Michael Rifenburg, 2022-10-14 *Drilled to Write* offers a rich account of US Army cadets navigating the unique demands of Army writing at a senior military college In this longitudinal case study J Michael Rifenburg follows one cadet Logan Blackwell for four years and traces how he conceptualizes Army writing and Army genres through immersion in military science classes tactical exercises in the Appalachian Mountains and specialized programs like Airborne School Drawing from research on rhetorical genre studies writing transfer and materiality *Drilled to Write* speaks to scholars in writing studies committed to capturing how students understand their own writing development Collectively these chapters articulate four ways Blackwell leveraged resources through ROTC to become a cadet writer at this military college Each chapter is dedicated to one year of his undergraduate experience with focus on curricular writing for his business management major and military science classes as well as his extracurricular writing like his Ballroom Dance Club bylaws and a three thousand word short story In *Drilled to Write* Rifenburg invites readers to see how cadets are positioned between civilian and military life a curiously liminal space where they develop as writers Using Army ROTC as an entry into genre theory and larger conversations about the role higher education plays in developing Army officers he shows how writing students develop genre awareness and flexibility while forging a personal identity **Instructor's Guide for Introduction to Leadership Development**, 1976

The 71F Advantage National Defense University Press,2010-09 Includes a foreword by Major General David A Rubenstein From the editor 71F or 71 Foxtrot is the AOC area of concentration code assigned by the U S Army to the specialty of Research Psychology Qualifying as an Army research psychologist requires first of all a Ph D from a research not clinical intensive graduate psychology program Due to their advanced education research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain In terms of numbers the 71F AOC is a small one with only 25 to 30 officers serving in any given year However the 71F impact is much bigger than this small cadre suggests Army research psychologists apply their extensive training and

expertise in the science of psychology and social behavior toward understanding preserving and enhancing the health well being morale and performance of Soldiers and military families As is clear throughout the pages of this book they do this in many ways and in many areas but always with a scientific approach This is the 71F advantage applying the science of psychology to understand the human dimension and developing programs policies and products to benefit the person in military operations This book grew out of the April 2008 biennial conference of U S Army Research Psychologists held in Bethesda Maryland This meeting was to be my last as Consultant to the Surgeon General for Research Psychology and I thought it would be a good idea to publish proceedings which had not been done before As Consultant I d often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living In addition to our core group of 71Fs at the Bethesda 2008 meeting we had several brand new members and a number of distinguished retirees the grey beards of the 71F clan Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels with no sign of easing and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health well being and performance of Soldiers and their families
