Managing Brand Equity David A. Aaker, 2009-12-01 The most important assets of any business are intangible: its company name, brands, symbols, and slogans, and their underlying associations, perceived quality, name awareness, customer base, and proprietary resources such as patents, trademarks, and channel relationships. These assets, which comprise brand equity, are a primary source of competitive advantage and future earnings. contends David Aaker, a national authority on branding. Yet research shows that managers cannot identify with confidence their brand associations, levels of consumer awareness, or degree of customer loyalty. Moreover, in the last decade, managers desperate for short-term financial results have often unwittingly damaged their brands through price promotions and unwise brand extensions, causing irreversible deterioration of the value of the brand name. Although several companies, such as Canada Dry and Colgate Palmolive, have recently created an equity management position to be guardian of the value of brand names, far too few managers, Aaker concludes, really understand the concept of brand equity and how it must be implemented. In a fascinating and insightful examination of the phenomenon of brand equity, Aaker provides a clear and well-defined structure of the relationship between a brand and its symbol and slogan, as well as each of the five underlying assets, which will clarify for managers exactly how brand equity does contribute value. The author opens each chapter with a historical analysis of either the success or failure of a particular company's attempt at building brand equity: the fascinating Ivory Soap story, the transformation of Datsun to Nissan, the decline of Schlitz beer, the making of the Ford Taurus, and others. Finally, citing examples from many other companies, Aaker shows how to avoid the temptation to place short-term performance before the health of the brand and instead to manage brands strategically by creating, developing, and exploiting each of the five assets in turn.

Aaker on Branding David Aaker, 2014-07-15 Aaker on Branding presents in a compact form the twenty essential principles of branding that will lead to the creation of strong brands Culled from the six David Aaker brand books and related publications these principles provide the broad understanding of brands brand strategy brand portfolios and brand building that all business marketing and brand strategists should know Aaker on Branding is a source for how you create and maintain strong brands and synergetic brand portfolios It provides a checklist of strategies perspectives tools and concepts that represents not only what you should know but also what action options should be on the table When followed these principles will lead to strong enduring brands that both support business strategies going forward and create coherent and effective brand families Those now interested in and involved with branding are faced with information overload not only from the Aaker books but from others as well It is hard to know what to read and which elements to adapt There are a lot of good ideas out there but also some that are inferior need updating or are subject to being misinterpreted and misapplied And there are some ideas that while plausible are simply wrong if not dangerous especially if taken literally Aaker on Branding offers a sense of topic priorities and a roadmap to David Aaker's books thinking and contributions As it structures the larger literature of the brand field it also advances the theory of branding and the practice of brand management and by extension the practice of business management

**Building Strong Brands** David A. Aaker, 2012-10-01 As industries turn increasingly hostile it is clear that strong brand building skills are needed to survive and prosper In David Aaker's pathbreaking book MANAGING BRAND EQUITY managers discovered the value of a brand as a strategic asset and a company's primary source of competitive advantage Now in this compelling new work Aaker uses real brand building cases from Saturn General Electric Kodak Healthy Choice McDonald's and others to demonstrate how strong brands have been created and managed A common pitfall of brand strategists is to focus on brand attributes Aaker shows how to break out of the box by considering emotional and self-expressive benefits and by introducing the brand as person brand as organisation and brand as symbol perspectives A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands Aaker shows how to manage the brand system to achieve clarity and synergy to adapt to a changing environment and to leverage brand assets into new markets and products As executives in a wide range of industries seek to prevent their products and services from becoming commodities they are recommitting themselves to brands as a foundation of business strategy This new work will be essential reading for the battle ready

*Creating Signature Stories* David Aaker, 2018-01-02 All marketers should heed the advice of this brand marketing guru in his latest book on digital storytelling. Joseph V. Tripodi, former Chief Marketing Officer at Subway and Coca-Cola, *Stories* are orders of magnitude more effective than facts at achieving attention, persuading, being remembered, and inspiring involvement. Signature stories, intriguing, authentic, and involving narratives, apply the power of stories to communicate a strategic message. Marketing professionals coping with the digital revolution and the need to have their strategic message heard internally and externally are realizing that a digital strategy revolves around content and that content is stories. *Creating Signature Stories* shows organizations how to introduce storytelling into their strategic messaging and guides organizations to find or even create signature stories and leverage them over time. With case studies built into every chapter, organizations will realize the power of storytelling to energize readers, gain visibility, persuade audiences, and inspire action.

**Owning Game-Changing Subcategories** David Aaker, 2020-02-04 *Owning Game-Changing Subcategories* is about creating organizational growth in the digital age by creating and owning game-changing subcategories fueled by digital. *Owning Game-Changing Subcategories* outlines the path to finding, managing, and leveraging new subcategories. In the digital age, the path has been made wider, shorter, and more frequently traveled. Throughout *Owning Game-Changing Subcategories*, David Aaker discusses certain aspects of the digital age that alter this path, such as E-commerce providing fast, inexpensive market access, bypassing the cost of gaining distribution into storefront retailers, or creating personal sales teams and social media and websites enabling communication on steroids in comparison with traditional use of advertising or events. Growth is not only a success measure but also creates energy and opportunity for customers and employees. And such growth almost never occurs with my brand is better than your brand marketing. *Owning Game-Changing Subcategories* explores the only ways to grow a business with rare exceptions, which is to develop new must-haves that define a game-changing subcategory that provides a new or markedly superior buying or use experience or brand relationship to a core customer base, become the exemplar brand that represents the subcategory, and drives its visibility, positioning, and success, and create barriers to competitors that could include must-have associations and a basis of relationships that go beyond functional benefits.
