The Machine In Garden Technology And Pastoral Ideal America Leo Marx

The Machine in the Garden Leo Marx, 2000 By examining the difference between pastoral and progressive ideals that characterised early 20th century American culture the author shows how American thinkers have considered the relationship between technology and culture in their writings

American Imperial Pastoral Rebecca Tinio McKenna, 2017-01-20 In 1904 renowned architect Daniel Burnham the Progressive Era urban planner who famously Made No Little Plans set off for the Philippines the new US colonial acquisition Charged with designing environments for the occupation government Burnham set out to convey the ambitions and the dominance of the regime drawing on neo classical formalism for the Pacific colony The spaces he created most notably in the summer capital of Baguio gave physical form to American rule and its contradictions In *American Imperial Pastoral* Rebecca Tinio McKenna examines the design construction and use of Baguio making visible the physical shape labor and sustaining practices of the US s new empire especially the dispossessions that underwrote market expansion In the process she demonstrates how colonialists conducted market making through state building and vice versa Where much has been made of the racial dynamics of US colonialism in the region McKenna emphasizes capitalist practices and design ideals giving us a fresh and nuanced understanding of the American occupation of the Philippines

American Technological Sublime David E. Nye, 1996-02-28 *American Technological Sublime* continues the exploration of the social construction of technology that David Nye began in his award winning book *Electrifying America* Here Nye examines the continuing appeal of the technological sublime a term coined by Perry Miller as a key to the nation s history using as examples the natural sites architectural forms and technological achievements that ordinary people have valued intensely Technology has long played a central role in the formation of Americans sense of selfhood From the first canal systems through the moon landing Americans have for better or worse derived unity from the common feeling of awe inspired by large scale applications of technological prowess *American Technological Sublime* continues the exploration of the social construction of technology that David Nye began in his award winning book *Electrifying America* Here Nye examines the continuing appeal of the technological sublime a term coined by Perry Miller as

a key to the nation's history using as examples the natural sites architectural forms and technological achievements that ordinary people have valued intensely American Technological Sublime is a study of the politics of perception in industrial society Arranged chronologically it suggests that the sublime itself has a history that sublime experiences are emotional configurations that emerge from new social and technological conditions and that each new configuration to some extent undermines and displaces the older versions After giving a short history of the sublime as an aesthetic category Nye describes the reemergence and democratization of the concept in the early nineteenth century as an expression of the American sense of specialness What has filled the American public with wonder awe even terror David Nye selects the Grand Canyon Niagara Falls the eruption of Mt St Helens the Erie Canal the first transcontinental railroad Eads Bridge Brooklyn Bridge the major international expositions the Hudson Fulton Celebration of 1909 the Empire State Building and Boulder Dam He then looks at the atom bomb tests and the Apollo mission as examples of the increasing ambivalence of the technological sublime in the postwar world The festivities surrounding the rededication of the Statue of Liberty in 1986 become a touchstone reflecting the transformation of the American experience of the sublime over two centuries Nye concludes with a vision of the modern day consumer sublime as manifested in the fantasy world of Las Vegas

neighbors of a polluted urban stream debating issues of property odor and health These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge Brooke Hindle s classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed A bibliographical essay and summary of Hindle s bibliographic findings conclude the volume The contributors are Judith A McGaw Robert C Post Susan E Klepp Michal McMahon Patrick W O Bannon Sarah F McMahon Donald C Jackson Robert B Gordon Carolyn C Cooper and Nina E Lerman

English Pastoral Music Eric Saylor, 2017-05-30 Covering works by popular figures like Ralph Vaughan Williams and Gustav Holst as well as less familiar English composers Eric Saylor s pioneering book examines pastoral music s critical theoretical and stylistic foundations alongside its creative manifestations in the contexts of Arcadia war landscape and the Utopian imagination As Saylor shows pastoral music adapted and transformed established musical and aesthetic conventions that reflected the experiences of British composers and audiences during the early twentieth century By approaching pastoral music as a cultural phenomenon dependent on time and place Saylor forcefully challenges the body of critical opinion that has long dismissed it as antiquated insular and reactionary
