San Diego Noir Feb 01 2023 Southern California is not all sun, sand,
and surf in this gripping collection of noir tales from T. Jefferson
Parker, Don Winslow, Maria Lima, and others. San Diego is home to
miles of beaches, Balboa Park, a world-famous zoo, and some of the
country's most expensive home and resort real estate. Yet the city
also houses a few items that aren't actively promoted by the visitor's
bureau: a number of the country's most corrupt politicians, border-
related crimes, terrorists, and the occasional earthquakes. A noir
feast! In the fifty-plus years since Raymond Chandler set Playback in
Esmeralda, his name for La Jolla, the population has grown by more
than a million, and crime has proliferated as well. San Diego of the
past and the present offers the book's contributors a rich selection
of settings, from the cross on Mount Soledad to the piers of Ocean
Beach, and perpetrators and victims from the residents of its
wealthiest enclaves to the inhabitants of its segregated barrios. San
Diego Noir includes stories by T. Jefferson Parker, Jeffrey J.
Mariotte, Martha C. Lawrence, Diane Clark & Astrid Bear, Debra
Ginsberg, Morgan Hunt, Ken Kuhlken, Taffy Cannon, Don Winslow, Cameron
Pierce Hughes, Lisa Brackmann, Gabriel R. Barillas, Gar Anthony
Haywood, Luis Alberto Urrea, and Maria Lima. "When it's done right,
noir is a darkly delicious thrill: smart, sharp-tongued, surprising.
The knife goes in at the end with a twist. San Diego Noir, a new
15-story collection by some of the region's best writers, has all that
going for it, and the steady supply of hometown references makes it
even more fun." —The San Diego Union-Tribune

The Card Catalog Jul 06 2023 From the archives of the Library of Congress: "An irresistible treasury for book and library lovers."—Booklist (starred review) The Library of Congress brings book lovers an enriching tribute to the power of the written word and to the history of our most beloved books. Featuring more than two hundred full-color images of original catalog cards, first edition book covers, and photographs from the library's magnificent archives, this collection is a visual celebration of the rarely seen treasures in one of the world's most famous libraries and the brilliant catalog system that has kept it organized for hundreds of years. Packed with engaging facts on literary classics—from Ulysses to The Cat in the Hat to Shakespeare's First Folio to The Catcher in the Rye—this is an ode to the enduring magic and importance of books. "The Card Catalog is many things: a lucid overview of the history of bibliographic practices, a paean to the Library of Congress, a memento of the cherished card catalogs of yore, and an illustrated collection of bookish trivia . . . The illustrations are amazing: luscious reproductions of dozens of

cards, lists, covers, title pages, and other images guaranteed to bring a wistful gleam to the book nerd's eye." —The Washington Post

The Calculus Of Observations A Treatise On Numerical Mathematics Jan 20

2022 This classic textbook provides an in-depth view into the calculus of observations and numerical mathematics. It includes detailed explanations of numerical methods and algorithms, making it useful for scientists and mathematicians alike. This edition has been updated and is recommended for students and professionals seeking to deepen their understanding of numerical analysis and computation. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Connecting the Clouds Dec 11 2023 Connecting the Clouds: The Internet in New Zealand takes the reader on an informative and entertaining ride through our telecommunications history and the people who have shaped it. The important issues and choices facing us today are explained in plain language. It provides valuable insights into the evolving communications framework that helped New Zealand shift from an isolated outpost of the British Empire to a nation of digital pioneers intimately connected and active in the emerging global village. As advances in computer and Internet technology continue to transform government, business, communities and our personal lives, it's essential that there should be well-informed debate from a wide cross-section of the New Zealand community. This highly readable and accessible book aims to spur that debate. Writer Keith Newman has conducted over 100 interviews with visionaries and scientists, computer programmers, telecommunications experts, engineers, business leaders and politicians. The result is a fascinating, highly readable account that marks a key chapter in New Zealand's development as a modern nation.
