SAFETY PRACTICAL APPLICATION**

Student number 00208088

Location Rua Fresca 1ª Tardoz 3080 Figueira da Foz, Portugal **Date of review** 11 /12 /13

Introduction

On the 11th December 2013, carried out a workplace inspection of MF&NF Law firm, at Rua Fresca 1ª Tardoz 3080 Figueira da Foz, Portugal.

The main function of this firm involves the practical application of abstract legal theories and knowledge to solve specific individualized problems, or to advance the interests of those who retain (i.e., hire) lawyers to perform legal services.

The law firm is embedded in a residential building. Within this firm, we can verify the existence of three offices, (one administration office, and two lawyer' office), a waiting room (with chairs and magazines) and one toilet.

The average of the workers is 47; there are 5 employees (two secretaries and a cleaning woman, 1 lawyer and an administrator who is also a lawyer in the firm. This assessment is concerned only with the offices and toilet.

Executive Summary

Firstly I am pleased to report that the level of general housekeeping meets a satisfactory level. However I have identified some issues that require attention, the main ones been lack of adjustable chair, electrical cables poorly positioned at the rear of computer desk, used damaged electrical cable of a computer, cleaning products stored in the toilet, no fire extinguishers, the first aid box is not sealed and has inadequate and outdated contents, lone working and working outside normal working hours, and overuse injuries from extended periods of filing and storage hard copies of documents. Failure to act on these recommendations will result in ill health and injury leaving you wide open to civil action claims from individuals which if taken to the High Court can result in £50,000 to unlimited compensation been awarded.

Health and safety should be led from the top and cascaded down through each level, promoting a good health and safety culture which improve staff morale, reduce accident, and increase productivity. By acting on the recommendations in this report the authority will be fulfilling its legal, moral and financial obligation.

Main findings of the inspection

Detailed consideration has been given to the main hazards and unsafe practices in the law firm, due to the fact that certain Health and Safety regulations are not being adhered to, these are explained below under 7 headings. Other points that require attention are the shortfall in following procedures in identifying defects by the workforce. Administrator is also at fault by not carrying out workplace inspections or ignoring clear breaches of health and safety legislation. Examples of this would be the lack of training in Preventing Overuse Injuries Training Course (MHO regulations 1992 as amended in 2002), the periodical control of equipment's for safe condition and taken out of use if any damage found, providing step-stool or step ladders used to access high shelves, providing sufficient number and position of fixed socket outlets, implement a workplace violence prevention and management, and provide drinkable water (Welfare Regulations).
