The Art and Practice of Court Administration Alexander B. Aikman, 2006-12-15 The Art and Practice of Court Administration explores the context in which court administration is practiced and identifies the qualities and skills court administrators need. Divided into two major parts, part one covers the history of the field and how courts are organized, environmental conditions in which court administration is practiced, special impact on courts of the elected clerk of court, prosecutor and the sheriff, the judge's administrative roles as well as how a judge's judicial and administrative roles work with management. The second part reviews a new approach for setting and adjusting priorities among the multiple functions courts perform, the Hierarchy of Court Administration. It defines priorities, analyzes court roles that establish mission-critical functions and sets an agenda for advancing courts throughout this century. Thorough and complete, *The Art and Practice of Court Administration* details how courts operate, the court administrator's position and responsibilities, and approaches to issues and problems.

Attack from Within Barbara McQuade, 2024-02-27 A NEW YORK TIMES BESTSELLER An urgent comprehensive explanation of the ways disinformation is impacting democracy and practical solutions that can be pursued to strengthen the public media and truth-based politics. MSNBC's legal expert breaks down the ways disinformation has become a tool to drive voters to extremes, disempower our legal structures and consolidate power in the hands of the few. One of the most acute observers of our time shares a compelling work about a challenge that left unexamined and left unchecked could undermine our democracy. Eric H. Holder Jr., 82nd Attorney General of the United States: American society is more polarized than ever before. We are strategically being pushed apart by disinformation, the deliberate spreading of lies disguised as truth, and it comes at us from all sides: opportunists on the far right, Russian misinformed social media influencers among others. It's endangering our democracy and causing havoc in our electoral system, schools, hospitals, workplaces, and in our Capitol. Advances in technology, including rapid developments in artificial intelligence, threaten to make the problems even worse by amplifying false claims and manufacturing credibility. In *Attack from Within*, legal scholar and analyst Barbara McQuade shows us how to identify the ways disinformation is seeping into all facets of our society and how we can fight against it. The book includes *The Authoritarian Playbook*, a brief history of disinformation from Mussolini and Hitler to Bolsonaro and Trump, chronicles the ways in which authoritarians have used disinformation to seize and retain power. Disinformation tactics like demonizing the other, seducing with nostalgia, silencing critics, muzzling the media, condemning the courts, stoking violence, and reasons why they work. An explanation of why America is particularly vulnerable to disinformation and how it exploits our First Amendment. Freedom's sparks, threats and violence, and destabilizes social structures. Real, accessible solutions for countering disinformation and maintaining the rule of law, such as making domestic terrorism a federal crime, increasing media literacy in schools, criminalizing doxxing, and much more. Disinformation is designed to evoke a strong emotional response to push us toward more extreme views, unable to find common ground with others. The false claims that led to the breathtaking attack on our Capitol in 2021 may have been only a dress rehearsal. *Attack from Within* shows us how to prevent it from happening again, thus preserving our country's hard-won democracy.

Part II covers the main areas of economic regulation, including the limits of national and regional jurisdiction over MNE activities, controls and liberalization of entry and establishment, tax, company and competition law. Part III introduces the social dimension of MNE regulation, covering labour rights, human rights and environmental issues, and Part IV deals with the contribution of international law and organizations to MNE regulation and to the control of investment risks, covering the main provisions found in international investment agreements and their recent interpretation by international tribunals.
