Personalize your teaching, provide rich differentiated instruction, and challenge your students' with rigorous instruction. The print Teacher Editions are perfectly aligned to the digital instruction with point-of-use references to the Lesson Presentations and all digital resources making planning and instruction easy. Includes: Volume 1 of the 2-volume set Teach Them Spanish! is for the teacher who has a little knowledge of Spanish and a lot of enthusiasm! This book guides you through practical lessons in beginning Spanish so that students with little or no previous Spanish will experience the thrill of success with a second language. Lessons, appropriate for fourth graders, are organized by topics familiar to the student, such as colors, clothing, food, family, and animals. Each lesson includes a simple-to-follow teacher lesson plan, a practice page, and activity pages. Lessons also include games, puzzles, songs, chants, and writing activities. Try this fun and practical program for teaching and learning basic Spanish. As a teacher of literacy, you transform the lives of the children in your classroom. The Reading Minilessons Book offers short, concise, purposeful lessons with a practical application in a specific area of literacy. Each minilesson engages children in inquiry that leads to the discovery and understanding of a general principle. Growing out of the interactive read-aloud experience and linked to independent reading, teachers use many of these texts as examples from which they generalise the understanding. Each of the four types of reading minilessons (management, literary analysis, strategies and skills, and writing about reading) in The Reading Minilessons Book is organised into broad categories, or "umbrellas." An umbrella helps children develop a deeper understanding of concepts and their application. As lessons build on each other, teachers will often make an anchor chart, or visual representation, that can be referenced again and again as children encounter new texts and/or minilessons. The Fountas & Pinnell Classroom(tm) Reading Minilessons Book, Grade 4 contains 225 reading minilessons. This set provides the consumable Student Edition, Volume 1, which contains everything students need to build conceptual understanding, application, and procedural skill and fluency with math content organized to address CCSS. Students engage in learning with write-in text on vocabulary support and homework pages, and real-world problem-solving investigations. In 36 weeks of systematic instruction, your fourth-graders will learn 97 key academic vocabulary words that they are likely to encounter in multiple subject areas and in assessment instruments. Examples of the words presented in grade 4: - adapt, dependent, outline - alter, detect, prompt - compose, identify, reveal - consult, indicate, sequential Develop your grade 4 students' writing skills in each of the six traits--Ideas, Organization, Word Choice, Sentence Fluency, Voice, and Conventions--using 125 engaging, 10- to 15-minute writing lessons. - 125 trait-based lessons - 25 weeks of instruction - Each weekly unit includes: -teacher lesson plan -4 reproducible student pages -writing prompt - Supports any writing program - Models many forms of writing - Teacher rubric Build a sense of community and inclusiveness in the classroom with culturally responsive teaching units that connect students' cultures, languages, and life experiences with their learning. Don't have students just memorize vocabulary words ... give them the tools they need to understand and apply the words Help your students learn 144 new words with the focused daily practice in A Word a Day, Grade 4. Activities such as identifying attributes, making personal connections, and completing graphic organizers give students multiple exposures to the words, helping them to develop the vocabulary they need to be successful on assessments and in the classroom. Examples of vocabulary words presented in Grade 4: * obligation, command, compete * dilemma, resource, random * spontaneous, lackadaisical, treacherous * drenched, massive, predicament Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just that, by looking at the big ideas at the first-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum. Personalize your teaching, provide rich differentiated instruction, and challenge your students' with rigorous instruction. The print Teacher Editions are perfectly aligned to the digital instruction with point-of-use references to the Lesson Presentations and all digital resources making planning and instruction easy. Includes: Volume 2 of the 2-volume set The perfect way to begin your students school day! Cross-curricular daily practice gets your fourth grade students focused and engaged and ready to learn. The daily lessons provide practice of language, math, and reading skills that support your core curriculum. The meaningful 10 to 15 minutes of daily practice helps sharpen students skills and helps you see where your students need to improve. With a detailed scope and sequence, you will always know the skills that your students are practicing. Daily Fundamentals lessons are ideal for morning work, bell ringers, homework, and informal assessment. The daily practice and review prepares students for success on assessments and state testing. A comprehensive resource for grammar, mechanics, usage, and vocabulary practice. Based on the true story of a boy in Brooklyn who became neighbors and friends with his hero, Jackie Robinson. Stephen Satlow is an eight-year-old boy living in Brooklyn, New York, which means he only cares about one thing--the Dodgers. Steve and his father spend hours reading the sports pages and listening to games on the radio. Aside from an occasional run-in with his teacher, life is pretty simple for Steve. But then Steve hears a rumor that an African American family is moving to his all-Jewish neighborhood. It's 1948 and some of his neighbors are against it. Steve knows this is wrong. His hero, Jackie Robinson, broke the color barrier in baseball the year before. Then it happens--Steve's new neighbor is none other than Jackie Robinson! Steve is beyond excited about living two doors down from the Robinson family. He can't wait to meet Jackie. This is going to be the best baseball season yet! How many kids ever get to become friends with their hero? Heres the question parents ask at the end of every school year: How can we help our kids prepare for the next school year, while allowing them to enjoy their summer vacation? Heres the perfect answer: short lessons presented in a daily schedule for 8 weeks. The Monday/Thursday lessons cover a variety of grade-appropriate subjects. Fridays lessons are fun, brain-teasing kinds of activities. All of the lessons can be done in about 30 minutes, leaving children with plenty of time for play. Each book includes over 300 stickers that can be used to track progress and reward good work. As students progress through the grades, more and more of their reading is done in nonfiction, or expository, materials--content area textbooks, reference books, periodicals, and informative articles on the Internet, for example. Because the main purpose for reading these texts is to acquire information, the reasons for teaching our students efficient and effective strategies for tackling this type of text are compelling. Students need explicit instruction in identifying and best utilizing the text features and text structures they encounter. If students learn to read the signposts that are guides to the organization of a particular piece of nonfiction, they will be better equipped to navigate their way through and comprehend the material. As a complete nonfiction reading worktext program, Navigating Nonfiction will help students get the most out of this genre. Teacher's Guide: * targets critical nonfiction reading skills essential for academic reading success. * contains simple, easy-to-follow instructional routines. * provides explicit teaching models and think-alouds. * highlights key research that supports the program's approach. * includes a full-color poster that features a visual snapshot of the five nonfiction structures. For use with Grade 4, includes Vols. 1-6, Course Guide, and Mission Assessments Answer Keys Science Lessons & Investigations presents science learning through in-depth investigation and observation, supporting Next Generation Science Standards (NGSS). Each unit guides students through exploring a science concept and includes hands-on activities to extend learning. This robust teaching resource gives you everything you need, including teacher support pages, informational text and graphics, vocabulary review, reading and writing activities, and hands-on science projects. Students apply science, technology, engineering, and math concepts to solve real-world problems. Each of the 15 units focuses on a hands-on challenge in which students work together as engineers to design, prototype, test, and refine their creations. Topics support NGSS. Book jacket. Critical thinking skills are more important than ever in academic and real-world situations. Daily Higher-Order Thinking provides you with daily activities that build and grow

students' problem-solving skills in engaging formats such as logic and visual puzzles, brainteasers, creative writing, picture comparison, word play, and "what if" questions. Daily 20-minute practice lessons help students apply critical thinking skills across subject areas. The lessons develop students' higher-order thinking skills and allow them to integrate their learning and make deeper connections between their learning and the real world. Use Daily Higher-Order Thinking for warm-up exercises, extension activities, early finisher tasks, and small-group center activities to develop your students' critical and creative thinking skills. How it works: - Monday-Friday: Full-page daily activities focus on a specific behavioral verb each day. The verb is defined at the top of the page so students become aware of when and how they are using the thinking skill. - Each full-page activity gives students an opportunity to practice a higher-order thinking skill in the context of a different curriculum area. - Questions and tasks are open-ended and can be used to promote peer-to-peer discussions as students share and discuss answers, while also fostering critical thinking skills. - An answer key provides sample responses for each day's activities. Evaluate students' responses based on your own expectations and on what content your students have encountered. Grade 4 activities include: logic puzzles, creative writing, picture comparisons, and "what if" questions. Daily lessons practice higher-order thinking skills such as: - Analyzing - Predicting - Designing - Composing - Organizing - Evaluating - Imagining - Strategizing "Wonders is designed to foster a love of reading in all children. By providing a comprehensive set of connected resources for all learners in grades K-6, Wonders offers educators the ability to adapt instruction with confidence as students grow. [Wonders'] focus on teaching the whole child -- and every child -- prepares students to be lifelong learners and critical thinkers."--Publisher's website. Daily instruction on reading strategies and skills needed to improve comprehension and raise test scores.
