Technical Communication Today was written for introduction to technical communication or technical writing courses taught most often in English Departments. Technical Communication Today remains the only text to fully centralize the computer in the technical workplace, presenting how writers use computers throughout their communication process. Technical Communication Today speaks to today's students and how they expect to learn information. Instructional narrative is "chunked," so that readable portions of text are combined with graphics. This presentation facilitate learning, and models the way today's technical documents should be designed. Additionally, the chunked presentation integrates an awareness of how documents are read--often "raided" by readers seeking the information they need. By mirroring these processes in its content and structure, Technical Communication Today offers readers a higher level of accessibility.
