*Sustainability in Energy and Buildings May 27 2021 This volume contains the proceedings of the 11th KES International Conference on Sustainability and Energy in Buildings 2019 (SEB19) held in Budapest, 4th -5th July 2019 organised by KES International in*

*partnership with Cardiff Metropolitan University, Wales, UK. SEB-19 invited contributions on a range of topics related to sustainable buildings and explored innovative themes regarding sustainable energy systems. The aim of the conference was to bring together researchers, and government and industry professionals to discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical, implementation and simulation perspective. The conference formed an exciting chance to present, interact, and learn about the latest research and practical developments on the subject. The conference attracted submissions from around the world. Submissions for the Full-Paper Track were subjected to a blind peer-review process. Only the best of these were selected for presentation at the conference and publication in these proceedings. It is intended that this volume provides a useful and informative snapshot of recent research developments in the important and vibrant area of Sustainability in Energy and Buildings.*

*Knowledge Production and Contradictory Functions in African Higher Education Mar 06 2022* The dominant global discourse in higher education now focuses on world-class universities inevitably located predominantly in North America, Europe and, increasingly, East Asia. The rest of the world, including Africa, is left to play catch-up. But that discourse should focus rather on the tensions, even contradictions, between excellence and engagement with which all universities must grapple. Here the African experience has much to offer the high-participation and generously resourced systems of the so-called developed world. This book offers a critical review of that experience, and so makes a major contribution to our understanding of higher education.

*The Diplomatic System of the European Union Jan 21 2021* Over the past five years, the EU has established a new system of diplomacy centred on the European External Action Service (EEAS) and the High Representative for Foreign Affairs and Security Policy. This new system reflects a process of evolution in a changing context, and has been faced by major challenges since its inception. This book examines the diplomatic system of the EU, locating it within the broader study of diplomacy and the European integration project. The volume is structured around the interrelated themes of institutional change and the evolving practices of EU diplomacy. It tracks the development of the EU's system of diplomacy, with particular reference to the implementation of the Lisbon Treaty, the establishment of the EEAS and the emerging practices of EU strategic and structural diplomacy. Bringing together contributions from leading experts in the field, this book provides an original approach to the development and operation of the EU's diplomatic system. This book will be of interest to students and scholars of

*European Union international relations, European Union politics and diplomacy.*

*Adding Value to Libraries, Archives, and Museums Jun 28 2021 This book explains the concept of adding value and shows staff at libraries and other organizations why they need to take steps now to ensure they are adding new value to their communities—whether it be a local town or neighborhood, a faculty and student body, or a school. Value is at the core of every organization's purpose. Without value, organizations die. Libraries—as well as museums, archives, and galleries—have traditionally added value to their communities through their collections and services, but yesterday's collections and services are no longer enough. In order to remain sustainable, today's libraries, archives, museums, and galleries must explore new ways to add value that resonate in the lives of their customers. This unique book explains how addressing the "5 C's" of adding value—content, context, connection, collaboration, and community—enables organizations to find new ways to invigorate their services, better serve their communities, and thrive today and tomorrow. It addresses adding value in the context of other key topics, such as crowdsourcing, embedded librarianship, makerspaces, self publishing, and repurposing spaces. Filled with charts, tables, screenshots, and other visual representation, this is a*

*useful and provocative guide that anyone interested in vesting in the successful future of libraries, archives, and museums needs to read.*

*Plundering the North Sep 11 2022 The manufacturing of a chronic food crisis Food insecurity in the North is one of Canada's most shameful public health and human rights crises. In Plundering the North, Kristin Burnett and Travis Hay examine the disturbing mechanics behind the origins of this crisis: state and corporate intervention in northern Indigenous foodways. Despite claims to the contrary by governments, the Hudson's Bay Company (HBC), and the contemporary North West Company (NWC), the exorbitant cost of food in the North is neither a naturally occurring phenomenon nor the result of free-market forces. Rather, inflated food prices are the direct result of government policies and corporate monopolies. Using food as a lens to track the institutional presence of the Canadian state in the North, Burnett and Hay chart the social, economic, and political changes that have taken place in northern Ontario since the 1950s. They explore the roles of state food policy and the HBC and NWC in setting up, perpetuating, and profiting from food insecurity while undermining Indigenous food sovereignties and self-determination. Plundering the North provides fresh insight into Canada's settler colonial project by re-evaluating northern food policy and laying bare the governmental and corporate processes behind the chronic food insecurity experienced by northern Indigenous communities.*

*A University Education Feb 22 2021 Universities have a crucial role in the modern world. In England entrance to universities is by nation-wide competition which means English universities have an exceptional influence on schools - a striking theme of the book. This important book first investigates the university as an institution and then tracks the individual on their journey to and through university. In A University Education, David Willetts presents a compelling case for the ongoing importance of the university, both as one of the great institutions of modern society and as a transformational experience for the individual. The book also makes illuminating comparisons with higher education in other countries, especially the US and Germany. Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014, the author offers a powerful account*

*of the value of higher education and the case for more expansion. He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of £9,000 fees. The final section addresses some of the big questions for the future, such as the the relationship between universities and business, especially in promoting innovation.. He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly. This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework.*

*Water and Power Jan 04 2022 This book brings together a talented international group of scholars, policy practitioners, and NGO professionals that explores a range of issues relating to environmental, developmental, and governing challenges on the Mekong, one of the world's greatest rivers and, alas, one of the most endangered. The book is divided into three sections devoted in turn to historical perspectives on the Lower Mekong Basin. Issues relate to livelihood strategies, environmental threats, and adaptation strategies; and various aspects of river governance, with individual authors treating questions of governance at different levels of refraction and in different registers. The result is a fresh and innovative collection of essays, which, taken together, provide much-needed new perspectives on some of the most important and*

*seemingly intractable environmental and development issues in contemporary Asia.*

*Wildlife Trafficking Jan 16 2023 This book provides a unique, comprehensive exploration of the scale, scope, threats and drivers of wildlife trafficking. It also undertakes a distinctive exploration of who the victims and offenders of wildlife trafficking are as well as analysing the stakeholders who are involved in collaborative efforts to end this devastating green crime.*

*Bicycling for Transportation Aug 11 2022 Bicycling for Transportation examines the individual and societal factors of active transportation and biking behavior. The book uses an Interdisciplinary approach to provide a comprehensive overview of bicycling for transportation research. It examines the variability in biking participation among different demographic groups and the multiple levels of influence on biking to better inform researchers and practitioners on the effective use of community resources, programming and policymaking. It is an ideal resource for public health professionals trying to encourage physical activity through biking. In addition, it makes the case for new infrastructure that supports these initiatives. Provides evidence-based insights on cost-effective interventions for improving biking participation Includes numerous case studies and best practices that highlight multi-level approaches in a variety of settings Explores individual and social factors related to biking behavior, such as race, gender and self-efficacy*

*Creating Sustainable Bioeconomies Feb 14 2023 The growing global demand for food, feed and bio-based renewable material is changing the conditions for agricultural production worldwide. At the same time, revolutionary achievements in the field of biosciences are contributing to a transition whereby bio-based alternatives for*

*energy and materials are becoming more competitive. Creating Sustainable Bioeconomies explores the prospects for biosciences and how its innovation has the potential to help countries in the North (Europe) and the South (Africa) to move towards resource efficient agriculture and sustainable bioeconomies. Throughout the book, the situations of Europe and Sub-Saharan Africa will be compared and contrasted, and opportunities for mutual learning and collaboration are explored. The chapters have been written by high profile authors and deal with a wide range of issues affecting the development of bioeconomies on both continents. This book compares and contrasts the situations of these two regions as they endeavour to develop knowledge based bioeconomies. This volume is suitable for those who are interested in ecological economics, development economics and environmental economics. It also provides action plans assisting policy-makers in both areas to support the transition to knowledge based and sustainable bioeconomies.*

*Uneven Citizenship: Minorities and Migrants in the Post-Yugoslav Space Nov 13 2022 This book focuses on the relations between citizenship and various manifestations of diversity, including, but not exclusively, ethnicity. Contributors address migrants and minorities in a novel and original way by adding the concept of 'uneven citizenship' to the debate surrounding the former Yugoslavian states. Referring to this 'uneven citizenship' concept, this book not only engages with exclusionary legal, political and social practices but also looks at other unanticipated or unaccounted for results of citizenship policies. Individual chapters address statuses, rights, and duties of refugees, internally displaced persons (IDPs), returnees, Roma, and 'claimed co-ethnics', as well as various interactions between dominant and non-dominant groups in the post-Yugoslav space. The particular focus is on 'migrants and minorities', as these*

*are frequently overlapping categories in the post-Yugoslav context and indeed more generally. Not only is policy framework addressed, but also public understanding and the socio-historical developments which created legally and culturally stratified, transnationally marginalized, desired and claimed co-ethnics, and those less wanted, often on the margins of citizenship. This book was originally published as a special issue of Ethnopolitics.*

*The Microgrid Revolution Feb 02 2022 What kinds (according to U.S. News & World Report) of clean electricity initiatives—ones that make sense on public policy and business strategy levels—could overcome the hurdles in shifting away from the entrenched electricity and petroleum-based transport industries in the United States? This book explores the tremendous opportunities of the new electricity revolution that looks to threaten the century-old business models of our existing power production infrastructure. The electricity industry, having been in place for more than 100 years, has established tremendous power and influence. But as solar- and wind-based energy businesses gain small footholds and expand their impact, the incumbent electricity businesses face fundamental challenges that threaten their century-old business models. Will technological advances and the motivation to control climate change finally effect a revolution in the electricity markets? This unique book proposes public policy- and business strategy-level initiatives that could overcome the structural impediments that prevail in the current electricity industries and predicts the important changes to come in the immediate and distant future. In *The Microgrid Revolution: Business Strategies for Next-Generation Electricity*, author Mahesh P. Bhave explains the current state of electricity production,*

*identifies its widespread problems, and proposes a specific approach and particular solution to the puzzle of supplying clean energy for the 21st-century world. The introductory chapters lay the groundwork for the author's provocative thesis, and the concluding chapters elaborate on it with broad implications. By examining the subject material from the perspectives of public policy and regulatory concerns, corporate strategy, industry structure changes, innovation, and climate change as well as from a technological angle, readers from diverse industries and professional backgrounds will be able to understand how the coming electricity revolution is something we all have the power to influence.*

*Leaving no one behind Aug 30 2021 In Africa, women are critical agents of change in the fight against rural poverty, hunger and malnutrition. They are the backbone of their households, communities, and rural economies covering important roles in food production, processing and marketing, and also in the nutrition of the family. However, with food systems rapidly modernizing and dramatic effects of climate change and environmental degradation becoming the “new normal”, they continue to face multiple challenges due to persisting gender discriminations. Over the years, remarkable political commitments to improve women’s condition and status have been made, but substantial gender gaps still remain in the access and control over productive resources and assets, services and markets. Overcoming these challenges will require addressing the root causes of gender inequalities through innovative and gender-transformative approaches. According to FAO’s latest estimates (SOFI, 2019), the number of people suffering from hunger has been rising. Just this trend - and the awareness that we lost a decade of progress - is sufficient to underscore the immense challenge of achieving the Zero Hunger target by 2030. The situation is most*

*alarming in sub-Saharan Africa, where the number of undernourished people has steadily increased since 2014, to 237 million in 2018. These findings are in line with the 2019 SDG report. It shows that we are still lagging behind in achieving the SDGs as the global response has not been ambitious enough.*

*2013 Global Hunger Index Apr 18 2023 The 2013 Global Hunger Index (GHI), which reflects data from the period 2008–2012, shows that global hunger has improved since 1990, falling by one-third. Despite the progress made, the level of hunger in the world remains “serious,” with 870 million people going hungry, according to estimates by the Food and Agriculture Organization of the United Nations. The policy recommendations in this report offer a path forward for the international development, humanitarian, and donor communities; for country-level policymakers in food-insecure countries; and for development and humanitarian practitioners.*

*(Free Sample) 10 Yearwise UPSC Civil Services IAS Mains General Studies Previous Year Solved Papers 1 to 4 (2013 - 2022) 4th Edition Nov 25 2023 The thoroughly updated 4th Edition of 10 Yearwise UPSC Civil Services IAS Mains General Studies Previous Year Solved Papers 1 to 4 (2013 - 2022) consists of Past 10 years Solved Papers of the General Studies Paper 1 to 4. # The USP of this book is that the word limit for each solution is strictly adhered as per the UPSC requirements. # The book is divided into 4 sections providing solutions to the respective 4 papers. *The Great Surge Apr 26 2021 The untold story of the global poor: “Powerful, lucid, and revelatory, The Great Surge...offers indispensable prescriptions about sustaining global economic progress into the future” (George Soros, chairman of Soros Fund Management). We live today at a time of great progress for the global poor. Never before have so many people, in so many developing countries, made so much progress, in so short a time in reducing poverty, increasing incomes, improving health, reducing conflict and war, and spreading democracy. Most people believe the opposite: that with a few exceptions like China and India, the majority of developing countries are hopelessly mired in deep poverty, led by inept dictators, and have little hope for change. But a major transformation is underway—and has been for two decades now. Since the early 1990s more than 700 million people have been lifted out of extreme poverty, six million fewer children die every year from disease, tens of millions more girls are in school, millions more people have access to clean water, and democracy—often fragile and imperfect—has become the norm in developing countries around the world. “A terrific book” (Nick Kristof, The New York Times), The Great Surge chronicles this unprecedented economic, social, and political transformation. It shows how the end of the Cold War, the development of new technologies, globalization, and courageous local leadership have combined to improve the fate of hundreds of millions of people in poor countries around the world. Most importantly, The Great Surge reveals how we can accelerate the progress.*

*Transforming Gender and Food Security in the Global South Oct 01 2021 Drawing on studies from Africa, Asia and South America, this*

*book provides empirical evidence and conceptual explorations of the gendered dimensions of food security. It investigates how food security and gender inequity are conceptualized within interventions, assesses the impacts and outcomes of gender-responsive programs on food security and gender equity and addresses diverse approaches to gender research and practice that range from descriptive and analytical to strategic and transformative. The chapters draw on diverse theoretical perspectives, including transformative learning, feminist theory, deliberative democracy and technology adoption. As a result, they add important conceptual and empirical material to a growing literature on the challenges of gender equity in agricultural production. A unique feature of this book is the integration of both analytic and transformative approaches to understanding gender and food security. The analytic material shows how food security interventions enable women and men to meet the long-term nutritional needs of their households, and to enhance their economic position. The transformative chapters also document efforts to build durable and equitable relationships between men and women, addressing underlying social, cultural and economic causes of gender inequality. Taken together, these combined approaches enable women and men to reflect on gendered divisions of labor and resources related to food, and to reshape these divisions in ways which benefit families and communities. Co-published with the International Development Research Centre.*

*The New Emperors Jul 30 2021 China has become the powerhouse of the world economy and home to 1 in 5 of the world's population,*

*yet we know almost nothing of the people who lead it. How does one become the leader of the world's newest superpower? And who holds the real power in the Chinese system? In *The New Emperors*, the noted China expert Kerry Brown journeys deep into the heart of the secretive Communist Party. China's system might have its roots in peasant rebellion but it is now firmly under the control of a power-conscious Beijing elite, almost half of whose members are related directly to former senior Party leaders. Brown reveals the intrigue and scandal surrounding the internal battle raging between two China's: one founded by Mao on Communist principles, and a modern China in which 'to get rich is glorious'. At the centre of it all sits the latest Party Secretary, Xi Jinping - the son of a revolutionary, with links both to big business and to the People's Liberation Army. His rise to power is symbolic of the new emperors leading the world's next superpower.*
