Language, Music, and the Brain Michael A. Arbib, 2013-06-28 A presentation of music and language within an integrative embodied perspective of brain mechanisms for action emotion and social coordination This book explores the relationships between language music and the brain by pursuing four key themes and the crosstalk among them song and dance as a bridge between music and language multiple levels of structure from brain to behavior to culture the semantics of internal and external worlds and the role of emotion and the evolution and development of language The book offers specially commissioned expositions of current research accessible both to experts across disciplines and to non experts These chapters provide the background for reports by groups of specialists that chart current controversies and future directions of research on each theme The book looks beyond mere auditory experience probing the embodiment that links speech to gesture and music to dance The study of the brains of monkeys and songbirds illuminates hypotheses on the evolution of brain mechanisms that support music and language while the study of infants calibrates the developmental timetable of their capacities The result is a unique book that will interest any reader seeking to learn more about language or music and will appeal especially to readers intrigued by the relationships of language and music with each other and with the brain Contributors Francisco Aboitiz Michael A Arbib Annabel J Cohen Ian Cross Peter Ford Dominey W Tecumseh Fitch Leonardo Fogassi Jonathan Fritz Thomas Fritz Peter Hagoort John Halle
