**The New Psychedelic Revolution** Feb 28 2023 A bold exploration of modern psychedelic culture, its history, and future • Examines 3 modern psy-culture architects: chemist Alexander “Sasha” Shulgin, mycologist-philosopher Terence McKenna, and visionary artist Alex Grey • Investigates the use of microdosing in extreme sports, the psy-trance festival experience, and the relationship between the ego, entheogens, and toxicity • Presents a “History of Visionary Art,” from its roots in prehistory, to Ernst Fuchs and the Vienna School of the Fantastic, to contemporary psychedelic art After the dismantling of a major acid laboratory in 2001 dramatically reduced the world supply of LSD, the psychedelic revolution of the 1960s appeared to have finally run its course. But the opposite has actually proven to be true, and a psychedelic renaissance is rapidly emerging with the rise in popularity of transformational festivals like Burning Man and BOOM!, the return to positive media coverage of the potential benefits of entheogens, and the growing number of celebrities willing to admit the benefits of their own personal use. Along with the return of university research, the revival of psychedelic philosophy, and the increasing popularity of visionary art, these new developments signify the beginning of a worldwide

psychedelic cultural revolution more integrated into the mainstream than the counterculture uprising of the 1960s. In his latest book, James Oroc defines the borders of 21st-century psychedelic culture through the influence of its three main architects-- chemist Alexander Shulgin, mycologist Terence McKenna, and visionary artist Alex Grey--before illustrating a number of facets of this "Second Psychedelic Revolution," including the use of microdosing in extreme sports, the tech-savvy psychedelic community that has arisen around transformational festivals, and the relationship between the ego, entheogens, and toxicity. This volume also presents for the first time a "History of Visionary Art" that explains its importance to the emergence of visionary culture. Exploring the practical role of entheogens in our selfish and fast-paced modern world, the author explains how psychedelics are powerful tools to examine the ego and the shadow via the transpersonal experience. Asserting that a cultural adoption of the entheogenic perspective is the best chance that our society has to survive, he then proposes that our ongoing psychedelic revolution--now a century old since the first synthesis of a psychedelic in 1918--offers the potential for the birth of a new Visionary Age.

*Tripping* Oct 27 2022 A collection of transformational, awe-provoking psychedelic experiences. In *Tripping*, Charles Hayes has gathered fifty narratives about unforgettable psychedelic experiences from an international array of subjects representing all walks of life--respectable Baby Boomers, aging hippies, young ravers, and accomplished writers such as John Perry Barlow, Anne Waldman, Robert Charles Wilson, Paul Devereux, and Tim Page. Taking a balanced, objective approach, the book depicts a broad spectrum of altered states, from the sublime to the terrifying. Hayes's supplemental essays provide a synopsis of the history and culture of psychedelics and a discussion of the kinetics of tripping. Specially featured is an interview with the late Terence McKenna, who was perhaps the preeminent psychedelic spokesperson of our time. A storehouse of astonishing, often otherworldly tales, *Tripping* is a compendium of forbidden memories that enables readers to trip vicariously or compare notes on their own experiences.

The Archaic Revival Jun 15 2024 Cited by the L.A. Weekly as "the culture's foremost spokesman for the psychedelic experience," Terence McKenna is an underground legend as a brilliant raconteur, adventurer, and expert on the experiential use of mind-altering plants. In these essays, interviews, and narrative adventures, McKenna takes us on a mesmerizing journey deep into the Amazon as well as into the hidden recesses of the human psyche and the outer limits of our culture, giving us startling visions of the past and future.

**True Hallucinations** May 22 2022 'The single most influential spokesperson for organic psychedelics' The Independent With a new foreword from Dennis McKenna. From renowned ethnobotanist and psychonaut Terence McKenna comes this surreally mind-bending adventure into the depths of the human experience. *True Hallucinations* is a mesmerising odyssey

of McKenna's travels in the Amazon with a band of friends during the 1970s. From mushrooms and flying saucers to pirates and James Joyce, McKenna uncovers the limitless potential of organic psychedelics to open our minds, bodies and spirits to higher states of being.

*The Evolutionary Mind* Oct 07 2023 Stimulating and often startling discussions between three friends, all highly original thinkers: Rupert Sheldrake, controversial biologist, Terence McKenna, psychedelic visionary, and Ralph Abraham, chaos mathematician. Their passion is to break out of paradigms that retard our evolution and to explore new possibilities. Through challenge and synergy they venture where few have gone before, leading their readers on an exciting journey of discovery. Their discussions focus on the evolution of the mind, the role of psychedelics, skepticism, the psychic powers of animals, the structure of time, the life of the heavens, the nature of God, and transformations of consciousness. "Three fine thinkers take us plunging into the universe of chaos, mind, and spirit. Instead of leaving us lost, they bring us back with startling insights and more wonder than we knew we had." -Matthew Fox, "Original Blessing and Sheer Joy" "A jam-session of the mind, an intellectual movable feast, an on-going conversation that began over twenty years ago and remains as lively and relevant today as it ever was. Sadly, Terence had to leave the conversation a little earlier than planned. But the appearance of this book of dialogues at this critical, historical juncture is a reaffirmation of the potency of the optimistic vision that the dialogues express." -Dennis McKenna, brother of the late Terence McKenna Rupert Sheldrake is a biologist and author of many books including "The Sense of Being Stared At, And Other Aspects of the Extended Mind." Ralph Abraham is a mathematician, one of the pioneers of chaos theory and the author of several books including "Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History." The late Terence McKenna was a scholar of shamanism, ethno-botanist, psychedelic researcher and author of many books including "Food of the Gods and True Hallucinations."

*Chaos, Creativity, and Cosmic Consciousness* Dec 09 2023 Three of the most original thinkers of our time explore issues that call into question our current views of reality, morality, and the nature of life. • A wide-ranging investigation of the ecology of inner and outer space, the role of chaos theory in the dynamics of human creation, and the rediscovery of traditional wisdom. In this book of "dialogues," the late psychedelic visionary and shamanologist Terence McKenna, acclaimed biologist and originator of the morphogenetic fields theory Rupert Sheldrake, and mathematician and chaos theory scientist Ralph Abraham explore the relationships between chaos and creativity and their connection to cosmic consciousness. Their observations call into question our current views of reality, morality, and the nature of life in the universe. The authors challenge the reader to the deepest levels of thought with wide-ranging investigations of the

ecology of inner and outer space, the role of chaos in the dynamics of human creation, and the resacralization of the world. Among the provocative questions the authors raise are: Is Armageddon a self-fulfilling prophecy? Are we humans the imaginers or the imagined? Are the eternal laws of nature still evolving? What is the connection between physical light and the light of consciousness? Part ceremony, part old-fashioned intellectual discussion, these dialogues are an invitation to a new understanding of what Jean Houston calls "the dreamscapes of our everyday waking life."

Psychedelic Chemistry Mar 20 2022 The most complete book ever written on how to manufacture psychedelic drugs! Intended only for those who have a thorough knowledge of advanced lab techniques in organic chemistry. Extracting THC from marijuana. Making LSD. Synthesizing cocaine. Mescaline, harmaline, muscimole and more. Out of print for years, now available in a revised, updated edition with more material.

True Hallucinations Mar 12 2024 This mesmerizing, surreal account of the bizarre adventures of Terence McKenna, his brother Dennis, and a small band of their friends, is a wild ride of exotic experience and scientific inquiry. Exploring the Amazon Basin in search of mythical shamanic hallucinogens, they encounter a host of unusual characters -- including a mushroom, a flying saucer, pirate Mantids from outer space, an appearance by James and Nora Joyce in the guise of poultry, and translinguistic matter -- and discover the missing link in the development of human consciousness and language.

**High Weirdness** Feb 04 2021 An exploration of the emergence of a new psychedelic spirituality in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson. A study of the spiritual provocations to be found in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson, *High Weirdness* charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s. These three authors changed the way millions of readers thought, dreamed, and experienced reality—but how did their writings reflect, as well as shape, the seismic cultural shifts taking place in America? In *High Weirdness*, Erik Davis—America's leading scholar of high strangeness—examines the published and unpublished writings of these vital, iconoclastic thinkers, as well as their own life-changing mystical experiences. Davis explores the complex lattice of the strange that flowed through America's West Coast at a time of radical technological, political, and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality.

*Hallucinations* Dec 29 2022 Hallucinations, for most people, imply madness. But there are many different types of non-psychotic hallucination caused by various illnesses or injuries, by intoxication--even, for many people, by falling sleep. From the elementary geometrical shapes that we see when we rub our eyes to the complex swirls and blind spots and

zigzags of a visual migraine, hallucination takes many forms. At a higher level, hallucinations associated with the altered states of consciousness that may come with sensory deprivation or certain brain disorders can lead to religious epiphanies or conversions. Drawing on a wealth of clinical examples from his own patients as well as historical and literary descriptions, Oliver Sacks investigates the fundamental differences and similarities of these many sorts of hallucinations, what they say about the organization and structure of our brains, how they have influenced every culture's folklore and art, and why the potential for hallucination is present in us all.

*The Master Within* Apr 08 2021 *The Master Within* is the result of over 5 years of diligent research and the private healing practice of Gary Hopkins. This book is geared toward teaching people how to physically feel energy and how to perform healing sessions on themselves and others. This book also includes a "Grid Work" sequence (which is considered advanced energy healing technique) that is called Axiatonal Integration.

Terence McKenna and Ethnopharmacology Feb 11 2024 'Terence McKenna and Ethnopharmacology' (Great Minds Series, Vol. 8) is a study that features one of the most famous 'psychedelic' philosophers of our time. Terence McKenna (1946-2000) has been studying the ontological foundations of shamanism and the ethnopharmacology of spiritual transformation for the past quarter century. An innovative theoretician and spellbinding orator, McKenna emerged as a powerful voice for the psychedelic movement and the emergent societal tendency he calls 'The Archaic Revival,' title of one of his most popular books. Poetically dispensing enlightened social criticism and new theories of the fractal dynamics of time, he unraveled many aspects of the visionary lexicon. As Artist Alex Grey suggests, 'In the twilight of human history, McKenna's prescription for salvation is just so crazy it might work.' In 1993, McKenna wrote in 'This World and its Double: 'It's clearly a crisis of two things: of consciousness and conditioning. These are the two things that the psychedelics attack. We have the technological power, the engineering skills to save our planet, to cure disease, to feed the hungry, to end war. But we lack the intellectual vision, the ability to change our minds. We must decondition ourselves from 10,000 years of bad behavior. And, it's not easy. The books comes with a bonus essay by Peter Fritz Walter, entitled 'The Shamanic Method.'

**The Invisible Landscape** Jan 10 2024 A thoroughly revised edition of the much-sought-after early work by Terence and Dennis McKenna that looks at shamanism, altered states of consciousness, and the organic unity of the King Wen sequence of the I Ching.

*Brotherhood of the Screaming Abyss* Nov 27 2022 *Brotherhood of the Screaming Abyss: My Life with Terence McKenna*, is an autobiographical account of renowned ethnobotanist Dennis McKenna's childhood, his relationship with his brother,

and the author's experiences with and reflections on psychedelics, philosophy, and scientific innovation. Chronicling the McKenna brothers' childhood in western Colorado during the 1950s and 1960s, Dennis writes of his adolescent adventures including his first encounters with alcohol and drugs (many of which were facilitated by Terence), and the people and ideas that shaped them both. *Brotherhood of the Screaming Abyss* weaves personal narrative through philosophical ideas and tales of psychedelic experimentation. In this book, Dennis describes these inquiries with the wisdom of perspective. In his account of what has become known as "The Experiment at La Chorrera"-- which Terence documented in his own 1989 book, *True Hallucinations* -- Dennis describes how he had visions of merging mushroom and human DNA, the brothers' predictions for the future, and their evolving ideas about society and consciousness. He also offers an intellectual understanding of the hallucinogenic effects of high-dose psychedelic mushrooms and other psychedelic substances. Dennis, now world-renowned for this ethnobotanical work, describes in *Brotherhood* his early interests in cosmology and astrology, his sometimes rocky relationship with his older brother and how their paths diverged later in their lives. Dennis describes his academic career in between touching accounts of both his mother's and Terence's battles with cancer. In the 10th Anniversary edition of *Brotherhood*, Dennis reflects on scientific revelations, climate change, and the social and political crises of our time. The new edition also features both the original foreword by Luis Eduardo Luna and a new foreword by Dr. Bruce Damer. *Brotherhood of the Screaming Abyss* is a story about brotherhood, psychedelic experimentation, and the intertwining nature of science and myth.

**Aya** Jul 24 2022 When experiential journalist Razam sets out to document the booming business of Amazonian shamanism in the 21st century, he quickly finds himself caught up in a culture clash between the old world and the new.

**Antic Hay** Jan 18 2022 DigiCat Publishing presents to you this special edition of "Antic Hay" by Aldous Leonard Huxley. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

**Saint Peter's Snow** Jun 03 2023 It could have been a common street accident that put Dr. Georg Amberg in the hospital, but for the five weeks his doctors say he has been in a coma, recovering from a brain hemorrhage after being run down by a car, he has memories of a more disturbing nature. What of the violent events in the rural village of Morwede? The old woman threatening the priest with a breadknife, angry peasants with flails and cudgels, Baron von Malchin with a pistol defending his dreams for the Holy Roman Empire—how could Dr. Amberg ignore these? And what of the secret experiment to make a mind-altering drug from a white mildew occurring on wheat—a mildew called Saint Peter's Snow. In

this feverish tale of a man caught in the balance between two realities, Leo Pertuz offers a mystery of identity and a fable of faith and political fervor, banned by the Nazis when it was first published in 1933. *Saint Peter's Snow* is typical of Perutz's storytelling mastery: extraordinarily rich and elegant fiction that is taut with suspense, full of Old World irony and humor. Skyhorse Publishing, as well as our Arcade, Yucca, and Good Books imprints, are proud to publish a broad range of books for readers interested in fiction—novels, novellas, political and medical thrillers, comedy, satire, historical fiction, romance, erotic and love stories, mystery, classic literature, folklore and mythology, literary classics including Shakespeare, Dumas, Wilde, Cather, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

*Why Did the Chicken Cross the World?* Aug 13 2021 Veteran journalist Andrew Lawler delivers a “fascinating and delightful...globetrotting tour” (Wall Street Journal) with the animal that has been most crucial to the spread of civilization—the chicken. In a masterful combination of historical sleuthing and journalistic adventure, veteran reporter Andrew Lawler “opens a window on civilization, evolution, capitalism, and ethics” (New York) with a fascinating account of the most successful of all cross-species relationships—the partnership between human and chicken. This “splendid book full of obsessive travel and research in history” (Kirkus Reviews) explores how people through the ages embraced the chicken as a messenger of the gods, an all-purpose medicine, an emblem of resurrection, a powerful sex symbol, a gambling aid, a handy research tool, an inspiration for bravery, the epitome of evil, and, of course, the star of the world's most famous joke. Queen Victoria was obsessed with the chicken. Socrates's last words embraced it. Charles Darwin and Louis Pasteur used it for scientific breakthroughs. Religious leaders of all stripes have praised it. Now neuroscientists are uncovering signs of a deep intelligence that offers insights into human behavior. Trekking from the jungles of southeast Asia through the Middle East and beyond, Lawler discovers the secrets behind the fowl's transformation from a shy, wild bird into an animal of astonishing versatility, capable of serving our species' changing needs more than the horse, cow, or dog. The natural history of the chicken, and its role in entertainment, food history, and food politics, as well as the debate raging over animal welfare, comes to light in this “witty, conversational” (Booklist) volume.

*TechGnosis* Apr 01 2023 *TechGnosis* is a cult classic of media studies that straddles the line between academic discourse and popular culture; it appeals to both those secular and spiritual, to fans of cyberpunk and hacker literature and culture as much as new-thought adherents and spiritual seekers How does our fascination with technology intersect with the religious imagination? In *TechGnosis*—a cult classic now updated and reissued with a new afterword—Erik Davis

argues that while the realms of the digital and the spiritual may seem worlds apart, esoteric and religious impulses have in fact always permeated (and sometimes inspired) technological communication. Davis uncovers startling connections between such seemingly disparate topics as electricity and alchemy; online roleplaying games and religious and occult practices; virtual reality and gnostic mythology; programming languages and Kabbalah. The final chapters address the apocalyptic dreams that haunt technology, providing vital historical context as well as new ways to think about a future defined by the mutant intermingling of mind and machine, nightmare and fantasy.

*Male and Female Circumcision* Jun 10 2021 Every year around the world 13.3 million boys and 2 million girls have part or all of their external sex organs cut off. Doctors, parents, and politicians have been misled into thinking that these mutilations are beneficial, necessary and harmless. International respected experts in the fields of medicine, science, politics, law, ethics, sociology, anthropology, history and religion present the latest research, documentation and analysis of this world-wide problem, focusing on the ethical, political and legal aspects of sexual mutilation; the cost and burden to healthcare systems; the latest medical research; anatomical and function consequences; religious and cultural aspects; psychological aspects; and the world-wide campaign to end sexual mutilation.

**In Pursuit of Valis** Apr 20 2022

**Sacred Mushrooms and the Law** Sep 13 2021 Sacred Mushrooms and the Law is the only book covering the legal landscape underlying psychedelic mushrooms. All federal and state laws concerning mushrooms are covered, and charts outline potential punishments.

**The Pyramids** Aug 05 2023 A “richly illustrated . . . engaging, lucid account” of Ancient Egyptian Pyramids, what we know about them now, what we don’t, and what is still debated today (Kirkus Reviews). Hailed by Science News as “the new seminal text,” The Pyramids is a comprehensive record of Egypt’s most awe-inspiring monuments and what Egyptologists now know about them today—from their construction and purpose to the culture that surrounded them. Distinguished Egyptologist Miroslav Verner draws from the research of the earliest Egyptologists as well as the startling discoveries made with late twentieth century technology. Here you will find a clear, authoritative guide to the ancient culture that created the pyramids five thousand years ago without iron or bronze, and with only the most elementary systems of calculation. As Verner explains the magnitude of this accomplishment, he also traces the stories and ideas of the intrepid scientists who uncovered the mysteries of the pyramids. “Editor’s Choice . . . this comprehensive volume details everything you ever wanted to know about pyramids.” —Rosemary Herbert, Boston Herald “Displays both a deep respect for the research of Egyptologists and a comprehensive knowledge of it . . . An important, comprehensive resource for the

study of those most mysteriously, enduringly impressive structures.” —Kirkus Reviews “An accessible introduction to the culture of the ancient Egyptians.” —Die Welt

**Psilocybin Mushroom Handbook** Jul 12 2021 First genuinely up-to-date guide to psychedelic mushroom cultivation in years, containing information on both indoor and outdoor varieties. Contains step-by-step photographs and illustrations with detailed directions for the cultivation of four different psilocybin species, a resource guide for supplies and an introduction to mushroom biology, plus essays on the use of psychoactive mushrooms in traditional and modern contexts and ethnobotanical advice exploring medicinal use and the plant-human relationship.

*Psilocybin, Magic Mushroom Grower's Guide* Jan 30 2023

True hallucinations May 02 2023

**After Many a Summer Dies the Swan** Dec 17 2021 A Hollywood millionaire with a terror of death, whose personal physician happens to be working on a theory of longevity—these are the elements of Aldous Huxley's caustic and entertaining satire on man's desire to live indefinitely. With his customary wit and intellectual sophistication, Huxley pursues his characters in their quest for the eternal, finishing on a note of horror. "This is Mr. Huxley's Hollywood novel, and you might expect it to be fantastic, extravagant, crazy and preposterous. It is all that, and heaven and hell too....It is the kind of novel that he is particularly the master of, where the most extraordinary and fortuitous events are followed by contemplative little essays on the meaning of life....The story is outrageously good."—New York Times. "A highly sensational plot that will keep astonishing you to practically the final sentence."—The New Yorker. "Mr. Huxley's elegant mockery, his cruel aptness of phrase, the revelations and the ingenious surprises he springs on the reader are those of a master craftsman; Mr. Huxley is at the top of his form." —London Times Literary Supplement.

**Food of the Gods** Sep 06 2023 Reissued because of the current interest in Ecstasy, this is McKenna's extraordinary quest to discover the fruit of the Tree of Knowledge. He wonders why we are so fascinated by altered states of consciousness, do they reveal something about our origins as human beings and our place in nature?

**The Rose of Paracelsus** Oct 15 2021 A Harvard graduate student and researcher explores a global entheogen system, discovering their practices leading to cognitive enhancement and, arguably, the next human form. Revised Advance Reader Copy, 2017 From Cambridge to Moscow, Oxford to Zürich, Princeton to Mazar-i-Sharif and Bangkok, this journal of research interviews records the lifestyles within a most rare and elusive organization, one that has evolved special gifts: advanced capacities of thought, memory and perception.

**Inner Paths to Outer Space** May 10 2021 An investigation into experiences of other realms of existence and contact with

otherworldly beings • Examines how contact with alien life-forms can be obtained through the “inner space” dimensions of our minds • Presents evidence that other worlds experienced through consciousness-altering technologies are often as real as those perceived with our five senses • Correlates science fiction’s imaginal realms with psychedelic research For thousands of years, voyagers of inner space--spiritual seekers, shamans, and psychoactive drug users--have returned from their inner imaginal travels reporting encounters with alien intelligences. Inner Paths to Outer Space presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings. Based on their more than 60 combined years of research into the function of the brain, the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs. They contend that our centuries-old search for alien life-forms has been misdirected and that the alien worlds reflected in visionary science fiction actually mirror the inner space world of our minds. The authors show that these “alien” worlds encountered through altered states of human awareness, either through the use of psychedelics or other methods, possess a sense of reality as great as, or greater than, those of the ordinary awareness perceived by our five senses.

**The Dark Sacrament** Jun 22 2022 The Devil Is Alive and Well In The Dark Sacrament, coauthors David M. Kiely and Christina McKenna faithfully recount ten contemporary cases of demon possession, haunted houses, and exorcisms, and profile the work of two living, active exorcists. The authors serve as trustworthy guides on this suspense-filled journey into the bizarre, offering concrete advice on how to avoid falling prey to the dark side.

*Mushrooms, Mankind, DMT, and Hyperspace* Sep 25 2022 Terence McKenna covers wide-ranging and profound topics in his uniquely witty style and rare depth of intelligence. Topics include: the "Stoned Ape" Theory of evolution, consciousness expansion, the purpose of history, extraterrestrial possibilities, interdimensional communication, the DMT trip experience, shamanic science, alchemy and Hermeticism, the Logos, the eschaton, and many other spectra.

**Trip** Feb 16 2022 Part memoir, part history, part journalistic exposé, Trip is a look at psychedelic drugs, literature, and alienation from one of the twenty-first century's most innovative novelists--The Electric Kool-Aid Acid Test for a new generation. A Vintage Original. While reeling from one of the most creative--but at times self-destructive--outpourings of his life, Tao Lin discovered the strange and exciting work of Terence McKenna. McKenna, the leading advocate of psychedelic drugs since Timothy Leary, became for Lin both an obsession and a revitalizing force. In Trip, Lin's first book-length work of nonfiction, he charts his recovery from pharmaceutical drugs, his surprising and positive change in worldview, and his four-year engagement with some of the hardest questions: Why do we make art? Is the world made of

language? What happens when we die? And is the imagination more real than the universe? In exploring these ideas and detailing his experiences with psilocybin, DMT, salvia, and cannabis, Lin takes readers on a trip through nature, his own past, psychedelic culture, and the unknown.

Food of the Gods Mar 08 2021 An exploration of humans' symbiotic relationships with plants and chemicals presents information on prehistoric partnership societies, the roles of spices and spirits in the rise of dominator societies; and the politics of tobacco, tea, coffee, opium, and alcohol. Why, as a species, are humans so fascinated by altered states of consciousness? Can altered states reveal something to us about our origins and our place in nature? In *Food of the Gods*, ethnobotanist Terence McKenna's research on man's ancient relationship with chemicals opens a doorway to the divine, and perhaps a solution for saving our troubled world. McKenna provides a revisionist look at the historical role of drugs in the East and the West, from ancient spice, sugar, and rum trades to marijuana, cocaine, synthetics, and even television—illustrating the human desire for the “food of the gods” and the powerful potential to replace abuse of illegal drugs with a shamanic understanding, insistence on community, reverence for nature, and increased self-awareness. Praise for *Food of the Gods* “Deserves to be the modern classic on mind-altering drugs and hallucinogens.”—The Washington Post “Terence McKenna is the most important—and most entertaining—visionary scholar in America.”—Tom Robbins “The culture's foremost spokesperson for the psychedelic experience . . . Those who know and enjoy Joseph Campbell's work will almost certainly appreciate McKenna.”—L.A. Weekly “An eloquent proposal for recovering something vital—a sense of the sacred, the transcendent, the Absolute—before it's too late.”—Larry Dossey, M.D., author of *Meaning & Medicine*, *Recovering the Soul*, and *Space, Time & Machine*

**Chaos, Gaia, Eros** Aug 25 2022 Untitled Document *Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History* The History of the World According to Chaos Theory In this eclectic and interdisciplinary work, chaos pioneer Ralph Abraham traces the history of consciousness through a rediscovery of the three forces that drive it: chaos, gaia, and eros—the mind, body, and spirit of evolution. With startling originality and clarity of vision, Abraham employs photographs, timelines, charts, and an engaging format to sweep the reader along on this wild ride through math, science, mythology, philosophy, and the whole of history. Sure to fascinate the poet, scientist, philosopher, and historian in all of us, *Chaos, Gaia, Eros* is a mind-bending masterwork that reunites the chaotic and mythological forces of human history and blows the doors off existing modes of thought. “Chaos, Gaia, Eros deliteralizes history so we see it not only as a sequence of events, but as a flow of ideas and cultural myths... T]his is an important book for understanding the past, living in the present, and shaping the future.” -David Fideler, founder of Phanes Press and editor of *Alexandra: The*

Journal of the Western Cosmological Traditions "This extraordinary work is a veritable Rosetta stone, unlocking the past, present and future." -Joan Halifax, author of *The Fruitful Darkness*. "Ralph Abraham has] his own highly original ideas about the application of chaos theory to changes in history and consciousness, making for a rich and provocative blend" - Riane Eisler, author of *The Chalice and the Blade*. "Ralph Abraham is the most readable and delightful of mathematical pioneers. He is in the great tradition of Poincaré and Whitehead, a true mathematical humanist. Chaos, Gaia, Eros is destined to be a voice shaping the new millennium." -Terence McKenna, author of *True Hallucinations*, *The Invisible Landscape*, *Archaic Revival* and *Food of the Gods*. ----- Ralph Abraham is a world renowned chaos theorist and professor emeritus of mathematics at the University of California, Santa Cruz.

*The Evolutionary Mind* Nov 08 2023 Stimulating and often startling discussions between three friends, all highly original thinkers: Rupert Sheldrake, controversial biologist, Terence McKenna, psychedelic visionary, and Ralph Abraham, chaos mathematician. Their passion is to break out of paradigms that retard our evolution and to explore new possibilities. Through challenge and synergy they venture where few have gone before, leading their readers on an exciting journey of discovery. Their discussions focus on the evolution of the mind, the role of psychedelics, skepticism, the psychic powers of animals, the structure of time, the life of the heavens, the nature of God, and transformations of consciousness. "Three fine thinkers take us plunging into the universe of chaos, mind, and spirit. Instead of leaving us lost, they bring us back with startling insights and more wonder than we knew we had." —Matthew Fox, *Original Blessing and Sheer Joy* "A jam-session of the mind, an intellectual movable feast, an on-going conversation that began over twenty years ago and remains as lively and relevant today as it ever was. Sadly, Terence had to leave the conversation a little earlier than planned. But the appearance of this book of dialogues at this critical, historical juncture is a reaffirmation of the potency of the optimistic vision that the dialogues express." —Dennis McKenna, brother of the late Terence McKenna Rupert Sheldrake is a biologist and author of many books including *The Sense of Being Stared At*, *And Other Aspects of the Extended Mind*. Ralph Abraham is a mathematician, one of the pioneers of chaos theory and the author of several books including *Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History*. The late Terence McKenna was a scholar of shamanism, ethno-botanist, psychedelic researcher and author of many books including *Food of the Gods* and *True Hallucinations*.

Entheogens and the Future of Religion Jul 04 2023 A study of the importance of psychedelic plants and drugs in religion and society • With contributions by Albert Hofmann, R. Gordon Wasson, Jack Kornfield, Terence McKenna, the Shulgins, Rick Strassman, and others • Explores the importance of academic and religious freedom in the study of psychedelics and

the mind • Exposes the need for an organized spiritual context for entheogen use in order to fully realize their transformative and sacred value We live in a time when a great many voices are calling for a spiritual renewal to address the problems that face humanity, yet the way of entheogens--one of the oldest and most widespread means of attaining a religious experience--is forbidden, surrounded by controversy and misunderstanding. Widely employed in traditional shamanic societies, entheogens figure prominently in the origins of religion and their use continues today throughout the world. They alter consciousness in such a profound way that, depending on the set and setting, they can produce the ultimate human experiences: union with God or revelation of other mystical realities. With contributions by Albert Hofmann, Terence McKenna, Ann and Alexander Shulgin, Thomas Riedlinger, Dale Pendell, and Rick Strassman as well as interviews with R. Gordon Wasson and Jack Kornfield, this book explores ancient and modern uses of psychedelic drugs, emphasizing the complementary relationship between science and mystical experience and the importance of psychedelics to the future of religion and society. Revealing the mystical-religious possibilities of substances such as psilocybin mushrooms, mescaline, and LSD, this book exposes the vital need for developing an organized spiritual context for their use in order to fully realize their transformative and sacred value. Stressing the importance of academic and religious freedom, the authors call for a revival of scientific and religious inquiry into entheogens so they may be used safely and legally by those seeking to cultivate their spiritual awareness.

True Hallucinations May 14 2024

**Archaic Revival** Apr 13 2024

**True Hallucinations** Nov 15 2021 In March 1971, Terence McKenna, his brother Dennis and a small gypsy-like band of friends set off for the Colombian Amazonas. Along the surreal way, they encounter a cast of remarkable characters - including a mushroom, a flying saucer, pirates from outer space, and James Joyce in the guise of poultry. One result of their adventures was McKenna's theory that psilocybin, the psychoactive ingredient in the stropharia cubensis mushroom, is the missing link in the development of human consciousness and language...
