The Multiple Worlds of Pynchon's Mason & Dixon Elizabeth Jane Wall Hinds, 2009 New essays examining the interface between 18th and 20th century culture both in Pynchon's novel and in the historical past Thomas Pynchon's 1997 novel *Mason Dixon* went further using the same style wit and erudition to re-create an 18th century when America was being formed as both place and idea Pynchon's focus on the creation of the Mason Dixon Line and the governmental and scientific entities responsible for it makes a clearer statement than any of his previous novels about the slavery and imperialism at the heart of the Enlightenment as he levels a dark and hilarious critique at this America This volume of new essays studies the interface between 18th and 20th century culture both in Pynchon's novel and in the historical past It offers fresh thinking about Pynchon's work as the contributors take up the linkages between the 18th and 20th centuries in studies that are as concerned with culture as with the literary text itself Contributors Mitchum Huehls Brian Thill Colin Clarke Pedro Garcia Caro Dennis Lensing Justin M Scott Coe Ian Copestake Frank Palmeri Elizabeth Jane Wall Hinds is Professor and Chair of the English Department at SUNY Brockport

Democracy in America (Complete) Alexis de Tocqueville, 2020-09-28 Amongst the novel objects that attracted my attention during my stay in the United States nothing struck me more forcibly than the general equality of conditions I readily discovered the prodigious influence which this primary fact exercises on the whole course of society by giving a certain direction to public opinion and a certain tenor to the laws by imparting new maxims to the governing powers and peculiar habits to the governed I speedily perceived that the influence of this fact extends far beyond the political character and the laws of the country and that it has no less empire over civil society than over the Government it creates opinions engenders sentiments suggests the ordinary practices of life and modifies whatever it does not produce The more I advanced in the study of American society the more I perceived that the equality of conditions is the fundamental fact from which all others seem to be derived and the central point at which all my observations constantly terminated I then turned my thoughts to our own hemisphere where I imagined that I discerned something analogous to the spectacle which the New World presented to me I observed that the equality of conditions is daily progressing towards those extreme limits which it seems to have reached in the United States and that the democracy which governs the American communities appears to be rapidly rising into power in Europe I hence conceived the idea of the book which is now before the reader It is evident to all alike that a great democratic revolution is going on amongst us but there are two opinions as to its nature and consequences To some it appears to be a novel accident which as such may still be checked to others it seems irresistible because it is the most uniform the most ancient and the most permanent tendency which is to be found in history Let us recollect the situation of France seven hundred years ago when the territory was divided amongst a small number of families who were the owners of the soil and the rulers of the inhabitants the right of governing descended with the family inheritance from generation to generation force was the only means by which man could act on man and landed property was the sole source of power Soon however the political power of the clergy was founded and began to exert itself the clergy opened its ranks to all classes to the poor and the rich the villein and the lord equality penetrated into the Government through the Church and the being who as a serf must have vegetated in perpetual bondage took his place as a priest in the midst of nobles and not infrequently above the heads of kings The different relations of men became more complicated and more numerous as society gradually became more stable and more civilized Thence the want of civil laws was felt and the order of legal functionaries soon rose from the obscurity of the tribunals and their dusty chambers to appear at the court of the monarch by the side of the feudal barons in their ermine and their mail Whilst the kings were ruining themselves by their great enterprises and the nobles exhausting their resources by private wars the lower orders were enriching themselves by commerce The influence of money began to be perceptible in State affairs The transactions of business opened a new road to power and the financier rose to a station of political influence in which he was at once flattered and despised Gradually the spread of mental acquirements and the increasing taste for literature and art opened chances of success to talent science became a means of government intelligence led to social power and the man of letters took a part in the affairs of the State The value attached to the privileges of birth decreased in the exact proportion in which new paths were struck out to advancement In the eleventh century nobility was beyond all price in the thirteenth it might be purchased it was conferred for the first time in 1270 and equality was thus introduced into the Government by the aristocracy itself
