Traditional Bowyer's Handbook Clay C. Hayes, 2017-11-11 I can t really explain my attraction to the bow and arrow I can t explain the pull of a camp fire either or the ocean or the open hills where you can see forever It s just there These things are in all of us I think some vestige of our primitive past buried so deep in our genome as to be inseparable from what it is to be human What we think of as civilization is a new experiment in the eyes of Father Time Experts say that humans have been around for some fifty thousand years We ve been carrying the bow for maybe five thousand atlatls and spears before that and pushing the plow for maybe two thousand We have been hunters forever We are built to run to pursue big game on the open savannas to kill and eat them With the dwindling of the Pleistocene mega fauna mammoths and such the bow became more important and indeed helped to make us who we are today It still holds that attraction same as the hearth When I was a kid I would make crude bows from green plum branches big at one end and small at the other A discarded hay string would serve as a bowstring My arrows were fat and unfletched and would scarcely fly more than a few yards usually tumbling over in midair The small creatures around our home were plenty safe When I was about 12 or so my brother brought me two old Ben Person recurves he d found at a yard sale One was a short bow probably no more than 48 inches and the other was more of a standard size They both drew about 50 lbs if I recall That fall happened to be a good year for cottontails around our little farm and I spent countless hours walking the fields and shooting at them as they busted from underfoot Although I d get several shots a day I never did hit one on the fly but I remember that fall fondly nonetheless The pleasure of jumping rabbits and seeing the feathered shaft streaking toward them was a thrill I ve never forgotten I made my first real bow when I was in high school after getting a copy of the Traditional Bowyers Bible in the mail more on this in a moment My first bow a decrowned mulberry flatbow broke within about 10 shots The second held together quite well and is probably still around somewhere and capable of shooting an arrow though it would probably draw about 70lbs When I first started making bows I

used the woods I had close at hand mulberry common persimmon red maple white cedar etc I d probably made more than a dozen bows of various woods before I ever saw a piece of Osage People often ask me where they can find a bow stave and invariably I tell them to use what they have close by No matter where you live you ll have something near that will make a bow Go cut it down and get started This book is an attempt to share some of what I ve learned over my years of bow making The Traditional Bowyers Bible series as mentioned earlier is still a great source of information Why write another book on making wood bows you might ask The simple answer is that there are so many ways of doing and explaining things There are still unanswered questions and we ll cover many of them here We will cover all of the most frequently asked questions and lay out a simple plan that should guide you through the entire process from finding a stave to stringing your bow and shooting your first arrow Some of what you ll find here you ll find nowhere else

Traditional Bowyer's Bible Tim Baker, Jay Massey, Paul Comstock, Steve Allely, Jim Hamm, 2018-08-11 Many archers and bowhunters are surprised to learn that a wooden bow whose ancestry dates back thousands of years will shoot an arrow as effectively as most modern bows Never before have such detailed bow making instructions been available to the home craftsman on how to bring such history alive

The Backyard Bowyer Nicholas Tomihama, 2011-03-10 With over 300 step by step pictures the Backyard Bowyer is geared for the beginning bowyer backyard hobbyist and anyone who has ever pondered building a wooden bow Easy to read and follow steps go down to even the smallest detail in the design and construction of basic archery bows Learn to craft fine wooden bows without huge investment in equipment and materials and without being bound by location and limited workspace Learn to construct A classic target flat bow an English Longbow suitable for hunting and even your own strings and arrows for traditional and primitive archery

The book of the crossbow Ralph Payne-Galloway,2019-08-28 One of the most devastating weapons of the Middle Ages the crossbow probably originated in the Western Roman Empire early in the fourth century its design perhaps suggested by the balista an ancient form of catapult The medieval crossbow fired a twelve inch bolt quarrel capable of piercing all but the strongest armor and is widely credited with helping Richard the Lionhearted defeat the Saracens at the battle of Arfus during the Third Crusade and nbsp and nbsp and nbsp Despite the fact that crossbows were carried by thousands of soldiers in medieval warfare this book is the only work ever devoted exclusively to this widely used weapon In addition to detailing the history of the crossbow and its military and sporting uses the author also deals with an arsenal of related weapons from the siege engines balistas and catapults of the ancients to such arms as the Turkish bow and the Chinese repeating crossbow and nbsp and nbsp and nbsp Enhanced with over 200 illustrations ranging from contemporary battle pictures to scale constructional plans and replete with scholarly detail and intriguing anecdotes this classic study will interest historians medievalists sportsmen and any student of arms and armor
