of evolution into a few decades In 1959 biologists Dmitri Belyaev and Lyudmila Trut set out to do just that by starting with a few dozen silver foxes from fox farms in the USSR and attempting to recreate the evolution of wolves into dogs in real time in order to witness the process of domestication This is the extraordinary untold story of this remarkable undertaking Most accounts of the natural evolution of wolves place it over a span of about 15 000 years but within a decade Belyaev and Trut s fox breeding experiments had resulted in puppy like foxes with floppy ears piebald spots and curly tails Along with these physical changes came genetic and behavioral changes as well The foxes were bred using selection criteria for tameness and

with each generation they became increasingly interested in human companionship Trut has been there the whole time and has been the lead scientist on this work since Belyaev's death in 1985 and with Lee Dugatkin biologist and science writer she tells the story of the adventure science politics and love behind it all In *How to Tame a Fox* Dugatkin and Trut take us inside this path breaking experiment in the midst of the brutal winters of Siberia to reveal how scientific history is made and continues to be made today To date fifty six generations of foxes have been domesticated and we continue to learn significant lessons from them about the genetic and behavioral evolution of domesticated animals *How to Tame a Fox* offers an incredible tale of scientists at work while also celebrating the deep attachments that have brought humans and animals together throughout time

Biotechnology Unzipped A Joseph Henry Press book, Eric S. Grace, 2006-08-26 In this update to the very popular first edition of the same name skilled science popularizer Eric Grace helps readers understand what biotechnology is and what implications it holds for all of us Following on the heels of the success of the first edition this thoroughly updated version offers an in depth and accessible review of the basics of biotechnology Accomplished science communicator Eric Grace focuses on the ethical implications involved the wide range of public opinions both at home and abroad the role of the media in communicating a complicated science topic and the formidable problems associated with patenting life itself With an emphasis on medicine agriculture and the environment Grace explores the promises and realities of biotechnology He deals frankly with the fact that biotechnology is first and foremost a commercial activity often driven by big business and directed by the bottom line And as biotechnology is used more frequently in medical diagnosis and treatment we are witness to significant setbacks and reversals dimming hopes that were prevalent when the first edition was released But we are also witness to the burgeoning use of the technology in forensic science where DNA analysis has become commonplace in solving crimes Likewise DNA analysis has been a boon to studies of human history and evolution revealing ancient details originally thought lost to us At the same time new uses for genetically altered bacteria are being discovered that help us clean up the environment by breaking down or sequestering toxic chemicals While the public remains concerned about biotechnology there is increasing awareness of the potential benefits This updated edition of *Biotechnology Unzipped* helps put the many issues in perspective and provides answers to the most important questions

Junk DNA Nessa Carey, 2015-03-05 From the author of the acclaimed *The Epigenetics Revolution* A book that would have had Darwin swooning *Guardian* comes another thrilling exploration of the cutting edge of human science For decades after the structure of DNA was identified scientists focused purely on genes the regions of the genome that contain codes for the production of proteins Other regions 98% of the human genome were dismissed as junk But in recent years researchers have discovered that variations in this junk DNA underlie many previously intractable diseases and they can now generate new approaches to tackling them Nessa Carey explores for the first time for a general audience the incredible story behind a controversy that has generated unusually vituperative public exchanges between scientists She shows how junk DNA plays an important role

in areas as diverse as genetic diseases viral infections sex determination in mammals human biological complexity disease treatments even evolution itself and reveals how we are only now truly unlocking its secrets more than half a century after Crick and Watson won their Nobel prize for the discovery of the structure of DNA in 1962

Beggars in Spain Nancy Kress, 2017 Leisha Camden is a genetically engineered Sleepless Her ability to stay awake all the time has not only made her more productive but the genetic modifications have also given the Sleepless a higher IQ and may even make them immortal Are they the future of humanity Or will the small community of sleepless be hunted down as freaks by a world that has grown wary of its newest creation Page 4 of cover

[The Last Unicorn](#) William deBuys, 2015-03-10 An award winning author's quest to find and understand a creature as rare and enigmatic as any on Earth In 1992 in a remote mountain range a team of scientists discovered the remains of an unusual animal with exquisite long horns It turned out to be a living species new to Western science a saola the first large land mammal discovered in fifty years Rare then and rarer now a live saola had never been glimpsed by a Westerner in the wild when Pulitzer Prize finalist and nature writer William deBuys and conservation biologist William Robichaud set off to search for it in central Laos Their team endured a punishing trek up and down white water rivers and through mountainous terrain ribboned with the snare lines of armed poachers who roamed the forest stripping it of wildlife In the tradition of Bruce Chatwin Colin Thubron and Peter Matthiessen *The Last Unicorn* chronicles deBuys's journey deep into one of the world's most remote places It's a story rich with the joys and sorrows of an expedition into undiscovered country pursuing a species as rare and elusive as the fabled unicorn As is true with the quest for the unicorn in the end the expedition becomes a search for something more the essence of wildness in nature evidence that the soul of a place can endure and the transformative power of natural beauty

What's Wrong with Homosexuality? John Corvino, 2013-02-01 For the last twenty years John Corvino widely known as the author of the weekly column *The Gay Moralist* has traversed the country responding to moral and religious arguments against same sex relationships In this timely book he shares that experience addressing the standard objections to homosexuality and offering insight into the culture wars more generally Is homosexuality unnatural Does the Bible condemn it Are people born gay and should it matter either way Corvino approaches such questions with precision sensitivity and good humor In the process he makes a fresh case for moral engagement forcefully rejecting the idea that morality is a private matter This book appears at a time when same sex marriage is being hotly debated across the U S Many people object to such marriage on the grounds that same sex relationships are immoral or at least that they do not deserve the same social recognition as heterosexual

relationships Unfortunately the traditional rhetoric of gay rights advocates which emphasizes privacy and tolerance fails to meet this objection Legally speaking when it comes to marriage tolerance might be enough Corvino concedes but socially speaking marriage requires more Marriage is more than just a relationship between two individuals recognized by the state It is also a relationship between those individuals and a larger community The fight for same sex marriage ultimately is a fight for full inclusion in the moral fabric What is needed is a positive case for moral approval which is what Corvino unabashedly offers here Corvino blends a philosopher s precision with a light touch that is full of humanity and wit This volume captures the voice of one of the most rational participants in a national debate noted for generating more heat than light

Eco-Phenomenology Charles S. Brown, Ted Toadvine, 2012-02-01 This groundbreaking collection explores the intersection of phenomenology with environmental philosophy It examines the relevance of Husserl Heidegger Merleau Ponty and Levinas for thinking through the philosophical dilemmas raised by environmental issues and then proposes new phenomenological approaches to the natural world The contributors demonstrate phenomenology s need to engage in an ecological self evaluation and to root out anthropomorphic assumptions embedded in its own methodology Calling for a reexamination of beliefs central to the Western philosophical tradition this book shifts previously marginalized environmental concerns to the forefront and blazes a trail for a new collaboration between phenomenologists and ecologically minded theorists
