**Directions:** Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

**Vocabulary:** carbohydrate, disaccharide, lipid, monosaccharide, polysaccharide, protein, starch

**Prior Knowledge Questions** (Do these BEFORE using the Gizmo.)

1. What are the major types of nutrients you can get from food?

carbs, protein, fats

2. How are these nutrients used by your body?

for energy

### Gizmo Warm-up

Have you ever wondered what is in your food? Scientists use a variety of tests to determine the nutritional content of food. You will learn four of those tests with the *Identifying Nutrients* Gizmo.

1. Below the **Food samples** label, drag tube **A** into the **Food sample holder**. Below the **Benedict test**, click the **Test** button. What is done in the Benedict test?

turned orange

2. The Benedict test is a test for **monosaccharides**, simple sugars like glucose or fructose (fruit sugar). In contact with monosaccharides, the Benedict solution turns from blue to green to orange.

Does **Sample A** contain monosaccharides?

yes

**Note:** **Disaccharides** such as sucrose (table sugar) and lactose (milk sugar) are more complex than monosaccharides. The Benedict test does not detect disaccharides directly.

**Too Much Magic** James Howard Kunstler,2012-06-19 The author of *The Long Emergency* explains why technology can't solve all our problems and how excessive optimism can endanger our future. *The Long Emergency* quickly became a grassroots hit, offering a shocking vision of our post-oil future and capturing the attention of environmentalists and business leaders alike. As discussion about our dependence on fossil fuels and our dysfunctional financial and government institutions continues, the author returns with *Too Much Magic*, evaluating what has changed and what has not, and what direction we need to take in this post-financial crisis world. Too much magic is what James Howard Kunstler sees in the bright utopian visions of the future dreamed up by optimistic souls who believe technology will solve all our problems. Their visions remind him of the flying cars and robot maids that were the dominant images of the future in the 1950s. Kunstler's image of the future is much more sober. With vision, clarity of thought, and a pragmatic worldview, Kunstler argues that the time for magical thinking and hoping for miracles is over, and the time to begin preparing for the long emergency has begun. A sharp critic of energy-sucking big box landscapes. Winnipeg Free Press.
