$$\begin{array}{r} 0.60 \\ + 0.49 \\ \hline \end{array}$$

You can use decimal squares to represent this addition problem.

Step 2: Add the hundredths.

$$\begin{array}{r} 0.60 \\ + 0.49 \\ \hline 9 \end{array}$$

100 hundredths

Step 3: Add the tenths.

Remember to write the decimal point in your answer.

$$\begin{array}{r} 1 \\ 0.60 \\ + 0.49 \\ \hline 1.09 \end{array}$$

Chantell's combined time for the two races was 1.09 hours.

Add.

1. $2.97 + 0.35 =$ _____
2. $13.88 + 7.694 =$ _____
3. $39.488 + 25.7 =$ _____
4. $88.6 + 4.277 + 78.95 =$ _____

Pane,2017 The basic concept of personalized learning PL instruction that is focused on meeting students individual learning needs while incorporating their interests and preferences has been a longstanding practice in U S K 12 education Options for personalization have increased as personal computing devices have become increasingly affordable and available in schools and developers created software to support individual student learning In recent years it has become more common for schools to embrace schoolwide models of PL We collected data from schools in the Next Generation Learning Challenges NGLC s Breakthrough School Models program Our study seeks to describe the practices and strategies these schools used to implement PL understand some of the challenges and facilitators and consider these alongside achievement findings to discern patterns that may be informative Teachers and students reported higher levels of many aspects of personalization than their counterparts in a national sample These included time for one on one tailored support for learning using up to date information on student progress to personalize instruction and group students students tracking their own progress competency based practices and flexible use of staff space and time However some more difficult to implement aspects did not appear to differ from practices in schools nationally such as student discussions with teachers on progress and goals keeping up to date documentation of student strengths weaknesses and goals and student choice of topics and materials We estimate study students gained about 3 percentile points in mathematics relative to a comparison group of similar students In reading there was a similar trend though it was not statistically significant Low performing and high performing students appeared to benefit Publisher s description
