A Taxonomy for Learning, Teaching, and Assessing Oct 16 2022 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Our Favorite Day of the Year Mar 01 2024 "Gorgeously inviting illustrations and a joyful theme...the consummate first day read." —Shelf Awareness (starred review) A heartwarming picture book following a group of boys from different backgrounds throughout the school year as they become the best of friends. Musa's feeling nervous about his first day of school. He's not used to being away from home and he doesn't know any of the other kids in his class. And when he meets classmates Moisés, Mo, and Kevin, Musa isn't sure they'll have much in common. But over the course of the year, the four boys learn more about each other, the holidays they celebrate, their favorite foods, and what they like about school. The more they share with each other, the closer they become, until Musa can't imagine any better friends. In this charming story of friendship and celebrating differences, young readers can discover how entering a new friendship with an open mind and sharing parts of yourself brings people together. And the calendar of holidays at the end of the book will delight children as they identify special events they can celebrate with friends throughout the year.

Jamie Is Jamie Nov 16 2022 When free-spirited Jamie arrives at a new preschool, all the children learn that gender expression doesn't determine which toys to play with. There are so many fun things to play with at Jamie's new preschool—baby dolls to care for, toy cars to drive—and Jamie wants to play with them all! But the other children are confused by Jamie's gender expression . . . is Jamie a boy or a girl? Some toys are just for girls and others are

just for boys, aren't they? Not according to Jamie! Join Jamie's new friends as they learn the importance of cooperation, creativity, and empathy. Jamie Is Jamie is a great way to start a conversation with children about gender expression by: challenging gender stereotypes showing readers that playing is fundamental to learning reinforcing the idea that all children need the freedom to play unencumbered A special section for teachers, parents, and caregivers provides tips on how to make children's playtime learning time. Don't miss out on more of Jamie's adventures in Jamie and Bubbie, available now! The Jamie Is Jamie Series The Jamie Is Jamie series invites young children to join Jamie as they build confidence through imaginative free play, break down gender stereotypes, respect pronouns and gender identity, and learn self-advocacy skills. Each book includes a section for adults to help them reinforce the books' messages.

Mathematics Teachers Engaging with Representations of Practice Mar 21 2023 This book presents innovative approaches and state-of-the-art empirical studies on mathematics teacher learning. It highlights the advantages and challenges of such tools as classroom videos, concept cartoons, simulations, and scenarios. The book details how representations of practice encourage and afford professional development, and describes how these tools help to investigate aspects of teacher expertise, beliefs, and conceptions. In addition, the book identifies the methodological challenges that can emerge and the obstacles educators might encounter when using representations of practice. The book examines the nature of these challenges and provides suggestions for solving them. It offers a variety of different approaches that can help educators to develop professional learning activities for prospective and in-service teachers.

A Family Is a Family Is a Family Jan 19 2023 When a teacher asks her class to think about what makes their families special, the answers are all different, but the same in one important way ... When a teacher asks the children in her class to think about what makes their families special, the answers are all different in many ways — but the same in the one way that matters most of all. One child is worried that her family is just too different to explain, but listens as her classmates talk about what makes their families special. One is raised by a grandmother, and another has two dads. One has many stepsiblings, and another has a new baby in the family. As her classmates describe who they live with and who loves them — family of every shape, size and every kind of relation — the child realizes that as long as her family is full of caring people, it is special. A warm and whimsical look at many types of families, written by award-winning author Sara O'Leary, with quirky and sweet illustrations by Qin Leng. Learning in the Cloud Jul 13 2022 This comprehensive and cutting-edge book portrays a vision of how digital media can help transform schools, and what kinds of curriculum pedagogy, assessment, infrastructure, and learning

environments are necessary for the transformation to take place. The author and his research team spent thousands of hours observing classes and interviewing teachers and students in both successful and unsuccessful technology-rich schools throughout the United States and other countries. Featuring lessons learned as well as analysis of the most up-to-date research, they offer a welcome response to simplistic approaches that either deny the potential of technology or exaggerate its ability to reform education simply by its presence in schools. Challenging conventional wisdom about technology and education, *Learning in the Cloud*: critically examines concepts such as the "digital divide," "21st-century skills," and "guide on the side" for assessing and guiding efforts to improve schools; combines a compelling vision of technology's potential to transform learning with an insightful analysis of the curricular challenges required for meaningful change; and discusses the most recent trends in media and learning, such as the potential of tablets and e-reading.

Stone Fox Jan 31 2024 John Reynolds Gardiner's classic action-packed adventure story about a thrilling dogsled race has captivated readers for more than thirty years. Based on a Rocky Mountain legend, *Stone Fox* tells the story of Little Willy, who lives with his grandfather in Wyoming. When Grandfather falls ill, he is no longer able to work the farm, which is in danger of foreclosure. Little Willy is determined to win the National Dogsled Race—the prize money would save the farm and his grandfather. But he isn't the only one who desperately wants to win. Willy and his brave dog Searchlight must face off against experienced racers, including a Native American man named Stone Fox, who has never lost a race. Exciting and heartwarming, this novel has sold millions of copies and was named a New York Times Outstanding Children's Book.

Our Class is a Family May 23 2023 "Family isn't always your relatives. It's the ones who accept you for who you are. The ones who would do anything to see you smile, and who love you no matter what." -Unknown Teachers do so much more than just teach academics. They build a sense of community within their classrooms, creating a home away from home where they make their students feel safe, included, and loved. With its heartfelt message and colorfully whimsical illustrations, "Our Class is a Family" is a book that will help build and strengthen that class community. Kids learn that their classroom is a place where it's safe to be themselves, it's okay to make mistakes, and it's important to be a friend to others. When hearing this story being read aloud by their teacher, students are sure to feel like they are part of a special family. And currently, during such an unprecedented time when many teachers and students are not physically IN the classroom due to COVID-19 school closures, it's more important than it's ever been to give kids the message that their class is a family. Even at a distance, they still stick together.

Infant/Toddler Environment Rating Scale (ITERS-3) May 30 2021 Building on extensive feedback from the field as well as vigorous new research on how best to support infant and toddler development and learning, the authors have revised and updated the widely used Infant/Toddler Environment Rating Scale. ITERS-3 is the next-generation assessment tool for use in center-based child care programs for infants and toddlers up to 36 months of age. ITERS-3 focuses on the full range of needs of infants and toddlers and provides a framework for improving program quality. Further, the scale assesses both environmental provisions and teacher-child interactions that affect the broad developmental milestones of infants and toddlers, including: language, cognitive, social-emotional and physical development, as well as concern for health and safety. ITERS-3 is appropriate for state- and district-wide QRIS and continuous quality improvement, program evaluation by directors and supervisors, teacher self-evaluation, monitoring by agency staff, and teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. While the approach to assessing quality and the scoring process remain the same for the new ITERS-3, users will find the following improvements informed by extensive use of the ITERS in the field and by the most recent research: Enhanced focus on interactions and the role of the teacher. Six new language and literacy Items. A new Item on beginning math experiences. Expanded age range to include children from birth to 36 months. A new approach to scoring based solely on observation of ongoing classroom activity (3-hour time sample). The elimination of the parents/staff subscale and teacher interviews, freeing up time for observing more actual classroom practice. Improved indicator scaling, providing more precise and useful scores for use in professional development and self-improvement. Reduced emphasis on the number of materials, along with greater emphasis on how materials are used to encourage learning. Suitable for use in inclusive and culturally diverse programs, ITERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Books Activities Interaction Program Structure

Infant/toddler Environment Rating Scale Jan 07 2022 The ITERS-R is a thorough revision of the widely used program quality assessment instrument, The Infant/Toddler Environment Rating Scale. Designed for use in center-based child care programs for infants and toddlers up to 30 months of age, the ITERS-R can be used by program directors for supervision and program improvement, by teaching staff for self-assessment, by agency staff for monitoring, and in teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. Book jacket.

Motivational Interviewing, Second Edition Dec 30 2023 This bestselling work has introduced hundreds of thousands of professionals and students to motivational interviewing (MI), a proven approach to helping people overcome ambivalence that gets in the way of change. William R. Miller and Stephen Rollnick explain current thinking on the process of behavior change, present the principles of MI, and provide detailed guidelines for putting it into practice. Case examples illustrate key points and demonstrate the benefits of MI in addictions treatment and other clinical contexts. The authors also discuss the process of learning MI. The volume's final section brings together an array of leading MI practitioners to present their work in diverse settings.

Designing Teacher Evaluation Systems Jul 25 2023 WHAT IS EFFECTIVE TEACHING? It's not enough to say "I know it when I see it" – not when we're expecting so much more from students and teachers than in the past. To help teachers achieve greater success with their students we need new and better ways to identify and develop effective teaching. The Measures of Effective Teaching (MET) project represents a groundbreaking effort to find out what works in the classroom. With funding by the Bill & Melinda Gates Foundation, the MET project brought together leading academics, education groups, and 3,000 teachers to study teaching and learning from every angle. Its reports on student surveys, observations, and other measures have shaped policy and practice at multiple levels. This book shares the latest lessons from the MET project. With 15 original studies, some of the field's most preeminent experts tap the MET project's unprecedented collection of data to offer new insights on evaluation methods and the current state of teaching in our schools. As feedback and evaluation methods evolve rapidly across the country, Designing Teacher Evaluation Systems is a must read and timely resource for those working on this critical task. PRAISE FOR DESIGNING TEACHER EVALUATION SYSTEMS "This book brings together an all-star team to provide true data-driven, policy-relevant guidance for improving teaching and learning. From student achievement to student perceptions, from teacher knowledge to teacher practices, the authors address key issues surrounding the elements of a comprehensive teacher evaluation and improvement system. Highly recommended for anyone seriously interested in reform." —PETE GOLDSCHMIDT, Assistant Secretary, New Mexico Public Education Department "This book is an invaluable resource for district and state leaders who are looking to develop growth and performance systems that capture the complexity of teaching and provide educators with the feedback needed to develop in their profession." —TOM BOASBERG, Superintendent, Denver Public Schools "A rare example of practical questions driving top quality research and a must read for anyone interested in improving the quality of teaching." —ROBERT C. GRANGER, Former President (Ret.), The William T. Grant Foundation "This will be the 'go to' source in years to come for those involved in rethinking how teachers will be evaluated and how evaluation can and should be used to increase teacher effectiveness. The superb panel of contributors to this book presents work that is incisive, informative, and accessible, providing a real service to the national efforts around teacher evaluation reform." —JOHN H. TYLER, Professor of Education, Brown University

Developing Early Literacy Feb 25 2021 The National Assessment of Educational Progress reveals that 37 percent of U.S. fourth graders fail to achieve basic levels of reading achievement. In 1997, the U.S. Congress asked that a review of research be conducted to determine what could be done to improve reading and writing achievement. The resulting "Report of the National Reading Panel: Teaching Children to Read" (NICHD, 2000) has been influential in

helping to guide reading-education policy and practice in the United States. However, that report did not examine the implications of instructional practices used with children from birth through age 5. To address this gap in the knowledge base, the National Early Literacy Panel (NELP) was convened. The panel was asked to apply a similar methodological review process to that used by the National Reading Panel (NRP) to issues of instructional practices for young children so that parents and teachers could better support their emerging literacy skills. The NELP report represents a systematic and extensive synthesis of the published research literature concerning children's early literacy skills. It provides educators and policymakers with important information about the early skills that are implicated in later literacy learning, as well as information about the type of instruction that can enhance these skills. The results also identify areas in which additional research is needed. The meta-analyses conducted by the panel showed that a wide range of interventions had a positive impact on children's early literacy learning.

Teacher Reform in Indonesia Feb 17 2023 The book features an analysis of teacher reform in Indonesia, which entailed a doubling of teacher salaries upon certification. Differentiated Instructional Strategies Aug 14 2022 In this fascinating book, the author of *The Hinge Factor* and *The Weather Factor* surveys revolutions across the centuries, vividly portraying the people and events that brought wrenching, often enduring and always bloody change to countries and societies almost overnight. Durschmied begins with the French Revolution and goes on to examine the revolutions of Mexico in 1910, Russia in 1917, and Japan in 1945, as well as the failed putsch against Hitler in 1944. His account of the Cuban Revolution is peppered with personal anecdotes for he was the first foreign correspondent to meet Castro when the future leader was still in the Sierra Maestra. He concludes with the Iranian Revolution that ousted the Shah in 1979 another that he personally covered and, in a new preface, extends his analysis to the Arab Spring. Each revolution, Durschmied contends, has its own dynamic and memorable cast of characters, but all too often the end result is the same: mayhem, betrayal, glory, and death. Unlike the American Revolution, which is the counterexample, few revolutions are spared the harsh reality that most devour their own children. Durschmied is a supremely gifted reporter who has transformed the media he works in. Newsweek A] light and lively narrative that serves as a useful introduction for the general reader.
