Street Data Shane Safir, Jamila Dugan, 2021-02-12 Radically reimagine our ways of being learning and doing Education can be transformed if we eradicate our fixation on big data like standardized test scores as the supreme measure of equity and learning Instead of the focus being on fixing and filling academic gaps we must envision and rebuild the system from the student up with classrooms schools and systems built around students brilliance cultural wealth and intellectual potential Street data reminds us that what is measurable is not the same as what is valuable and that data can be humanizing liberatory and healing By breaking down street data fundamentals what it is how to gather it and how it can complement other forms of data to guide a school or district's equity journey Safir and Dugan offer an actionable framework for school transformation Written for educators and

policymakers this book Offers fresh ideas and innovative tools to apply immediately Provides an asset based model to help educators look for what s right in our students and communities instead of seeking what s wrong Explores a different application of data from its capacity to help us diagnose root causes of inequity to its potential to transform learning and its power to reshape adult culture Now is the time to take an antiracist stance interrogate our assumptions about knowledge measurement and what really matters when it comes to educating young people **Kill the Messenger** Richard P. Phelps, Kill the Messenger describes the current debate the players their interests and their positions It explains and refutes many of the common criticisms of testing It describes testing opponents strategies through case studies of Texas and the SAT It illustrates the profound media bias against testing It acknowledges testing s limitations and suggests how it can be improved It defends testing by comparing it with its alternatives And finally it outlines the consequences for America of losing the war on standardized testing BOOK JACKET *Powerful Teacher Education* Linda Darling-Hammond,2012-06-28 Powerful Teacher Education describes the strategies goals content and processes of seven highly successful and long standing teacher education programs Alverno College Bank Street College Trinity University University of California Berkeley University of Southern Maine University of Virginia and Wheelock College All these colleges and universities have succeeded in preparing teachers to teach diverse learners to achieve high levels of performance and understanding In discussing the common features of these programs Linda Darling Hammond shows what outstanding teacher education models do and how they do it and what their graduates accomplish as a result Powerful Teacher Education also examines the policies organizational features resources and relationships that have enabled these programs to succeed Weber's Sacred Literature of the Jains Albrecht Weber,1893 *Hydrology and Soil Conservation Engineering* GHANSHYAM DAS,2008-12-29 Streamlined to facilitate student understanding this second edition containing the latest techniques and methodologies and some new problems continues to provide a comprehensive treatment of hydrology of watersheds soil erosion problems design and installation of soil conservation practices and structures hydrologic and sediment yield models watershed management and water harvesting It also deals with the special requirements of management of agricultural and forested watersheds This book is designed for undergraduate students of agricultural engineering for courses in hydrology and soil and water conservation engineering It will also be of considerable value to students of agriculture soil science forestry and civil engineering KEY FEATURES Emphasises fundamentals using numerous illustrations to help students visualise different phenomena Offers lucid presentation of field practices Presents the analysis and design of basic hydraulic structures Devotes an entire chapter to watershed management Provides numerous solved design problems and exercise problems to develop a clear understanding of the theory Gives theoretical questions and objective type questions with answers to test the students understanding Developing Numerical Fluency Patsy Kanter,Steven Leinwand,2018 This is a must read book for any teachers of math Jo Boaler Professor of Mathematics Education at Stanford University and author of Mathematical Mindsets

Numerical fluency is about understanding Numerical fluency is about understanding not memorization It comes over time as students engage in active thinking and doing not endless worksheets and timed tests Classroom instruction and materials however often don't feel aligned with these realities In *Developing Numerical Fluency* Patsy Kanter and Steven Leinwand take a fresh look at a commonly asked question How do I teach number facts so my students know them fluently They apply their decades of experience teaching mathematics to rethinking effective fluency instruction Classroom tested ideas you can use right away Each chapter introduces ideas techniques and strategies that contribute to meaningful fluency for all students You'll find pivotal understandings that illuminate what contributes to real numerical fluency six instructional processes that support lasting fluency development classroom structures and activities for building fluency in addition subtraction multiplication and division suggestions for creating a school wide culture of numerical fluency Patsy and Steve remind us that Students do not develop numerical fluency by memorizing and regurgitating rules But many of us learned mathematics in exactly this way making shifting our instruction challenging *Developing Numerical Fluency* provides just the right support offering big ideas for rethinking instruction paired with classroom tested activities you can use right away
