Inside the Cell Erin E Murphy, 2015-10-06

Josiah Sutton was convicted of rape He was five inches shorter and 65 pounds lighter than the suspect described by the victim but at trial a lab analyst testified that his DNA was found at the crime scene His case looked like many others arrest swab match conviction But there was just one problem Sutton was innocent We think of DNA forensics as an infallible science that catches the bad guys and exonerates the innocent But when the science goes rogue it can lead to a gross miscarriage of justice Erin Murphy exposes the dark side of forensic DNA testing crime labs that receive little oversight and produce inconsistent results prosecutors who push to test smaller and poorer quality samples inviting error and bias law enforcement officers who compile massive unregulated and racially skewed DNA databases and industry lobbyists who push policies of stop and spit DNA testing is rightly seen as a transformative technological breakthrough but we should be wary of placing such a powerful weapon in the hands of the same broken criminal justice system that has produced mass incarceration privileged government interests over personal privacy and all too often enforced the law in a biased or unjust

manner Inside the Cell exposes the truth about forensic DNA and shows us what it will take to harness the power of genetic identification in service of accuracy and fairness
