A Sámi woman studying Alaska fish populations sees our past and future through their present signs of stress and her ancestral knowledge. A teenager faces a permanent drought in Australia and her own sexual desire. An unemployed man in Wisconsin marvels as a motley parade of animals makes his trailer their portal to a world untrammelled by humans. Featuring short fiction from authors around the globe, *Fire & Water: Stories from the Anthropocene* takes readers on a rare journey through the physical and emotional landscape of the climate crisis--not in the future, but today. By turns frightening, confusing, and even amusing, these stories remind us how complex, and beautiful, it is to be human in these unprecedented times. All three books in the American Book Award-winning *Memory of Fire Trilogy* available in a single volume for the first time. Eduardo Galeano's *Memory of Fire Trilogy* defies categorization—or perhaps creates its own. It is a passionate, razor-sharp, lyrical history of North and South America, from the birth of the continent's indigenous peoples through the end of the twentieth century. The three volumes form a haunting and dizzying whole that resurrects the lives of Indians, conquistadors, slaves, revolutionaries, poets, and more. The first book, *Genesis*, pays homage to the many origin stories of the tribes of the Americas, and paints a verdant portrait of life in the New World through the age of the conquistadors. The second book, *Faces and Masks*, spans the two centuries between the years 1700 and 1900, in which colonial powers plundered their newfound territories, ultimately giving way to a rising tide of dictators. And in the final installment, *Century of the Wind*, Galeano brings his story into the twentieth century, in which a fractured continent enters the modern age as popular revolts blaze from North to South. This celebrated series is a landmark of contemporary Latin American writing, and a brilliant document of culture. *Brannigan's Building Construction for the Fire Service, Fourth Edition* is a must read for fire fighters, prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of *Building Construction for the Fire Service* was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: "Know your buildings," informs every aspect of this new edition of the text. Listen to a Podcast with Brannigan's *Building Construction for the Fire Service, Fourth Edition* co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Brannigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition. In *Cuban Fire*, the prize-winning author Isabelle Leymarie tells the thrilling story of popular music of Cuban origin and its major artists from the 1920s to today. Afro-Cuban music derives its richness from the fusion of many cultures. On the island of tobacco, rum and coffee, nicknamed 'The Green Caiman' because of its long and curvy shape, the wedding of sacred and secular African musical genres with Spanish and French melodies gave rise to numerous genres that have gained international fame- son, rumba, guaracha, conga, mambo, cha-cha-cha, pachanga, and nueva timba. The history of Cuban music also unfolds in the United States, where large Cuban, Puerto Rican, Dominican and other Hispanic communities have established themselves over the years. It was in New York, indeed, that the boogaloo, salsa and Latin jazz, created by such musicians as Machito, Mario Bauz , Dizzy Gillespie and Chano Pozo, emerged out of the contact with the Puerto Ricans and African-Americans of that city. This major reference book also deals with the incandescent rhythms of Puerto Rico and -- to a lesser degree -- Santo Domingo, integrated today into salsa and Latin jazz. Unlike the earthquakes and hurricanes that have influenced Caribbean history, the region's fires have almost always been caused by humans. Geographer Bonham C. Richardson explores the effects of fire in the social and ecological history of the British Lesser Antilles, from the British Virgin Islands south to Trinidad. Focusing on the late nineteenth century, leading to the 1905 withdrawal of British military forces from the region, Richardson shows how fire-lit social upheavals served as forerunners of political independence movements. Drawing on Caribbean and London archives as well as years of fieldwork, Richardson examines how villagers used, modified, and contemplated fire in part to vent their frustrations with a savage economic depression and social and political inequities imposed from afar. He examines fire in all its forms, from protest torches to sugarcane fires that threatened the islands' economic staple. Richardson illuminates a neglected period in Caribbean history by showing how local uses of fire have been catalysts and even causes of important changes in the region. A biodiversity hotspot, Florida is home to many ecosystems and species that evolved in the presence of frequent fire. In this book, Reed Noss discusses the essential role of fire in generating biodiversity and offers best practices for using fire to keep the region's ecosystems healthy and resilient. Reviewing several lines of evidence, Noss shows that fire has been important to the southeastern Coastal Plain for tens of millions of years. He explains how the region's natural fire regimes are connected to its climate, high rate of lightning strikes, physical chemistry, and vegetation. But urbanization and active fire suppression have reduced the frequency and extent of fires. Noss suggests the practice of controlled burning can and should be improved to protect fire-dependent species and natural communities from decline and extinction. Noss argues that fire managers should attempt to simulate natural fire regimes when conducting controlled burns. Based on what the species of the Southeast likely experienced during their evolutionary histories, he makes recommendations about pyrodiversity, how often and in what seasons to burn, the optimal heterogeneity of burns, mechanical treatments such as cutting and roller-chopping, and the proper use of fuel breaks. In doing so, Noss is the first to apply the new discipline of evolutionary fire ecology to a specific region. This book is a fascinating history of fire ecology in Florida, an enlightening look at why fire matters to the region, and a necessary resource for conservationists and fire managers in the state and elsewhere. A powerful, haunting, vivid, and provocative collection of short fiction by Latin American women. In 1808, world history took a decisive turn when Napoleon occupied Spain and Portugal, a European event that had lasting repercussions more than half the world away,

sparking a series of revolutions throughout the Spanish and Portuguese empires of the New World. These wars for independence resulted eventually in the creation of nineteen independent Latin American republics. Here is an engagingly written, compact history of the Latin American wars of independence. Proceeding almost cinematically, scene by vivid scene, John Charles Chasteen introduces the reader to lead players, basic concepts, key events, and dominant trends, braided together in a single, taut narrative. He vividly depicts the individuals and events of those tumultuous years. Here are the famous leaders--Simon Bolivar, Jose de San Martin, and Bernardo O'Higgins, Father Hidalgo and Father Morelos, and many others. Here too are lesser known Americans: patriot women such as Manuela Saenz, Leona Vicario, Mariquita Sanchez, Juana Azurduy, and Policarpa Salavarrieta, indigenous rebels such as Mateo Pumacahua, and African-descended generals such as Vicente Guerrero and Manuel Piar. Chasteen captures the gathering forces for independence, the clashes of troops and decisions of leaders, and the rich, elaborate tapestry of Latin American societies as they embraced nationhood. By the end of the period, the leaders of Latin American independence would embrace classical liberal principles--particularly popular sovereignty and self-determination--and permanently expanding the global reach of Western political values. Today, most of the world's oldest functioning republics are Latin American. And yet, Chasteen observes, many suffer from a troubled political legacy that dates back to their birth. In this book, he illuminates this legacy, even as he illustrates how the region's dramatic struggle for independence points unmistakably forward in world history.

The most readable, highly regarded, and affordable history of Latin America for our times. An unflinching look at nineteenth- and twentieth-century African American leaders and their visionary legacies. In an accessible, conversational format, Cornel West, with distinguished scholar Christa Buschendorf, provides a fresh perspective on six revolutionary African American leaders: Frederick Douglass, W. E. B. Du Bois, Martin Luther King Jr., Ella Baker, Malcolm X, and Ida B. Wells. In dialogue with Buschendorf, West examines the impact of these men and women on their own eras and across the decades. He not only rediscovers the integrity and commitment within these passionate advocates but also their fault lines. West, in these illuminating conversations with the German scholar and thinker Christa Buschendorf, describes Douglass as a complex man who is both "the towering Black freedom fighter of the nineteenth century" and a product of his time who lost sight of the fight for civil rights after the emancipation. He calls Du Bois "undeniably the most important Black intellectual of the twentieth century" and explores the more radical aspects of his thinking in order to understand his uncompromising critique of the United States, which has been omitted from the American collective memory. West argues that our selective memory has sanitized and even "Santaclausified" Martin Luther King Jr., rendering him less radical, and has marginalized Ella Baker, who embodies the grassroots organizing of the civil rights movement. The controversial Malcolm X, who is often seen as a proponent of reverse racism, hatred, and violence, has been demonized in a false opposition with King, while the appeal of his rhetoric and sincerity to students has been sidelined. Ida B. Wells, West argues, shares Malcolm X's radical spirit and fearless speech, but has "often become the victim of public amnesia." By providing new insights that humanize all of these well-known figures, in the engrossing dialogue with Buschendorf, and in his insightful introduction and powerful closing essay, Cornel West takes an important step in rekindling the Black prophetic fire. "A dynamic record of Evangelist Sumrall's good will crusade in which he brought the Gospel to Latin America."--Dust jacket flap PRAISE FOR THE PREVIOUS EDITIONS: "Rare is the book in English that provides a general overview of Latin America and the Caribbean. Rarer still is the good, topical, and largely dispassionate book that contributes to a better understanding of the rest of the hemisphere. Peter Winn has managed to produce both."—Miami Herald "This magisterial work provides an accessible and engaging introduction to the complex tapestry of contemporary Latin America and the Caribbean."—Foreign Affairs "A clear, level-headed snapshot of a region in transition.... Winn is most interesting when he discusses the larger issues and to his credit he does this often."—Washington Post Book World "Balanced and wide-ranging.... After canvassing the legacies of the European conquerors, Winn examines issues of national identity and economic development.... Other discussions survey internal migration, the role of indigenous peoples, the complexity of race relations, and the treatment of women." —Publishers Weekly The third of a three-part study of Latin American history, focusing on events and people of the twentieth century. In the 1990s, churches across the southeastern United States were targeted and set ablaze. These arsonists predominately targeted African American congregations and captured the attention of the media nationwide. Using oral histories, newspaper accounts, and governmental reports, Christopher Strain gives a chronological account of the series of church fires. Burning Faith considers the various forces at work, including government responses, civil rights groups, religious forces, and media coverage, in providing a thorough, comprehensive analysis of the events and their fallout. Arguing that these church fires symbolize the breakdown of communal bonds in the nation, Strain appeals for the revitalization of united Americans and the return to a sense of community. Combining scholarly sophistication with popular readability, Strain has produced one of the first histories of the last decade and demonstrates that the increasing fragmentation of community in America runs deeper than race relations or prejudice. A volume in the series Southern Dissent, edited by Stanley Harrold and Randall M. Miller "Nothing less than a unified history of the Western Hemisphere." —The New Yorker From Guatemala to Rio de Janeiro, La Paz to New York City, Managua to Havana, Century of the Wind ties together the events and people—both large and small—that define the Americas. In hundreds of lyrical and vivid narratives, the final installment of Galeano's indispensable trilogy sees the building of the Panama Canal, the disenfranchisement of indigenous peoples living over Colombia's oil fields, the creation of Superman and the heyday of Faulkner, and coups and upheavals that cleaved an already fragmented continent. Galeano's elegy moves year by year through the century of Castro, Picasso, and Reagan, blending the

many voices and varying locales of North and South America and forming a history that is stunning in its scope and savage beauty. “An epic work of literary creation . . . There could be no greater vindication of the wonders of the lands and people of Latin America than *Memory of Fire*.” —The Washington Post Eduardo Galeano’s monumental three-volume retelling of the history of the New World begins with Genesis, a vast chain of legends sweeping from the birth of creation to the era of savage colonialism. Through lyrical prose and deep understanding, Galeano (author of the celebrated *Open Veins of Latin America*) recounts creation myths, pre-Columbian societies, and the brutality of conquest, from the Andes to the Great Plains. Galeano’s project to restore to history “breath, liberty, and the word” unfolds as a unique, powerful work of literature. This daring masterpiece sets the past free, weaving a new kind of history from mythology, silenced voices, and the clash of worlds. Genesis is the first book of the *Memory of Fire* trilogy, which continues with *Faces and Masks* and *Century of the Wind*. Latin America is home to both the amazing Amazon rain forest and areas of desert where rain has never been recorded. Readers will learn about the varied landscapes of Latin America, from the Atacama Desert to the brilliant Caribbean coasts to the awesome Andes Mountains. In learning about major cities, such as Mexico City, readers will discover the ways people have changed the Earth to fit their needs, and the challenges they’ve faced in doing so. How has the geography of Latin America changed, and what lies ahead as climates change and people develop the land? Readers will discover the answers through maps, fact-filled text, sidebars, and fantastic photographs of Latin America. [In this book, the author’s] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of . . . Latin American history. [The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.—Back cover. Publisher Description “Martin, a leading authority in the sociology of religion, here looks at a recent and largely unstudied phenomenon: the rapid growth of evangelicalism in Latin America, in Brazil, Chile, Argentina, Central America, and the Caribbean. This growth is compared to similar growth in South Korea and Africa. Martin discusses spiritual gifts and conversions in terms of the changing socioeconomic situation, carefully analyzing the relationship of Anglo-American and Latin American cultures. He notes especially the appeal of Pentecostalism to the newly urbanized poor, to whom it provides a nonintellectual style and a protective network where skills in self-expression and leadership can be developed. An excellent scholarly analysis that is accessible to the average reader and provides a good bibliography as well . . .”—C. Robert Nixon, M.L.S., Lafayette, Ind. Copyright 1990 Reed Business Information, Inc. “We Set the Dark on Fire burns bright. It will light the way for a new generation of rebels and lovers.” —NPR “Mejia pens a compelling, gripping story that mirrors real world issues of immigration and equality.” —Buzzfeed Five starred reviews!! In this daring and romantic fantasy debut perfect for fans of *The Handmaid’s Tale* and Latinx authors Zoraida Córdova and Anna-Marie McLemore, society wife-in-training Dani has a great awakening after being recruited by rebel spies and falling for her biggest rival. At the Medio School for Girls, distinguished young women are trained for one of two roles in their polarized society. Depending on her specialization, a graduate will one day run a husband’s household or raise his children. Both paths promise a life of comfort and luxury, far from the frequent political uprisings of the lower class. Daniela Vargas is the school’s top student, but her pedigree is a lie. She must keep the truth hidden or be sent back to the fringes of society. And school couldn’t prepare her for the difficult choices she must make after graduation, especially when she is asked to spy for a resistance group desperately fighting to bring equality to Medio. Will Dani cling to the privilege her parents fought to win for her, or will she give up everything she’s strived for in pursuit of a free Medio—and a chance at a forbidden love? In this beautifully written work, Marjorie Becker reconstructs the cultural encounters which led to Mexico’s post-revolutionary government. She sets aside the mythology surrounding president Lázaro Cárdenas to reveal his dilemma: until he and his followers understood peasant culture, they could not govern. This dilemma is vividly illustrated in Michoacán. There, peasants were passionately engaged in a Catholic culture focusing on the Virgin Mary. The Cardenistas, inspired by revolutionary ideas of equality and modernity, were oblivious to the peasants’ spirituality and determined to transform them. A series of dramatic conflicts forced Cárdenas to develop a government that embodied some of the peasants’ complex culture. Becker brilliantly combines concerns with culture and power and a deep historical empathy to bring to life the men and women of her story. She shows how Mexico’s government today owes much of its subtlety to the peasants of Michoacán. In this text for students and the general reader, Chasteen (history, U. of North Carolina, Chapel Hill) discusses the history of 20 Latin American countries from the first contact with Europeans in 1492 to the present. The text is accompanied throughout by maps and black and white photographs. The volume does not include bibliographical references. Annotation copyrighted by Book News Inc., Portland, OR The second volume of Eduardo Galeano’s *Memory of Fire* trilogy, *Faces and Masks* is an astonishing Latin American-eye view of the New World in the making. Here is the tangled, cataclysmic history of our hemisphere from the 1700s up to the dawn of our present century, told through characters as resonant and compelling as Simon Bolívar, Toussaint L’Ouverture, and Billy the Kid. With its brilliant and imaginative blend of journalism, scholarship, and political passion, *Faces and Masks* is a panoramic interpretation of the Americas no work of history has previously imagined. This is a new release of the original 1944 edition. A re-creation of the conquest of the Americas and Latin America, divided into three parts. In the first are the myths of pre-Columbian America; in the second the history of America unfolds from the 15th to 19th century, and in the third 1900 to 1986. This trilogy differs from most in that it presents the making of the New World from the viewpoint of Latin America. The companion reader to the most readable, highly regarded, and affordable history of Latin America for our times. Winner, American Library Association Booklist’s Top of the List, 2019 Adult Nonfiction Acclaimed writer Marie Arana delivers a cultural history of Latin America and the three driving forces that have shaped the character of the region: exploitation (silver), violence (sword), and religion (stone). “Meticulously researched, [this] book’s greatest strengths are the power of its epic narrative, the beauty of its prose, and its rich portrayals of character. . . .Marvelous” (The Washington Post). Leonor Gonzales lives in a tiny community perched 18,000 feet above sea level in the Andean cordillera of Peru, the highest human habitation on earth. Like her late husband, she works the gold mines much as the Indians were forced to do at the time of the Spanish Conquest. Illiteracy, malnutrition, and disease reign as they did five hundred years ago. And now, just as then, a miner’s survival depends on a vast global market whose fluctuations are controlled in faraway places. Carlos Buergos is a Cuban who fought in the civil war in Angola and now lives in a quiet community outside New Orleans. He was among hundreds of criminals Cuba expelled to the US in 1980. His story echoes the violence that has coursed through the Americas since before Columbus to the crushing savagery of the Spanish Conquest, and from 19th- and 20th-century wars and revolutions to the military crackdowns that convulse Latin America to this day. Xavier Albó is a Jesuit priest from Barcelona who emigrated to Bolivia, where he works among the indigenous people. He considers himself an Indian in head and heart and, for this, is well known in his adopted country. Although his aim is to learn rather than proselytize, he is an inheritor of a checkered past, where priests marched alongside conquistadors, converting the natives to Christianity, often forcibly, in the effort to win the New World. Ever since, the Catholic Church has played a central role in the political life of Latin America—sometimes for good, sometimes not. In this “timely and excellent volume” (NPR) Marie Arana seamlessly weaves these stories with the history of the past millennium to explain three enduring themes that have defined Latin America since pre-Columbian times: the foreign greed for its mineral riches, an ingrained propensity to violence, and the abiding power of religion. Silver, Sword, and Stone combines “learned historical analysis with in-depth reporting and political commentary. . . .[and] an informed and authoritative voice, one that deserves a wide audience” (The New York Times Book Review). DIV This study of one of the most deadly conflicts this hemisphere has ever experienced, the Colombian *Violencia* (1945-1958), demonstrates links between past and present violence and its connection to political democracy, racism, regionalism, and state format/div Winner of the 2009 Robert A. Calvert Prize In January 1917, German foreign minister Arthur Zimmermann sent a telegram to Germany’s Mexican ambassador, authorizing the offer of U.S. territory in exchange for Mexico’s alliance

with Germany in the Great War. After the interception of this communication, U.S. intelligence intensified surveillance of the Mexican American community in Texas and elsewhere, vigilant for signs of subversive activity. Yet, even as this was transpiring, thousands of Tejanos (Mexican Texans) were serving in the American military during the war, with many other citizens of Mexican origin contributing to home front efforts. As author José A. Ramírez demonstrates in *To the Line of Fire!*, the events of World War I and its aftermath would decisively transform the Tejano community, as war-hardened veterans returned with new, broadened perspectives. They led their people in opposing prejudice and discrimination, founding several civil rights groups and eventually merging them into the League of United Latin American Citizens (LULAC), the largest and oldest surviving Hispanic civil rights organization in the United States. Ramírez also shows the diversity of reaction to the war on the part of the Tejano community: While some called enthusiastically for full participation in the war effort, others reacted coolly, or only out of fear of reprisal. Scholarly and general readers in Texas history, military history, and Mexican American studies will be richly rewarded by reading *To the Line of Fire!* "An Latin American-eye view of the conquest of the Americas and Latin America, divided into two parts. In the first are the myths of pre-Columbian America; in the other, the history of America unfolds from the 15th century to 1700" --publisher. *The Human Faces Behind Globalization--Repression and Resistance North and South of the Border*
