Outreach Programs Alfred Jospe, Bene berit Hillel Foundations, 1971 **Getting Students Involved in College Outreach Programs** Lonnie Carroll Dalton, 1974 Summer Melt Benjamin L. Castleman, Lindsay C. Page, 2020-01-15

Under increasing pressure to raise graduation rates and ensure that students leave high school college and career ready many school and district leaders may believe that when students graduate with college acceptances in hand their work is done But as Benjamin L Castleman and Lindsay C Page show summer can be a time of significant attrition among college intending seniors especially those from low income families Anywhere from 10 to 40 percent of students presumed to be headed to college fail to matriculate at any postsecondary institution in the fall following high school Summer Melt explores the complex factors that contribute to this trend the absence of school support confusion over paperwork lack of parental guidance and the teenage tendency to procrastinate The authors draw on findings from fields such as neuroscience behavioral economics and social psychology to contextualize these factors Drawing on a series of research studies they show how schools and districts can develop effective low cost scalable responses including counselor outreach peer mentoring and using text messages and social media to help students stay on track over the summer Summer Melt offers very practical guidance for schools and districts committed to helping their students make the transition to college *Effectiveness of an*

Outreach Program Designed to Enhance College Students' Help-seeking Attitudes, Intentions, and to Reduce Stigmas Wei-min Grace Blocher, 2011 *Beyond College Access* Sherell D. Wilson, 2021-10 This novel resource was written for educators and educational leaders empowering them to meet the needs of traditionally underserved students from acceptance to commencement and beyond If you are committed to helping all students succeed in college this book is for you Using a three pillar system informed by insights and research Dr Sherell Wilson s high quality solutions focused professional learning guide and workbook for schools colleges universities and education nonprofits provides a research informed model to improve outcomes and success for underserved college students Only about 60 percent of students who enroll in college earn a degree within eight years and that rate is significantly lower for racial and ethnic minority students and low income students Without the same equitable resources as their academic peers these students often find it easier to simply transfer

or drop out The solution is not more outreach or support programs Instead the college experience itself must be fundamentally reevaluated for an increasingly diverse student population and reshaped to address the deeper roots of the continuing lack of success Understanding a student s motivation to continue college enrollment requires learning the key influences on their educational decision making Educational leaders need a reliable method that better identifies measures and structures student achievement for diverse learner populations in a practical way Dr Wilson addresses the many challenges by using a multifaceted and comprehensive approach As part of a solid strategy to inspire inform and empower educational leaders the book addresses three main concepts called pillars enabling successful student transitions promoting student growth and development and enhancing student motivation to persist Each pillar is divided into two parts to examine and understand guide and to explore and develop workbook It is an eminently practical and engaging book that includes a wealth of resources and activities enhanced by students telling of their own experiences Online bonus resources include a members only community and more
