Robert Kegan The Evolving Self

The Evolving Self Robert Kegan,1982 An examination of how thought and emotion are integrated in human development

In Over Our Heads Robert Kegan,1998-07-21 If contemporary culture were a school with all the tasks and expectations meted out by modern life as its curriculum would anyone graduate In the spirit of a sympathetic teacher Robert Kegan guides us through this tricky curriculum assessing the fit between its complex demands and our mental capacities and showing what happens when we find ourselves as we so often do in over our heads In this dazzling intellectual tour he completely reintroduces us to the psychological landscape of our private and public lives A decade ago in *The Evolving Self* Kegan presented a dynamic view of the development of human consciousness Here he applies this widely acclaimed theory to the mental complexity of adulthood As parents and partners employees and bosses citizens and leaders we constantly confront a bewildering array of expectations prescriptions claims and demands as well as an equally confusing assortment of expert opinions that tell us what each of these roles entails Surveying the disparate expert literatures which normally take no account of each other Kegan brings them together to reveal for the first time what these many demands have in common Our frequent frustration in trying to meet these complex and often conflicting claims results he shows us from a mismatch between the way we ordinarily know the world and the way we are unwittingly expected to understand it *In Over Our Heads* provides us entirely fresh perspectives on a number of cultural controversies the abstinence vs safe sex debate the diversity movement communication across genders the meaning of postmodernism What emerges in these pages is a theory of evolving ways of knowing that allows us to view adult development much as we view child development as an open ended process born of the dynamic interaction of cultural demands and emerging mental capabilities If our culture is to be a good school as Kegan suggests it must offer along with a challenging curriculum the guidance and support that we clearly need to master this course a need that this lucid and richly argued book begins to meet

Immunity to Change Robert Kegan,Lisa Laskow Lahey,2009-02-15 Unlock your potential and finally move forward A recent study showed that when doctors tell heart patients they will die if they don t change their habits only one in seven will be able to follow through successfully Desire and motivation aren t enough even when it s literally a matter of life or death the ability to change remains maddeningly elusive Given that the status quo is so potent how can we change ourselves and our organizations In *Immunity to Change* authors Robert Kegan and Lisa Lahey show how our individual beliefs along with the collective mind sets in our organizations combine to create a natural but powerful immunity to change By revealing how this mechanism holds us back Kegan and Lahey give us the keys to unlock our potential and finally move forward And by pinpointing and uprooting our own immunities to change we can bring our organizations forward with us This persuasive and practical book filled with hands on diagnostics and compelling case studies delivers the tools you need to overcome the forces of inertia and transform your life

and your work How the Way We Talk Can Change the Way We Work Robert Kegan, Lisa Laskow Lahey, 2001-07-02 Why is the gap so great between our hopes our intentions even our decisions and what we are actually able to bring about Even when we are able to make important changes in our own lives or the groups we lead at work why are the changes so frequently short lived and we are soon back to business as usual What can we do to transform this troubling reality In this intensely practical book Harvard psychologists Robert Kegan and Lisa Laskow Lahey take us on a carefully guided journey designed to help us answer these very questions And not just generally or in the abstract They help each of us arrive at our own particular answers that can solve the puzzling gap between what we intend and what we are able to accomplish How the Way We Talk Can Change the Way We Work provides you with the tools to create a powerful new build it yourself mental technology **An Everyone Culture** Robert Kegan, Lisa Laskow Lahey, 2016-03-01 A Radical New Model for Unleashing Your Company's Potential In most organizations nearly everyone is doing a second job no one is paying them for namely covering their weaknesses trying to look their best and managing other people's impressions of them There may be no greater waste of a company's resources The ultimate cost neither the organization nor its people are able to realize their full potential What if a company did everything in its power to create a culture in which everyone not just select high potentials could overcome their own internal barriers to change and use errors and vulnerabilities as prime opportunities for personal and company growth Robert Kegan and Lisa Lahey and their collaborators have found and studied such companies Deliberately Developmental Organizations A DDO is organized around the simple but radical conviction that organizations will best prosper when they are more deeply aligned with people's strongest motive which is to grow This means going beyond consigning people development to high potential programs executive coaching or once a year off sites It means fashioning an organizational culture in which support of people's development is woven into the daily fabric of working life and the company's regular operations daily routines and conversations An Everyone Culture dives deep into the worlds of three leading companies that embody this breakthrough approach It reveals the design principles concrete practices and underlying science at the heart of DDOs from their disciplined approach to giving feedback to how they use meetings to the distinctive way that managers and leaders define their roles The authors then show readers how to build this developmental culture in their own organizations This book demonstrates a whole new way of being at work It suggests that the culture you create is your strategy and that the key to success is developing everyone **The Evolving Self** Mihaly Csikszentmihalyi, 2018-08-21 **Change Leadership** Tony Wagner, Robert Kegan, Lisa Laskow Lahey, Richard W. Lemons, Jude Garnier, Deborah Helsing, Annie Howell, Harriette Thurber Rasmussen, 2012-06-28 The Change Leadership Group at the Harvard School of Education has through its work with educators developed a thoughtful approach to the transformation of schools in the face of increasing demands for accountability This book brings the work of the Change Leadership Group to a broader audience providing a framework to analyze the work of school change and exercises that

guide educators through the development of their practice as agents of change It exemplifies a new and powerful approach to leadership in schools

Changes of Mind Jenny Wade,1996-01-01 An original theory of the development of consciousness that brings together research from neurology new paradigm studies psychology and mysticism *Treating the Self* Ernest S. Wolf,2002-09-24 Now available in paper for the first time this classic text is about how an analyst analyzes Rooted in the theory of psychoanalytic self psychology as put forth by Heinz Kohut and his colleagues *Treating the Self* focuses on the application of the self psychological concept of the psyche to the actual conduct of psychoanalytic treatment The result is not a how to approach but rather a volume that suggests a theory of treatment and offers guidelines for creative ways of thinking about therapy Written by Ernest Wolf a close collaborator of Heinz Kohut this is a personal account of the process of self psychology presented by one of the foremost experts in the field

Breakdown of Will George Ainslie,2001-03-19 Ainslie argues that our responses to the threat of our own inconsistency determine the basic fabric of human culture He suggests that individuals are more like populations of bargaining agents than like the hierarchical command structures envisaged by cognitive psychologists The forces that create and constrain these populations help us understand so much that is puzzling in human action and interaction from addictions and other self defeating behaviors to the experience of willfulness from pathological over control and self deception to subtler forms of behavior such as altruism sadism gambling and the social construction of belief This book integrates approaches from experimental psychology philosophy of mind microeconomics and decision science to present one of the most profound and expert accounts of human irrationality available It will be of great interest to philosophers and an important resource for professionals and students in psychology economics and political science

The Evolving Self Robert KEGAN,2009-06-30 The Evolving Self focuses upon the most basic and universal of psychological problems the individual s effort to make sense of experience to make

meaning of life According to Robert Kegan meaning making is a lifelong activity that begins in earliest infancy and continues to evolve through a series of stages encompassing childhood adolescence and adulthood The Evolving Self describes this process of evolution in rich and human detail concentrating especially on the internal experience of growth and transition its costs and disruptions as well as its triumphs At the heart of our meaning making activity the book suggests is the drawing and redrawing of the distinction between self and other Using Piagetian theory in a creative new way to make sense of how we make sense of ourselves Kegan shows that each meaning making stage is a new solution to the lifelong tension between the universal human yearning to be connected attached and included on the one hand and to be distinct independent and autonomous on the other The Evolving Self is the story of our continuing negotiation of this tension It is a book that is theoretically daring enough to propose a reinterpretation of the Oedipus complex and clinically concerned enough to suggest a variety of fresh new ways to treat those psychological complaints that commonly arise in the course of development Kegan is an irrepressible storyteller an impassioned opponent of the health and illness approach to psychological distress and a sturdy builder of psychological theory His is an original and distinctive new voice in the growing discussion of human development across the life span

Unlocking Leadership Mindtraps Jennifer Garvey Berger, 2019-01-29 Author and consultant Jennifer Garvey Berger has worked with all types of leaders from top executives at Google to nonprofit directors who are trying to make a dent in social change She hears a version of the same plea from every client in nearly every sector around the world I know that complexity and uncertainty are testing my instincts but I don t know which to trust Is there some way to know what to do when I can t know what s next Her newest work is an answer to this plea Using her background in adult development complexity theories and leadership consultancy Garvey Berger discerns five pernicious and pervasive mind traps to frame the book These are the desire for simple stories our sense that we are right our desire to get along with others in our group our fixation with control and our constant quest to protect and defend our egos In addition to understanding

why these natural impulses steer us wrong in a fast moving world leaders will get powerful questions and approaches that help them escape these patterns

Another Way Stephen Lewis, Matthew Wesley Williams, Dori Grinenko Baker, 2020-01-22 Another Way describes a new way of leadership for the 21st Century one that inspires people to delve deeply into their own selves and that creates a mysterious relatedness among strangers When this leadership happens we remember people are created to experience community to find joy in one another and to create a better world out of a deep reservoir where the soul resides Written by the leaders of the Forum for Theological Exploration the internationally recognized leadership incubator for emerging Christian leaders Another Way will shape the way you look at yourself your leadership and the communities that hold you accountable to making the world a better place

Meanings of Life Roy F. Baumeister, 1991-01-01 Who among us has not at some point asked what is the meaning of life In this extraordinary book an eminent social scientist looks at the big picture and explores what empirical studies from diverse fields tell us about the human condition MEANINGS OF LIFE draws together evidence from psychology history anthropology and sociology integrating copious research findings into a clear and conclusive discussion of how people attempt to make sense of their lives In a lively and accessible style emphasizing facts over theories Baumeister explores why people desire meaning in their lives how these meanings function what forms they take and what happens when life loses meaning It is the most comprehensive examination of the topic to date

[The Discerning Heart: the Developmental Psychology of Robert Kegan](#) Philip M. Lewis, 2018-03-14 This small book is about how if we are fortunate we get smarter as we grow older Smarter not in the sense that our IQ score rises but smarter in a much more important sense This book is about the growth of human understanding a kind of understanding that enables us to see both ourselves and others more clearly and in the process leads us to feel more deeply Its focus is a remarkable new theory of the development of the self by Harvard psychologist Robert Kegan The ideas contained in this book will enable you to view yourself others and the world through new eyes It will put your experience of living in the world in motion and I hope make you both more discerning and thereby more vulnerable to our very human struggle of making sense of our lives

Your Whole Life James Bernard Murphy, 2020-05-22 A holistic view of human development that rejects the conventional stages of childhood adulthood and old age When we talk about human development we tend to characterize it as proceeding through a series of stages in which we are first children then adolescents and finally adults But as James Bernard Murphy observes growth is not limited to the young nor is decline limited to the aged We are never trapped within the horizon of a particular life stage children anticipate adulthood and adults recapture childhood According to Murphy the very idea of stages of life undermines our ability to see our lives as a whole In Your Whole Life Murphy asks what accounts for the unity of a human life over time He advocates for an unconventional developmental story of human nature based on a nested hierarchy of three powers first each person s unique human genome insures biological identity over time second each person s powers of imagination and memory insure psychological identity

over time and third each person's ability to tell his or her own life story insures narrative identity over time Just as imagination and memory rely upon our biological identity so our autobiographical stories rest upon our psychological identity Narrative is not the foundation of personal identity as many argue but its capstone Engaging with the work of Aristotle Augustine Jesus and Rousseau as well as with the contributions of contemporary evolutionary biologists and psychologists Murphy challenges the widely shared assumptions in Western thinking about personhood and its development through discrete stages of childhood adulthood and old age He offers instead a holistic view in which we are always growing and declining always learning and forgetting and always living and dying and finds that only in relation to one's whole life does the passing of time obtain meaning

My Antelope Loves Cantaloupe Robert Kegan, 2020-11-18 To nourish the love of language its music and its surprise Harvard professor Robert Kegan appeals to all a young child's appetites the fascination with animals the preoccupation with food the delight in the incongruous Kegan's clever text and Walsh's evocative watercolors introduce the young child to the classic form of The Joke a set up My palominos and a punchline love jalapenos They can't resist telling it over and over My Antelope Loves Cantaloupe is the Raffi of picture books An earworm of affectionate silliness it will become a part of the family's shared language This book may start your child on a path to Harvard or giggles or both

Changing on the Job Jennifer Garvey Berger, 2011-11-30 Listen to people in every field and you'll hear a call for more sophisticated leadership for leaders who can solve more complex problems than the human race has ever faced But these leaders won't simply come to the fore we have to develop them and we must cultivate them as quickly as is humanly possible Changing on the Job is a means to this end As opposed to showing readers how to play the role of a leader in a paint by numbers fashion Changing on the Job builds on theories of adult growth and development to help readers become more thoughtful individuals capable of leading in any scenario Moving from the theoretical to the practical and employing real world examples author Jennifer Garvey Berger offers a set of building blocks to help cultivate an agile workforce while improving performance Coaches HR professionals thoughtful leaders and anyone who wants to flourish on the job will find this book a vital resource for developing their own capacities and those of the talent that they support
