The Impact of School Infrastructure on Learning Peter Barrett, Alberto Treves, Tigran Shmis, Diego Ambasz, 2019-02-04 The Impact of School Infrastructure on Learning A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning particularly the aspiration for accessible well built child centered synergetic and fully realized learning environments Written in a style which is both clear and accessible it is a practical reference for senior government officials and professionals involved in the planning and design

of educational facilities as well as for educators and school leaders Yuri Belfali Head of Division Early Childhood and Schools OECD Directorate for Education and Skills This is an important and welcome addition to the surprisingly small evidence base on the impacts of school infrastructure given the capital investment involved It will provide policy makers practitioners and those who are about to commission a new build with an important and comprehensive point of reference The emphasis on safe and healthy spaces for teaching and learning is particularly welcome Harry Daniels Professor of Education Department of Education Oxford University UK This report offers a useful library of recent research to support the connection between facility quality and student outcomes At the same time it also points to the unmet need for research to provide verifiable and reliable information on this connection With such evidence decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple competing dimensions of school policy including the construction and maintenance of the school facility David Lever K 12 Facility Planner Former Executive Director of the Interagency Committee on School Construction Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided The authors have finally brought that body of evidence together in this well structured report The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come We should all join this conversation to further the process of globally enhancing learning environment quality David Schrader AIA Educational Facility Planner and Designer Former Chairman of the Board of Directors Association for Learning Environments A4LE
