With completing the first term in the Constructed Self class, I was able to benefit from a variety of new things from the class, as well as refresh my memory on things that I already knew, just needed a reminder about.

The biggest hurdle in the class for me was time management. I am a procrastinator and always have been, so completing assignments on time was and still is a challenge for me. I have not come to a full solution to this problem yet, but I did make changes in my life as to how I can manage time management. I found that it was easier for me to focus on homework if I was outside my dorm room, because when in my dorm, I would usually mess around on the internet or take naps. I don't think realistically I will get over procrastination anytime soon, but I can manage it.

With hurdles came hidden strengths I discovered about myself. I've never thought of myself as a leader, but because the class used group thinking in more than one occasion, I found that I am a good leader. I communicate my ideas to the group while trying to balance the ideas of others so the group can come to an agreed upon decision. Obviously this can benefit me no matter what career I decide to go into, because the ability to take control of a situation and still remain diplomatic with colleagues is a valuable asset to have. Other than this, I can't think of any other strength I discovered. I

A Teacher's Reflection Book Jean Koh Peters, Mark Weisberg, 2011 In university teachers hectic lives finding space to reflect restore renew and recommit can seem impossible Jean Koh Peters and Mark Weisberg believe regular reflection is critical and have designed *A Teacher's Reflection Book* to help teachers and other professionals find that space Growing out of the authors extensive experience facilitating retreats and leading teaching and learning workshops the book builds on their discoveries in those settings supporting and promoting teachers self directed development Inviting that

development A Teacher's Reflection Book is a cornucopia of stories exercises and examples that will inspire teachers to make reflection a cornerstone of their daily lives With its multiple suggestions and strategies it offers something for every reader and is responsive to teachers needs at all stages of their careers The book's six chapters offer readers several perspectives from which to reflect Some sections offer glimpses of teachers in the midst of their daily teaching lives while others step away inviting readers to reflect on what it means to have a vocation as a teacher The book explores how we listen a crucial yet rarely taught skill essential for reflecting as well as for learning and teaching And it invites teachers to reflect on their students who they are and what and how they learn For those latter reflections the authors turn the focus on fear which so pervades university life and which can distort learners and teachers perspectives and responses Throughout this book readers will visit several classrooms and listen to the evocative voices of several thoughtful students Revelatory practical and wise A Teacher's Reflection Book is a valuable companion and guide One key strength of the book is its authentic writing style which engages the reader and builds the trustworthiness of the authors Another strength is the book's wealth of readings and the activities it offers to catalyze teacher reflection Teaching Theology and Religion Ryan S Gardner This excellent book should be part of every teacher's professional library It is a book pitched at all teachers in higher education and through the processes of reflection a book that advances important principles of good teaching practice that are usually introduced all too briefly in the basic texts on teaching in higher education Several descriptive words come to mind when reading this book It is a polite and gentle book Politeness is revealed in the book's sub title Exercises stories invitations It is the idea of invitation that characterizes much of the book It is not didactic but rather invites us to use the book and the processes described in it in ways that work best for us It does this through questions and inductive approaches to reflection Through these approaches and the careful use of real life examples we are gently invited to explore the perspectives presented in the text and apply these to our personal and professional lives It is also an accessible book Most refreshingly it is not burdened with unnecessary technical jargon and convoluted language that sadly cripples too much writing in education today and makes learning inaccessible to many particularly for those readers whose first language is not English Higher Education Research dividing and depleting our energies How many times do we arrive in class breathless with hardly a moment to think about what we have planned for the day I harbor no illusions that a blog entry is going to change our lives but I would like to use this one to reiterate the need to make time for reflection for contemplation about what we do and how and why we do it The value of doing so is laid out clearly in this new book Teaching Professor Blog Maryellen Weimer
