Film, Form, and Culture Robert Kolker, 2015-08-14 Film Form and Culture 4th edition offers a lively introduction to both the formal and cultural aspects of film. With extensive analysis of films past and present, this textbook explores film from part to whole, from the smallest unit of the shot to the way shots are edited together to create narrative. It then examines those narratives, both fiction and non-fiction, as stories and genres that speak to the culture of their time and our perceptions of them today. Composition, editing, genres such as the gangster film, the Western, science fiction, and melodrama are analyzed alongside numerous images to illustrate the discussion. Chapters on the individuals who make films—the production designer, cinematographer, editor, composer, producer, director, and actor—illustrate the collaborative nature of filmmaking. This new edition includes an expanded discussion of the digital revolution in filmmaking, exploring the movement from celluloid to digital recording and editing of images, as well as the use of CGI. A new chapter on international cinema that covers filmmaking from Italy to Mumbai offers students a broader understanding of cinema on a worldwide scale. A new chapter on film acting that uses images to create a small catalogue of gestures and expressions that are recognizable in film after film. Expanded content coverage and in-depth analysis throughout, including a visual analysis of a scene from Christopher Nolan's *The Dark Knight*. An expanded chapter on the cultural contexts of film summarizes the theories of cultural and media studies, concluding with a comparative analysis of Alfred Hitchcock's *Vertigo* and Judd Apatow's *This is 40*. Over 260 images, many in color, that create a visual index to and illustration of the discussion of films and filmmaking. Each chapter ends with updated suggestions for further reading and viewing, and there is an expanded glossary of terms. Additional resources for students and teachers can also be found on the companion website www.routledge.com/cw/kolker, which includes additional case studies, discussion questions, and links to useful websites. This textbook is an invaluable and exciting resource for students beginning film studies at the undergraduate level.

American Cinema/American Culture John Belton, 1994 An insight into the interplay between the film industry and mass culture in America, which examines the industry, its narrative conventions, and cinematographic style. The work also presents a sweep of film history using five genres: silent film, melodrama, American comedy, the war film, film noir, and the making of the West as the basis for discussion. The treatment of each genre focuses on that period in time when each had its greatest effect on the industry, film aesthetics, and American culture. The work concludes with a look at Hollywood post-World War II, giving separate chapter coverage to the effects of the Cold War, television, the counterculture of the 60s, directors from the film school generation such as Scorsese, Ford, Coppola, and Spielberg, and the recent trends of the 80s and 90s.
