Volumes 22 and 23 in the Collected Works document many of Bernard Lonergan's lectures and seminars on theological method, and in so doing trace the evolution of his thought between the publication of *Insight* and the completion of *Method in Theology*. Volume 22 contains a record of his English lectures on method delivered at institutes in 1962 (Regis College, Toronto), in 1964 (Georgetown University), and in 1968 (Boston College), while volume 23 is devoted to his Latin courses on method offered at the Gregorian University between 1958 and 1962. This is the most 'interactive' volume in the series published to date. Additional digital text and audio source materials are available online at [www.bernardlonergan.com](http://www.bernardlonergan.com). The present volume, even when read on its own, sketches an outline of the development of Lonergan's ideas on such key notions as horizon, conversion, and meaning, as well as the movement from the division of theology into positive, dogmatic, and systematic (parts 1 and 2), to the division in terms of operational or functional specialization (part 3). Together these materials further our understanding of critical theological concepts and their emergence within an important and complex period in Lonergan's development.

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of

Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves. Text readability is at the core of successful reading instruction and language learning. To counteract the challenges of complex reading content, text leveling is a vital necessity for readers with limited language access. A transdisciplinary analysis of reading development and linguistic interrelations builds the theoretical foundation of the base-1 method. This method focuses solely on structural and functional text elements on the word, sentence and cohesion level. But this book also discusses the significance of other prevalent readability factors, such as the reader's language knowledge or socio-cultural background. The base-1 method is designed to level early reading texts in German and other alphabetic languages. Experimental tests with a German immersion population has led to a preliminary calibration to demonstrate the validity of this approach. Bernd Nuss ist erfahrener Immersionslehrer in verschiedenen Programmen, die sich über Nord-, Zentral- und Südamerika erstrecken. An der E. E. Waddell Language Academy wirkt er schulintern als Immersion Facilitator, kooperiert mit Bildungsorganisationen und betreut die Praktika von Gaststudierenden an der Schule.
