**Teaching History 11 - 18** Feb 16 2023 Teaching History 11-18 is a comprehensive introduction to teaching, learning and assessing history in secondary schools. Drawing on cutting edge research and practice, it draws together recent thinking in teaching and learning in history, teaching and learning in secondary education more generally and classroom-based research to provide a radical re-thinking of the practices of teaching and learning about the past at the beginning of the twenty-first century. At the core of the book is a focus on diversity and its implications: the diversity of classrooms in English schools, cultural diversity and pluralism in accounts of the past, and the diversity of pedagogic and communicative strategies at the disposal of teachers. The book is realistic

about the challenges: a precarious place in the curriculum, pupil disaffection, bitter ideological debates about the purpose, place and status of history, but offers a forward-looking rationale for the centrality of the past in debates about identity, social cohesion and persona and social education.

**Hannah More in Context** Dec 17 2022 This book relocates the long life and literary career of the poet, playwright, novelist, philanthropist and teacher Hannah More (1745-1833) in the wider social and cultural contexts that shaped her, and which she helped shape in turn. One of the most influential writers and campaigners of the late eighteenth and early nineteenth centuries, More's reputation has suffered unfairly from accusations of paternalism and provincialism, and misunderstandings of her sincerely-held but now increasingly unfamiliar evangelical beliefs. Now, in this book, readers can explore a range of essays rooted in up-to-the-minute research which examines newly-recovered archival materials and other evidence in order to present the fullest picture yet of this complex and compelling author, and the era she helped mould with her words.

**Handbook of Multiple Source Use** Oct 27 2023 The Handbook of Multiple Source Use draws on theory and research within cognitive and educational psychology, the learning sciences, disciplinary education, information literacy, reading psychology, and social psychology, to present the first comprehensive research volume on this topic. Many learners both in and out of school have almost instantaneous access to an enormous range of information sources at present. In this book, broken into six sections, international scholars come together toward understanding factors that influence how individuals cope with the challenge of building knowledge from diverse, often conflicting, information.

Open Source for the Enterprise Jun 03 2024 Provides something far more useful than either the

cheer-leading or the fear-mongering one hears about open source. This book also provides a top to bottom view not only of the technology, but of the skills required to manage it and the organizational issues that must be addressed.

**The Integration of Health and Social Care in the UK** May 29 2021 This timely and much needed text book provides a systematic assessment of recent policy developments across the UK and introduces the different models of integration which currently operate - from structural integration in Northern Ireland to health and care partnerships in Scotland. It examines the achievements of integrated working, showing how it can lead to improvements in the quality of services and access to services, as well as create cost efficiencies. It also considers barriers to integration and draw comparisons with experiences in the US, Canada, Australia and Europe to identify lessons for practice in the UK. Supported throughout by case studies and a wealth of illustrative material - including charts and diagrams - this is key reading for students taking degree programmes and foundational qualifications in health and social care, or related degrees in social policy, health studies, social work and nursing.

Certified Kubernetes Application Developer (CKAD) Study Guide Mar 27 2021 Developers with the ability to operate, troubleshoot, and monitor applications in Kubernetes are in high demand today. To meet this need, the Cloud Native Computing Foundation created a certification exam to establish a developer's credibility and value in the job market for work in a Kubernetes environment. The Certified Kubernetes Application Developer (CKAD) exam format is different from the typical multiple-choice format of other certifications. Instead, the CKAD is performance-based and requires deep knowledge under immense time pressure. Updated to reflect revisions to the official curriculum made in September 2022, this revised study guide takes you through all the topics you need to fully prepare for the exam. Author Benjamin Muschko also shares his personal experience and tips. Learn when and how to apply Kubernetes's concepts to manage an application Understand the objectives, abilities, tips, and tricks needed to pass the CKAD exam Explore the ins and outs of the kubectl command-line tool Solve real-world Kubernetes problems in a hands-on command-line environment Navigate and solve questions during the CKAD exam New topics include: Deployment strategies, the Helm package manager, resources that extend Kubernetes (CRD), building container images, and more

**The History Teacher's Handbook** Jan 18 2023 This comprehensive handbook combines up-to-date research - including Ofsted reports and pupil surveys - with road-tested classroom techniques to suggest how you can make your classroom a dynamic and productive learning environment. Advice is given on all aspects of history teaching, from how to plan for successful outcomes and maximise meaningful assessment, through to exciting ways to examine evidence and develop pupil interest

outside of the classroom. The chapter on making effective use of ICT to teach history tackles one of the biggest challenges for teachers today: how to ensure new technologies are utilised to improve learning, without allowing the technology to detract from the history being taught. This book is perfect for trainee teachers and NQTs, but will also help experienced history teachers to make lessons inspiring and accessible to pupils with a range of specific educational needs, including pupils for whom English is not their first language, and those who are regarded as being gifted and talented.

*Enabling excellence* Feb 24 2021 Thirty different health professions are currently regulated in law on a UK-wide basis by nine regulatory bodies and regulation of pharmacy technicians will also become mandatory from July 2011. The Health and Social Care Act 2008 initiated a series of reforms to the governance of the health professions regulatory bodies, delivering a fundamental change in the governance of the regulatory bodies, ending professional control over their governing councils and strengthening the contribution of lay members. Delivering safe and effective care will continue to be the driving principle behind professional regulation. Further, in the context of "any willing provider" being able to provide services to the NHS in England, the role of professional regulation, providing a set of standards which apply to all aspects of a health or social care professional's work will become all the more important in future, in most sectors of care. However, the regulatory framework is also complex, expensive and requires continuous Government intervention to keep it

up to date. This Command Paper therefore sets out proposals for how the system for regulating healthcare workers across the UK and social workers in England should be reformed to sustain and develop the high professional standards of those practitioners and to continue to assure the safety of those using services and the rest of the public. The reforms aim to deliver greater operational freedom to the regulators, balanced by strengthened accountability to both Parliament and the public.

*The First 20 Hours* Jan 30 2024 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare?

Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most

complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

All chapters are original, and written by experts in the PA field for this book.

Challenging Learning Through Questioning Nov 15 2022 Better questioning for better learning Questioning is a process that sparks discussion and encourages deeper thinking. Effective questioning builds on students' natural curiosity, moving them out of their comfort zone and into the learning zone in a purposeful, accessible way. It also models the process of good thinking and fosters a culture of high expectations. Like any skill, questioning takes practice. With this insightful guide, you'll reframe your thinking and fine-tune the three essential questioning skills—know your intent, plan your responses, and stay purposefully silent—to elicit noticeably improved responses from students. Features include · Questioning sequences that work in any discipline · Techniques for deepening learning through questioning · Organizational strategies for pair, small-group, and whole-class dialogues · Best practices for balancing questioning, thinking tools, and strategic silences · Exercises, activities, and review and reflection sections High-quality questioning supports a culture in which students are not only challenged, but expect to be challenged, and where they flourish intellectually. Through your questioning, you'll give them the tools they need to become thoughtful, confident, and independent learners.

**Transnational Communities** Sep 25 2023 Transnational communities are social groups that emerge from mutual interaction across national boundaries, oriented around a common project or 'imagined' identity. This common project or identity is constructed and sustained through the active engagement and involvement of at least some of its members. Such communities can overlap in different ways with formal organizations but, in principle, they do not need formal organization to be sustained. This book explores the role of transnational communities in relation to the governance of business and economic activity. It does so by focusing on a wide range of empirical terrains, including discussions of the Laleli market in Istanbul, the institutionalization of private equity in Japan, the transnational movement for open content licenses, and the mobilization around environmental certification. These studies show that transnational communities can align the cognitive and normative orientations of their members over time and thereby influence emergent transnational governance arrangements.
