Planning Your Final-year Project Apr 29 2023 Produced for unit SEJ341 (Technology projects 1) offered by the Faculty of Science and Technology's School of Engineering and Technology in Deakin University's Open Campus Program.

Undertaking Capstone and Final Year Projects in Psychology Dec 06 2023 Undertaking Capstone and Final Year Projects in Psychology serves a seminal purpose in guiding its readers to create a capstone project. The text employs traditional and emerging methodologies and methods in order to posit an exhaustive approach that the psychology students can adopt to see their project to fruition. The text aims at fortifying the reader's skills through the structure of its chapters as they begin to work on their capstone or final year project. The chapters collectively explore the varied aspects that are involved in the completion of a final year project, that is, beginning from the inception of the idea to laying the foundation, designing the project, analysing the data, and, finally, presenting the findings. The text guides the reader through each step and provides further guidance on approaching the idea, coming up with the research question, positioning it within the epistemological and ontological context, and constructing the theoretical framework to arrive at the optimal design solutions. The text will be useful for psychology students who are currently completing a capstone or a final year project. It is further aimed at psychology students who will subsequently be working on a project and are looking forward to gaining cognisance regarding the approach and the methodology to be adopted for the same.

Java Projects Apr 17 2022 The java projects book enables you to develop java applications using an easy and simple approach. The book is designed for the readers, who are familiar with java programming. The book provides numerous listings and figures for an affective understanding of java concepts. The book consists of a CD that includes source code for all the java applications. Table of contents: Chapter 1 Creating a calculator applications Chapter 2 Creating analog clock applications Chapter 3 Creating a 9-box puzzle game Chapter 4 Student information management system Chapter 5 Creating a text editor applications Chapter 6 Creating an online test applications Chapter 7 Creating a shopping cart applications Chapter 8 Share trading application Chapter 9 Online banking applications

Originals Oct 04 2023 The #1 New York Times bestseller that examines how people can champion new ideas in their careers and everyday life—and how leaders can fight groupthink, from the author of Think Again and co-author of Option B “Filled with fresh insights on a broad array of topics that are important to our personal and professional lives.”—The New York Times DealBook “Originals is one of the most important and captivating books I have ever read, full of surprising and powerful ideas. It will not only change the way you see the world; it might just change the way you live your life. And it could very well inspire you to change your world.” —Sheryl Sandberg, COO of Facebook and author of Lean In With Give and Take, Adam Grant not only introduced a landmark new paradigm for success but also established himself as one of his generation's most compelling and provocative thought leaders. In Originals he again addresses the challenge of improving the world, but now from the perspective of becoming original: choosing to champion novel ideas and values that go against the grain, battle conformity, and buck outdated traditions. How can we originate new ideas, policies, and practices without risking it all? Using surprising studies and stories spanning business, politics, sports, and entertainment, Grant explores how to recognize a good idea, speak up without getting silenced, build a coalition of allies, choose the right time to act, and manage fear and doubt; how parents and teachers can nurture originality in children; and how leaders can build cultures that welcome dissent. Learn from an entrepreneur who pitches his start-ups by highlighting the reasons not to invest, a woman at Apple who challenged Steve Jobs from three levels below, an analyst who overturned the rule of secrecy at the CIA, a billionaire financial wizard who fires employees for failing to criticize him, and a TV executive who didn't even work in comedy but saved Seinfeld from the cutting-room floor. The payoff is a set of groundbreaking insights about rejecting conformity and improving the status quo.

Technology in Education. Transforming Educational Practices with Technology Apr 10 2024 This book constitutes the refereed proceedings of the International Conference on Technology in Education, ICTE 2014, held in Hong Kong, in July 2014. The 18 revised full papers and 4 short papers presented were carefully reviewed and selected from 45 submissions. The papers are organized in topical sections on application of mobile technologies in e-learning; technology advancement in e-learning systems; innovations in e-learning pedagogy; open education and institution e-learning policy.

Student's Guide for Final Year Project Thesis Sep 03 2023 As a final year supervisor for twelve years on the degree, masters, and PhD, I have noticed time and time again students approached their thesis confused and unsure what is expected from them; and rightly so. What is involved in the write up of the final year thesis is not something students are introduced to during their studies. The structure, content, and format of a thesis are only understood by seeing good examples. A thesis is the largest assignment a student will ever likely to do and will resemble nothing they have done before. A final year thesis has to demonstrate academic structure, content, and integrity, something that is not always presented clearly by supervisors. As a supervisor, I designed a handout to help and guide my students. This handout became very popular as students shared it with their friends. After many years of editing and improving my notes, I have decided to publish it as a booklet. Taking away the fear of the writing up and having the confidence that a great thesis is achievable has helped my students focus instead on finding creative, challenging, and inspiring projects.

Mechatronics and Manufacturing Engineering Jun 19 2022 This book, the first in the Woodhead Publishing Reviews: Mechanical Engineering Series, is a collection of high quality articles (full research articles, review articles and cases studies) with a special emphasis on research and development in mechatronics and manufacturing engineering. Mechatronics is the blending of mechanical, electronic, and computer engineering into an integrated design. Today, mechatronics has a significant and increasing impact on engineering with emphasis on the design, development and operation of manufacturing engineering systems. The main objective of this interdisciplinary engineering field is the study of automata from an engineering perspective, thinking on the design of products and manufacturing processes and systems. Mechatronics and manufacturing systems are well established and executed within a great number of industries including aircraft, automotive and aerospace industries; machine tools, moulds and dies product manufacturing, computers, electronics, semiconductor and communications, and biomedical. A collection of high quality articles with a special emphasis on research and development in mechatronics and manufacturing engineering Presents a range of views based on international expertise Written by a highly knowledgeable and well-respected expert in the field

The Dream Machine Jul 01 2023 The story of the man who instigated the work that led to the internet—and shifted our understanding of what computers could be. Behind every great revolution is a vision and behind perhaps the greatest revolution of our time, personal computing, is the vision of J.C.R. Licklider. He did not design the first personal computers or write the software that ran on them, nor was he involved in the legendary early companies that brought them to the forefront of our everyday experience. He was instead a relentless visionary that saw the potential of the way individuals could interact with computers and software. At a time when computers were a short step removed from mechanical data processors, Licklider was writing treatises on "human-computer symbiosis", "computers as communication devices", and a now not-so-unfamiliar "Intergalactic Network." His ideas became so influential, his passion so contagious, that Waldrop called him "computing's Johnny Appleseed. In a simultaneously compelling personal narrative and comprehensive historical exposition, Waldrop tells the story of the man who not only instigated the work that led to the internet, but also shifted our understanding of what computers were and could be. Included in this edition are also the original texts of Licklider's three most influential writings: 'Man-computer symbiosis' (1960), which outlines the vision that inspired the personal computer revolution of the 1970s; his 'Intergalactic Network' memo (1963), which outlines the vision that inspired the internet; and "The computer as a communication device" (1968, co-authored with Robert Taylor), which amplifies his vision for what the network could become.

Student's Guide: Final Year Project Thesis (2nd Edition) May 11 2024 As a final year supervisor for twelve years on the degree, masters, and PhD, I have noticed time and time again students approached their thesis confused and unsure what is expected from them; and rightly so. What is involved in the write up of the final year thesis is not something students are introduced to during their studies. The structure, content, and format of a thesis are only understood by seeing good examples. A thesis is the largest assignment a student will ever likely to do and will resemble nothing they have done before. A final year thesis has to demonstrate academic structure, content, and integrity, something that is not always presented clearly by supervisors. As a supervisor, I designed a handout to help and guide my students. This handout became very popular as students shared it with their friends. After many years of editing and improving my notes, I have decided to publish it as a book. The second edition of the book comes with more examples. Taking away the fear of the writing up and having the confidence that a great thesis is achievable has helped my students focus instead on finding creative, challenging, and inspiring projects.

Ditch That Textbook Feb 08 2024 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Ways of Reading Words and Images Aug 10 2021 Adapting the methods of the much admired and extremely successful composition anthology Ways of Reading, this brief reader offers eight substantial essays about visual culture (illustrated with evocative photographs) along with demanding and innovative apparatus that engages students in conversations about the power of images.

Mixed Reality for Education Feb 13 2022 This book consists of chapters that present the state-of-the-art research on mixed reality, simulation and serious games with applications in four main educational topics: (1) K-12 STEAM Education; (2) Tertiary/Professional Education; (3) Special Needs Education; and (4) Cultural, Social & Museum Education. The chapters of the book present a multi-facet view on different approaches to deal with challenges that surround the uptake of educational applications of mixed reality, simulations and serious games in various practices. The different approaches highlight challenges and potential solutions and provide future directions for mixed reality, simulation and serious games research, for the design of learning material and for

implementation. By doing so, the book is a useful resource for both students and scholars interested in research in this field, for designers of learning material and for practitioners that want to embrace mixed reality, simulation and/or serious games in their education. Chapter "Development of AR Interactive Components for Positive Behavioral Interventions and Supports" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Assessment for Learning Within and Beyond the Classroom May 19 2022 These conference proceedings focus on “Assessment for Learning: Within and Beyond the Classroom” in recognition of the power of assessment for learning as a way of boosting student performance. They explore the breadth, depth and quality of the best models and practices, strategies, lessons learnt and discuss cases of successful implementation of assessment within the classroom and beyond, including the virtual space. They also provide fertile ground for stimulating and comparing responsive assessment approaches and practices in relatively new areas of assessment such as graduate capability assessment in view of the need for educational institutions to evidence graduate employability.

Practical Guide to Project-Based Learning Oct 12 2021 Project-based and industry-linked learning are increasingly pursued in undergraduate studies at the university as well as at the polytechnics, 'A' levels and the international baccalaureate programmes. These courses are usually structured as part of the Final Year Projects. Their applied nature is also motivated by the increasing emphasis on collaborations between the academia and the industry. This book shall serve as a text and a practical reference for students, lecturers and industry supervisors to design, structure and supervise their projects so that they will serve the desired curricular objectives as well as the needs of the industry collaborators. In essence, it will guide students to write their final year dissertations. A key feature of this book is its practical orientation. It contains a lot of examples. It is structured in a series of questions and answers which mimics the thought process of a student working on his/her final year project dissertation. Specifically, the book has also included some contemporary topics such as design thinking and pecha kucha presentations which would be of particular interest to instructors and students. Request Inspection Copy

Managing Mathematical Projects - with Success! Aug 22 2022 The first student-centred guide on how to write projects and case studies in mathematics, with particular attention given to working in groups (something maths undergraduates have not traditionally done). With half of all universities in the UK including major project work of significant importance, this book will be essential reading for all students on the second or final year of a mathematics degree, or on courses with a high mathematical content, for example, physics and engineering.

Recent Advances on Soft Computing and Data Mining Jul 09 2021 This book offers a systematic overview of the concepts and practical techniques that readers need to get the most out of their large-scale data mining projects and research studies. It guides them through the data-analytical thinking essential to extract useful information and obtain commercial value from the data. Presenting the outcomes of International Conference on Soft Computing and Data Mining (SCDM-2017), held in Johor, Malaysia on February 6–8, 2018, it provides a well-balanced integration of soft computing and data mining techniques. The two constituents are brought together in various combinations of applications and practices. To thrive in these data-driven ecosystems, researchers, engineers, data analysts, practitioners, and managers must understand the design choice and options of soft computing and data mining techniques, and as such this book is a valuable resource, helping readers solve complex benchmark problems and better appreciate the concepts, tools, and techniques employed.

Ask a Manager Oct 24 2022 From the creator of the popular website Ask a Manager and New York’s work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There’s a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don’t know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You’ll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you’re being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate’s loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green’s] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Robust Computer Vision Feb 25 2023 From the foreword by Thomas Huang: "During the past decade, researchers in computer vision have found that probabilistic machine learning methods are extremely powerful. This book describes some of these methods. In addition to the Maximum Likelihood framework, Bayesian Networks, and Hidden Markov models are also used. Three aspects are stressed: features, similarity metric, and models. Many interesting and important new results, based on research by the authors and their collaborators, are presented. Although this book contains many new results, it is written in a style that suits both experts and novices in computer vision."

Planning and Implementing your Final Year Project — with Success! Jun 12 2024 Written in concise language this book is for any student who is about to undertake a final year undergraduate or MSc project. It takes them step-by-step through all the important stages of the process, from initial planning to completion. It tells them everything they need to know about key issues such as: How to formulate a suitable problem, Which research method to use, Developing an appropriate structure for the written report, Project focus, and Quality assurance. The book aims to demystify the whole process, making it invaluable for any MSc student.

The Essence of Computing Projects Mar 05 2021 Until now there has been no single resource to help students acquire the skills they need to complete computing projects successfully. This book will fill the gap for both undergraduate and graduate students. It covers all the fundamental skills a student will need to meet and exceed the required standard every time.*Provides complete coverage of skills needed to propose, produce and present projects; everything a student needs is in one convenient source*Bridges the gap between academic and industrial projects; prepares students for real-world approaches*Includes detailed material on referencing, literature, surveying, project management and presentation skills

Thesis Projects Jan 07 2024 You’re a computing or information student with a huge mountain to climb – that final-year research project. Don’t worry, because with this book guardian angels are at hand, in the form of four brilliant academics who will guide you through the process. The book provides you with all the tools necessary to successfully complete a final year research project. Based on an approach that has been tried and tested on over 500 projects, it offers a simple step-by-step guide to the key processes involved. Not only that, but the book also contains lots of useful information for supervisors and examiners including guidelines on how to review a final year project.

Engineering Grand Challenges in Scholar Programs May 31 2023 This book explains how Taylor’s University implemented a curriculum in their engineering program that prepares students to address challenges facing the world. Aim is to enable Engineers put their knowledge into application to meet the 14 challenges of the century as outlined by the National Academy of Engineering (NAE) of the United States. The research groups are organized around the 14 grand challenges for engineering The structure of their syllabi is organized in a way that they address the 5 core competencies: Research Experience, Entrepreneurship, Service Learning, Interdisciplinary Curriculum, Global Dimension. It uses the CDIO educational framework, a project-based learning approach that provides students with the big picture of engineering. Through this method, students are able to: Master a deeper working knowledge of the fundamentals of engineering Lead in the creation and operation of new products and systems Understand the importance and strategic value of research work As the only programme of its kind outside North America, it offers the brightest minds the opportunity to face real-world issues and places them on the cutting edge of the engineering world.

Thesis Projects Nov 05 2023 You’re a computing or information student with a huge mountain to climb – that final-year research project. Don’t worry, because with this book guardian angels are at hand, in the form of four brilliant academics who will guide you through the process. The book provides you with all the tools necessary to successfully complete a final year research project. Based on an approach that has been tried and tested on over 500 projects, it offers a simple step-by-step guide to the key processes involved. Not only that, but the book also contains lots of useful information for supervisors and examiners including guidelines on how to review a final year project.

Hybrid Learning and Continuing Education Jan 27 2023 This book constitutes the refereed proceedings of the 6th International Conference on Hybrid Learning, ICHL 2013, held in Toronto, ON, Canada, in August 2013. The 35 papers presented in this volume were carefully reviewed and selected from numerous submissions. The selected articles broadly cover topics on hybrid learning and continuing education, including computer supported collaborative learning, experiences in hybrid learning, pedagogical and psychological issues, e-learning and mobile learning, open education resources and open online courses, and issues in hybrid learning and continuing education.

Planning and Implementing Your Final Year Project--with Success! Mar 09 2024

Guide to Research Projects for Engineering Students Dec 26 2022 Presents an Integrated Approach, Providing Clear and Practical GuidelinesAre you a student facing your first serious research project? If you are, it is likely that you'll be, firstly, overwhelmed by the magnitude of the task, and secondly, lost as to how to go about it. What you really need is a guide to walk you through all aspects of the research

The President's Report to the Board of Regents for the Academic Year ... Financial Statement for the Fiscal Year Nov 12 2021

How to Write Your Nursing Dissertation May 07 2021 how to write your nursing dissertation How to Write Your Nursing Dissertation provides nursing and healthcare students with authoritative information on developing, writing, and presenting an evidence-based practice healthcare dissertation, project or evidence-informed decision-making assignment. Written by experienced healthcare professionals, this comprehensive textbook offers clear and straightforward guidance on sourcing, accessing, and critically appraising evidence, helping students develop their clinical research and writing skills. The authors address the common difficulties encountered throughout the process of writing a dissertation, project or evidence-informed decision-making assignment, and offer expert tips and practical advice for managing time, developing study skills, interpreting statistics, publishing aspects of the work in a journal or at a conference, and more. Now in its second edition, this bestselling guide presents relatable and engaging scenarios to illustrate the setting of standards, explore legal and ethical frameworks, examine auditing and benchmarking, and demonstrate how evidence is applied to real-world problems. Covering the entire dissertation, project or evidence-informed decision-making assignment process from a nursing and healthcare perspective, this innovative textbook: Helps students develop and appropriately answer a clear dissertation, project or evidence-informed decision-making assignment Addresses the fundamental aspects of evidence-based practice in an

accessible and readable style Features new and updated content on mini dissertations, final assessments, and evidence-informed decision-making projects that many healthcare institutions now require Presents up-to-date information that meets the needs of new healthcare roles, such as the Nursing Associate and Healthcare Assistant Includes access to a companion website containing downloadable information, an unabridged dissertation sample, and links to additional resources How to Write Your Nursing Dissertation is a must-have guide for nursing and healthcare students, trainees, other healthcare students required to complete an evidence-based practice project, and anyone looking to strengthen their critical appraisal and assignment writing skills.

Succeeding in Literature Reviews and Research Project Plans for Nursing Students Feb 01 2021 Now in its fourth edition and thoroughly updated to ensure all content is mapped to the new 2018 NMC standards, this book is a practical and readable guide to undertaking a research project plan or a literature review for final year assessment. The book guides readers from start to finish, beginning with choosing a nursing topic and developing questions about it, then accessing and critically reviewing research literature, considering ethical issues, proposing research where applicable, and finally, writing up and completing the literature review or research proposal. The authors also explore how to translate evidence into practice and how this can improve day to day decision-making, as well as feeding into assessments.

Success in Your Project Sep 22 2022 This text offers detailed guidance and support for students in preparing for, conducting and evaluating a system development project. It also covers projects ranging in scope from feasibility studies and software prototype development to projects covering the entire system development life cycle.

Business Intelligence Demystified Mar 29 2023 Clear your doubts about Business Intelligence and start your new journey KEY FEATURES ? Includes successful methods and innovative ideas to achieve success with BI. ? Vendor-neutral, unbiased, and based on experience. ? Highlights practical challenges in BI journeys. ? Covers financial aspects along with technical aspects. ? Showcases multiple BI organization models and the structure of BI teams. DESCRIPTION The book demystifies misconceptions and misinformation about BI. It provides clarity to almost everything related to BI in a simplified and unbiased way. It covers topics right from the definition of BI, terms used in the BI definition, coinage of BI, details of the different main uses of BI, processes that support the main uses, side benefits, and the level of importance of BI, various types of BI based on various parameters, main phases in the BI journey and the challenges faced in each of the phases in the BI journey. It clarifies myths about self-service BI and real-time BI. The book covers the structure of a typical internal BI team, BI organizational models, and the main roles in BI. It also clarifies the doubts around roles in BI. It explores the different components that add to the cost of BI and explains how to calculate the total cost of the ownership of BI and ROI for BI. It covers several ideas, including unconventional ideas to achieve BI success and also learn about IBI. It explains the different types of BI architectures, commonly used technologies, tools, and concepts in BI and provides clarity about the boundary of BI w.r.t technologies, tools, and concepts. The book helps you lay a very strong foundation and provides the right perspective about BI. It enables you to start or restart your journey with BI. WHAT YOU WILL LEARN ? Builds a strong conceptual foundation in BI. ? Gives the right perspective and clarity on BI uses, challenges, and architectures. ? Enables you to make the right decisions on the BI structure, organization model, and budget. ? Explains which type of BI solution is required for your business. ? Applies successful BI ideas. WHO THIS BOOK IS FOR This book is a must-read for business managers, BI aspirants, CxOs, and all those who want to drive the business value with data-driven insights. TABLE OF CONTENTS 1. What is Business Intelligence? 2. Why do Businesses need BI? 3. Types of Business Intelligence 4. Challenges in Business Intelligence 5. Roles in Business Intelligence 6. Financials of Business Intelligence 7. Ideas for Success with BI 8. Introduction to IBI 9. BI Architectures 10. Demystify Tech, Tools, and Concepts in BI

Student's Guide: Final Year Project Thesis Aug 02 2023 As a final year supervisor for twelve years on degree, masters, and PhD, I noticed time and time again students approach their thesis confused and unsure what is expected from them; and rightly so. What is involved in the write up of the final year thesis is not something students are introduced to during their studies. The structure, content, and format of a thesis are only understood by seeing good examples. A thesis is the largest assignment a student will ever likely to do and will resemble nothing they have ever done before. A final year thesis has to demonstrate academic structure, content and integrity, something that is not always presented clearly by supervisors. As a supervisor, I designed a handout to help and guide my students. This handout became very popular as students shared with their friends. After many years of editing and improving my notes, I decided to publish it as a booklet. Taking away the fear of the writing up and having the confidence that they can achieve it should hopefully help students focus instead on finding creative, challenging, and inspiring projects.

Intelligent Information Integration for the Semantic Web Sep 10 2021 The Semantic Web offers new options for information processes. Dr. Visser is dealing with twocore issuesin this area:the integrationofdata onthe sem- tic level and the problem of spatio-temporalrepresentation and reasoning. He tackles existing research problems within the ?eld of geographic information systems(GIS), thesolutionsofwhichareessentialfor animprovedfunction- ity of applicationsthat makeuse of the Semantic Web (e.g., for heterogeneous digitalmaps).Inaddition,theyareoffundamentalsigni?canceforinformation sciences as such. In an introductory overview of this ?eld of research, he motivates the - cecessity for formal metadata for unstructured information in the World Wide Web. Without metadata, an e?cient search on a semantic level will turn out to be impossible, above all if it is not only applied to a terminological level but also to spatial-temporal knowledge. In this context, the task of infor- tionintegrationisdividedinto syntactic,structural,andsemanticintegration, the last class by far the most di?cult, above all with respect to contextual semantic heterogeneities. A current overview of the state of the art in the ?eld of information in- gration follows. Emphasis is put particularly on the representation of spatial and temporal aspects including the corresponding inference mechanisms, and also the special requirements on the Open GIS Consortium.

A Good Girl's Guide to Murder Dec 14 2021 THE MUST-READ MULTIMILLION BESTSELLING MYSTERY SERIES—COMING SOON TO NETFLIX! • This is the story about an investigation turned obsession, full of twists and turns and with an ending you'll never expect. Everyone in Fairview knows the story. Pretty and popular high school senior Andie Bell was murdered by her boyfriend, Sal Singh, who then killed himself. It was all anyone could talk about. And five years later, Pip sees how the tragedy still haunts her town. But she can't shake the feeling that there was more to what happened that day. She knew Sal when she was a child, and he was always so kind to her. How could he possibly have been a killer? Now a senior herself, Pip decides to reexamine the closed case for her final project, at first just to cast doubt on the original investigation. But soon she discovers a trail of dark secrets that might actually prove Sal innocent . . . and the line between past and present begins to blur. Someone in Fairview doesn't want Pip digging around for answers, and now her own life might be in danger. And don't miss the sequel, Good Girl, Bad Blood! "The perfect nail-biting mystery." —Natasha Preston, #1 New York Times bestselling author

Recommendation Engines Jan 15 2022 How companies like Amazon, Netflix, and Spotify know what "you might also like": the history, technology, business, and societal impact of online recommendation engines. Increasingly, our technologies are giving us better, faster, smarter, and more personal advice than our own families and best friends. Amazon already knows what kind of books and household goods you like and is more than eager to recommend more; YouTube and TikTok always have another video lined up to show you; Netflix has crunched the numbers of your viewing habits to suggest whole genres that you would enjoy. In this volume in the MIT Press's Essential Knowledge series, innovation expert Michael Schrage explains the origins, technologies, business applications, and increasing societal impact of recommendation engines, the systems that allow companies worldwide to know what products, services, and experiences "you might also like."

Deep Learning with JavaScript Jul 21 2022 Deep learning has transformed the fields of computer vision, image processing, and natural language applications. Thanks to TensorFlow.js, now JavaScript developers can build deep learning apps without relying on Python or R. Deep Learning with JavaScript shows developers how they can bring DL technology to the web. Written by the main authors of the TensorFlow library, this new book provides fascinating use cases and in-depth instruction for deep learning apps in JavaScript in your browser or on Node. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

Projects in the Computing Curriculum Mar 17 2022 The role of projects in the computing curriculum is of great importance in enabling students to explore different issues when putting theory into practice. The Project 98 workshop, from which this book has evolved, was held in April 1998 at the University of Sheffield. Projects in the Computing Curriculum looks at current experiences and ideas about the many and varied types of University projects. The papers in this volume cover a broad cross-section of project styles, presented not just by staff, but by a few students as well. This book provides some ideas and experiences that can be used by others in developing their use of projects in the computing curriculum. Issues addressed in the papers in this book include:- management of project work; assessment of project work; industrial projects; large group projects; individual projects.
